

Affinity World Leaders Equity ETF

SUMMARY PROSPECTUS

February 28, 2019

WLDR

a series of Two Roads Shared Trust

Before you invest, you may want to review the Fund's Prospectus, which contains more information about the Fund and its risks. The Fund's prospectus and Statement of Additional Information, both dated February 28, 2019, are incorporated by reference into this Summary Prospectus. You can obtain these documents and other information about the Fund online at <http://regentsparkfunds.com/wldr-summary-prospectus/>. You can also obtain these documents at no cost by calling 1-866-866-4848 or by sending an email request to OrderRegentsParkETF@geminifund.com. Shares of the Fund are listed and traded on the CBOE BZX Exchange (formerly, BATS Global Markets ("BATS")).

Investment Objective: The Fund seeks to provide investment results that correspond generally, before fees and expenses, to the performance of the Thomson Reuters StarMine Affinity World Leaders Index (the "TRSAWL Index" or the "Index").

Fees and Expenses of the Fund: This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. Investors purchasing or selling shares of the Fund in the secondary market may be subject to costs (including customary brokerage commissions) charged by their broker. These costs are not included in the expense example below.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.47%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses	4.19%
Total Annual Fund Operating Expenses	4.66%
Fee Waiver and Expense Reimbursement	(4.19)%
Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement ⁽¹⁾	0.47%

- (1) The Fund's adviser has contractually agreed to reduce the Fund's fees and/or absorb expenses of the Fund until at least December 31, 2020 to ensure that total annual Fund operating expenses after fee waiver and reimbursement (exclusive of any taxes, interest, brokerage commissions, expenses incurred in connection with any merger or reorganization, indirect expenses, expenses of other investment companies in which the Fund may invest, or extraordinary expenses such as litigation) will not exceed 0.47% of average daily net assets. This agreement may be terminated by the Fund's Board of Trustees on 60 days' written notice to the adviser. These fee waivers and expense reimbursements are subject to possible recoupment from the Fund in future years on a rolling three year basis (within the three years after the fees have been waived or reimbursed) if such recoupment can be achieved without exceeding the foregoing expense limits as well as any expense limitation in effect at the time the reimbursement is made.

Example: This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. You may pay brokerage commissions on the purchase or sale of Fund shares, which are not reflected in the Example. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$48	\$1,026	\$2,010	\$4,500

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. For the fiscal period ended October 31, 2018, the Fund's portfolio turnover rate was 135% of the average value of its portfolio.

Principal Investment Strategies: The Fund seeks to passively replicate the TRSAWL Index. The TRSAWL Index consists of equity securities issued and traded in the US as well as international countries. The TRSAWL Index is expected to consist of approximately 150 to 250 stocks of companies located in the U.S. and in at least three countries outside of the U.S., and may invest in up to 20 countries. The TRSAWL Index will be significantly invested in the securities of international companies in addition to securities of U.S. companies. The Fund normally invests at least 80% of its net assets (plus any borrowings for investment purposes) in equity securities included in the Fund's benchmark index. The Fund may also invest in American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs") (collectively "Depositary Receipts") based on the securities in the TRSAWL Index.

Constituents of the TRSAWL Index are characterized by strong global footprint (measured by market capitalization), rank high on measures of earnings quality, demonstrate improving fundamentals (positive earnings revisions on earnings estimates, revenue estimates, price targets, and analyst recommendations), show stock price momentum, and trade at relatively attractive valuations (based on a ranking from various trading multiples, which are, generally speaking, a ratio of the security's market price to financial or accounting metrics such as earnings, book value, etc., as well as a dividend discount model, which attempts to determine the current or future value of a security based in part on its dividend payments).

The process of constructing the TRSAWL Index begins with sorting the companies in the Thomson Reuters Global Developed Index (excluding those in Greece and South Korea) (the "Benchmark Index") by market capitalization. The next step involves selecting those companies that comprise the top 85% of cumulative market capitalization, and categorizing them into two regions: US and International. The final step involves scoring these securities on the above criteria within each region, and then narrowing this universe of companies to approximately 150 to 250 equity securities using a proprietary ranking system of the Fund's sub-adviser, Affinity Investment Advisors, LLC ("Affinity" or the "Sub-Adviser"). The proprietary ranking system is known as the "Affinity Score" and is calculated by weighting the above criteria based on the Sub-Adviser's assessment of the correlation between the score components and subsequent long-term stock performance. Stocks that rank in the top decile are candidates for purchase, while those that rank outside the top quartile are typically sold. A risk management overlay is then used to guide portfolio construction. The overlay calls for neutral business sector weights versus the Benchmark Index, approximately equal active weighting of each security within a business sector (active weight is the absolute percentage deviation of a security's weight in the portfolio from its weight in the Benchmark Index), and limiting the deviation of the TRSAWL Index's geographical distribution from that of the Benchmark Index. The TRSAWL Index is reconstituted and rebalanced on a semi-annual basis.

As of October 31, 2018, the Index was comprised of 164 issues with market capitalizations ranging from \$3.49 billion to \$808.41 billion. As of October 31, 2018, the countries in the Benchmark Index were: Austria, Australia, Canada, France, Germany, Hong Kong, Italy, Japan, Netherlands, Norway, Spain, Sweden, Switzerland, the United Kingdom and the United States.

The TRSAWL Index is co-sponsored by the Sub-Adviser to the Fund and by Thomson Reuters (Markets) LLC (the "Index Provider"), an organization that is independent of the Fund, the Adviser and the Sub-Adviser. The Sub-Adviser determines the composition and relative weightings of the securities in the TRSAWL Index and the Index Provider publishes information regarding the market value of the Index.

The Fund uses a "passive" or indexing approach to attempt to approximate the investment performance of the TRSAWL Index by investing in a portfolio of securities that generally replicates the TRSAWL Index. Unlike many investment companies, the Fund does not try to "beat" the index it tracks and does not seek temporary defensive positions when markets decline or appear overvalued. The Fund may concentrate its investments in a particular country, region, industry or group of industries to the extent that the TRSAWL Index concentrates in a country, region, industry or group of industries.

Principal Investment Risks: *As with all mutual funds, there is the risk that you could lose money through your investment in the Fund. The Fund is not intended to be a complete investment program but rather one component of a diversified investment portfolio. An investment in the Fund is not guaranteed to achieve its investment objective; is not a deposit with a bank; is not insured, endorsed or guaranteed by the Federal Deposit Insurance Corporation or any other government agency; and is subject to investment risks. The value of your investment in the Fund, as well as the amount of return you receive on your investment, may fluctuate significantly. You may lose part of all of your investment in the Fund or your investment may not perform as well as other similar investments. Many factors affect the Fund's net asset value and performance.*

As with any fund, there is no guarantee that the Fund will achieve its goal.

Authorized Participant Concentration Risk: To the extent that authorized participants are unable or otherwise unavailable to proceed with creation and/or redemption orders and no other authorized participant is able to create or redeem in their place, shares may trade at a discount to net asset value (NAV) and may face delisting.

Calculation Methodology Risk: The TRSAWL Index relies on various sources of information to assess the criteria of issuers included in the Index, including information that may be based on assumptions and estimates. Neither the Fund, the Adviser, the Sub-Adviser nor Thomson Reuters can offer assurances that the TRSAWL Index's calculation methodology or sources of information will provide an accurate assessment of included issuers or correct valuation of securities, nor can they guarantee the availability or timeliness of the production of the TRSAWL Index.

Currency Risk: The risk that foreign (non-U.S.) currencies will decline in value relative to the U.S. dollar and adversely affect the value of the Fund's investments in foreign (non-U.S.) currencies or in securities that trade in, and receive revenues in, or in derivatives that provide exposure to, foreign (non-U.S.) currencies.

Cybersecurity Risk: There is risk to the Fund of an unauthorized breach and access to fund assets, customer data (including private shareholder information), or proprietary information, or the risk of an incident occurring that causes the Fund, the investment adviser, custodian, transfer agent, distributor and other service providers and financial intermediaries to suffer data breaches, data corruption or lose operational functionality. Successful cyber-attacks or other cyber-failures or events affecting the Fund or its service providers may adversely impact the Fund or its shareholders.

Equity Risk: *Equity securities are susceptible to general market fluctuations and volatile increases and decreases in value as market confidence in and perceptions of their issuers change.*

ETF Structure Risks: The Fund is structured as an ETF and as a result is subject to the special risks, including:

- *Not Individually Redeemable:* Shares are not individually redeemable and may be redeemed by the Fund at NAV only in large blocks known as "Creation Units." You may incur brokerage costs purchasing enough shares to constitute a Creation Unit.
- *Trading Issues:* Trading in shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares inadvisable, such as extraordinary market volatility. There can be no assurance that shares will continue to meet the listing requirements of the Exchange. An active trading market for the Fund's shares may not be developed or maintained. If the Fund's shares are traded outside a collateralized settlement system, the number of financial institutions that can act as authorized participants that can post collateral on an agency basis is limited, which may limit the market for the Fund's shares.
- *Market Price Variance Risk:* The market prices of shares will fluctuate in response to changes in NAV and supply and demand for shares and will include a "bid-ask spread" charged by the exchange specialists, market makers or other participants that trade the particular security. There may be times when the market price and the NAV vary significantly. This means that shares may trade at a discount to NAV. If a shareholder purchases shares at a time when the market price is at a premium to the NAV or sells shares at a time when the market price is at a discount to NAV, the shareholder may sustain losses.
 - In times of market stress, market makers may step away from their role market making in shares of ETFs and in executing trades, which can lead to differences between the market value of Fund shares and the Fund's net asset value.
 - The market price for the Fund's shares may deviate from the Fund's net asset value, particularly during times of market stress, with the result that investors may pay significantly more or significantly less for Fund shares than the Fund's net asset value, which is reflected in the bid and ask price for Fund shares or in the closing price.
 - When all or a portion of an ETFs underlying securities trade in a market that is closed when the market for the Fund's shares is open, there may be changes from the last quote of the closed market and the quote from the Fund's domestic trading day, which could lead to differences between the market value of the Fund's shares and the Fund's net asset value.
 - In stressed market conditions, the market for the Fund's shares may become less liquid in response to the deteriorating liquidity of the Fund's portfolio. This adverse effect on the liquidity of the Fund's shares may, in turn, lead to differences between the market value of the Fund's shares and the Fund's net asset value.

Fluctuation of Net Asset Value Risk: The NAV of the Fund's shares will generally fluctuate with changes in the market value of the Fund's holdings. The market prices of the shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of and demand for the shares on the Exchange. The Adviser cannot predict whether the shares will trade below, at or above their NAV. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for the shares will be closely related to, but not identical to, the same forces influencing the prices of the Fund's holdings trading individually or in the aggregate at any point in time.

Foreign (Non-U.S.) Investment Risk: Foreign (non-U.S.) securities present greater investment risks than investing in the securities of U.S. issuers and may experience more rapid and extreme changes in value than the securities of U.S. companies, due to less information about foreign (non-U.S.) companies in the form of reports and ratings than about U.S. issuers; different accounting, auditing and financial reporting requirements; smaller markets; nationalization; expropriation or confiscatory taxation; currency blockage; or political changes or diplomatic developments, Foreign (non-U.S.) securities may also be less liquid and more difficult to value than securities of U.S. issuers.

Gap Risk: The Fund is subject to the risk that a stock price or derivative value will change dramatically from one level to another with no trading in between and/or before the Fund can exit from the investment. Usually such movements occur when there are adverse news announcements, which can cause a stock price or derivative value to drop substantially from the previous day's closing price.

Geographic and Sector Risk: The risk that if the Fund invests a significant portion of its total assets in certain issuers within the same geographic region or economic sector, an adverse economic, business or political development affecting that region or sector may affect the value of the Fund's investments more than if the Fund's investments were not so focused.

Index Tracking Error Risk: As with all index funds, the performance of the Fund and the TRSAWL Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by the TRSAWL Index. In addition, the Fund may not be fully invested in the securities of the TRSAWL Index at all times or may hold securities not included in the Index.

Industry Concentration Risk: The Fund may be susceptible to an increased risk of loss, including losses due to adverse events that affect the Fund's investment more than the market as a whole, to the extent that the Fund's investments are concentrated in securities of a particular industry, group of industries or sector.

Management Risk: The risk that investment strategies employed by the Sub-Adviser in selecting investments for the Fund may not result in an increase in the value of your investment or in overall performance equal to other similar investment vehicles having similar investment strategies. Management risk includes the risk that the quantitative model used by the Fund's investment sub-adviser may not perform as expected, particularly in volatile markets.

Market Risk: Overall equity market risk, may affect the value of individual instruments in which the Fund invests. Factors such as domestic and foreign (non-U.S.) economic growth and market conditions, real or perceived adverse economic or political conditions, inflation, changes in interest rate levels, lack of liquidity in the bond markets, volatility in the equities markets or adverse investor sentiment affect the securities markets and political events affect the securities markets. When the value of the Fund's investments goes down, your investment in the Fund decreases in value and you could lose money.

Performance: Because the Fund has only recently commenced investment operations, no performance information is presented for the Fund at this time. In the future, performance information will be presented in this section of this Prospectus. Also, shareholder reports containing financial and performance information will be mailed to shareholders semi-annually. Updated performance information will be available at no cost by visiting RegentsParkFunds.com or by calling 1-866-866-4848.

Investment Adviser: Regents Park Funds, LLC (the "Adviser")

Investment Sub-Adviser: Affinity Investment Advisors, LLC

Portfolio Managers: Gregory R. Lai, CFA, Principal of the Sub-Adviser, and Pushkar Murthy, CFA, Senior Portfolio Manager of the Sub-Adviser, have served the Fund as its portfolio managers since it commenced operations in January of 2018 and is responsible for the day to day management of the Fund.

Purchase and Sale of Fund Shares: The Fund will issue and redeem shares at NAV only in large blocks of 50,000 shares (each block of shares is called a "Creation Unit"). Creation Units are issued and redeemed for cash and/or in-kind for securities. Individual shares may only be purchased and sold in secondary market transactions through brokers. Except when aggregated in Creation Units, the shares are not redeemable securities of the Fund.

Shares of the Fund are listed for trading on the Exchange and trade at market prices rather than NAV. Shares of the Fund may trade at a price that is greater than, at, or less than NAV.

Tax Information: The Fund's distributions generally will be taxable as ordinary income, long-term capital gains or qualified dividend income, or a combination of the three. A sale of shares may result in capital gain or loss.

Payments to Broker-Dealers and Other Financial Intermediaries: If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
