PORTFOLIO MANAGERS - ANFIELD CAPITAL

Peter Van de Zilver, CFA
Director: Portfolio Analytics & Risk Management

David Young, CFA
Founder & CEO

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by visiting www.RegentsParkFund.com or calling 866-866-4848

INVESTMENT OBJECTIVE

The Anfield Capital Diversified Alternatives ETF ("the Fund") seeks to provide capital growth and income over full market cycles. The Fund invests in a broad spectrum of asset classes with tactical adjustments made by the portfolio management team in an effort to reduce risk and increase return. The portfolio may invest in all domestic and international asset classes, including but not limited to equity, debt, commodities, all categories of alternatives and real estate. The portfolio managers will look to invest in a diverse set of assets classes, typically ten different markets, sectors, and themes with a target of approximately 20 to 30 different positions, dependent on market conditions.

PRINCIPAL INVESTMENT STRATEGY

The Fund is an actively managed exchange traded fund ("ETF") and seeks to achieve its investment objective by investing primarily in alternative asset classes and securities that represent sectors, market segments or asset classes that do not represent the general investment universe. The Fund will implement this strategy primarily through investments in unaffiliated ETFs, closed-end funds ("CEFs"), business development companies ("BDCs") and real estate investment trusts ("REITs"). The market segments and sectors represented in these securities will typically have a lower correlation to the general equity and fixed income markets and whose performance and volatility is affected by factors different from those that determine the general direction of the equity and fixed income markets.

Holding Period Returns, net of fees

	1 Mo	Q4 2018	1 Yr.	Inception (09/29/2017)

DIVERSIFIED ALTERNATIVES ETF (DALT)

HOW DO ADVISORS USE DALT

- 1) In a single investment DALT offers investors diversified exposure to a broad spectrum of alternative assets.
- 2) Overall volatility is expected to mirror a blend of stocks & bonds.
- 3) DALT is designed to complement an investor's traditional asset allocation.
- 4) Investors can use DALT in tandem with existing alternative investments or as a single line item replacement for existing liquid alternatives.

ATTRIBUTES & BENEFITS¹

- 1) Daily liquidity and daily transparency.
- 2) Single investment with diversification built-in.
- 3) Single vehicle providing diversification among alternative investment strategies.
- 4) Professional and actively managed Alternatives exposure.

ABOUT REGENTS PARK FUNDS

Regents Park Funds (RPF), LLC is a privately owned registered investment adviser headquartered in Newport Beach, California. As an affiliate of the Anfield Group, RPF advises the formation and management of mutual and Exchange-Traded Funds and LPs in concert with partners seeking entry to the mutual fund, ETF and LP markets. At RPF we advise, sponsor, create, market and distribute our own family of funds as well investments offered by advisers with whom we have formed strategic alliances. RPF boasts a 9-member team with experience in fund design, management, compliance, marketing, and distribution. RPF and their partner firms are led by senior executive teams with skill sets honed at such investment firms as PIMCO, Bear Stearns, Jefferies, Morgan Stanley, and Smith Barney. RPF employs top-quality investment management and risk control systems to realize performance goals for a broad spectrum of clients, be they institutions, small businesses, or individual investors.

DISCLOSURE

Investors should carefully consider the investment objectives, risks, charges and expenses of the Anfield Capital Diversified Alternatives ETF. This and other important information about the Fund is contained in the prospectus, which can be obtained by calling 866.866.4848. The prospectus should be read carefully before investing. The Anfield Capital Diversified Alternatives ETF is distributed by Northern Lights Distributors, LLC member FINRA/SIPC. Anfield Capital Management, LLC and Northern Lights Distributors, LLC are unaffiliated.

A word about risk: There is no guarantee that any investment strategy will achieve its objectives, generate profits or avoid losses. **BDCs** (Business Development Companies) have little or no operating history and may carry risks similar to those of a private equity or venture capital fund. Their securities are not redeemable at the option of the shareholder and they may trade in the market at a discount to their net asset value. Non-traded BDCs are illiquid and it may not be possible to redeem shares or to do so without paying a substantial penalty. Publicly-traded BDCs usually trade at a discount to their net asset value because they invest in unlisted securities and have limited access to capital markets. Investing in the **commodities** markets may subject the Fund to greater volatility than investments in traditional securities. Commodity prices may be influenced by unfavorable weather, animal and plant disease, geologic and environmental factors as well as changes in government regulation such as tariffs, embargoes or burdensome production rules and restrictions. **Convertible securities** are hybrid securities that have characteristics of both fixed income and equity securities and are subject to risks associated with both fixed income and equity securities. The use of **derivative instruments** involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. Derivative prices are highly volatile and may fluctuate substantially during a short period of time. Trading derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities. Investing in **emerging markets** involves not only the risks described below with respect to investing in foreign securities, but also other risks, including exposure to economic structures that are generally less diverse and mature, and to political systems that can be expected to have less stability, than those of developed countries. **Frontier market** countries generally have smaller economies or less developed capital markets than traditional emerging markets and, as a result, the risks of investing in emerging market countries are magnified in frontier market countries. The performance of the Fund may be affected by developments in the **energy sector**, such as the possibility that government regulation will negatively impact companies in this sector. Since the Fund's investments may include ETFs with **foreign securities**, the Fund is subject to risks beyond those associated with investing in domestic securities. Foreign companies are generally not subject to the same regulatory requirements of U.S. companies thereby resulting in less publicly available information about these companies. In addition, foreign accounting, auditing and financial reporting standards generally differ from those applicable to U.S. companies. The value of the Fund's investments in **REITs** may change in response to changes in the real estate market such as declines in the value of real estate, lack of available capital or financing opportunities, and increases in property taxes or operating costs. Shareholders of the Fund will indirectly be subject to the fees and expenses of the individual REITs in which the Fund invests. The earnings and prospects of **small and medium sized companies** are more volatile than larger companies and may experience higher failure rates than larger companies. Small and medium sized companies normally have a lower trading volume than larger companies, which may tend to make their market price fall more disproportionately than larger companies in response to selling pressures and may have limited markets, product lines, or financial resources and lack management experience.

¹ There is no guarantee that any investment will achieve its objectives, generate positive returns or avoid losses.
