

Anfield U.S. Equity Sector Rotation ETF
AESR

Anfield Tactical Fixed Income ETF
ATFI

Each a series of Two Roads Shared Trust

STATEMENT OF ADDITIONAL INFORMATION

November 17, 2019

*Listed and traded on:
Cboe BZX Exchange, Inc.*

This Statement of Additional Information ("SAI") is not a prospectus and should be read in conjunction with the prospectuses of the Anfield U.S. Equity Sector Rotation ETF ("Sector Rotation ETF") and the Anfield Tactical Fixed Income ETF ("Tactical Fixed Income ETF") (each, a "Fund" and together, the "Funds") dated November 17, 2019. Each Fund's prospectus is hereby incorporated by reference, which means it is legally part of this document. You can obtain copies of each Fund's prospectus, annual or semi-annual reports (when available) without charge by contacting the Funds' Distributor, Northern Lights Distributors, LLC, 17645 Wright Street, Ste. 200, Omaha, NE 68130-2095 or by calling 1-866-866-4848. You may also obtain a prospectus by visiting the website at RegentsParkFunds.com.

THE FUNDS

Each Fund is a series of Two Roads Shared Trust, a Delaware statutory trust organized on June 8, 2012 (the "Trust"). The Trust is registered as an open-end management investment company currently consisting of twenty-one separate, active portfolios. The Trust is governed by its Board of Trustees (the "Board" or "Trustees"). Each Fund may issue an unlimited number of shares of beneficial interest. All shares of a Fund have equal rights and privileges. Each share of a Fund is entitled to one vote on all matters as to which shares are entitled to vote. In addition, each share of a Fund is entitled to participate equally with other shares (i) in dividends and distributions declared by the Fund and (ii) on liquidation to its proportionate share of the assets remaining after satisfaction of outstanding liabilities. Shares of the Funds are fully paid, non-assessable and fully transferable when issued and have no pre-emptive, conversion or exchange rights. Fractional shares have proportionately the same rights, including voting rights, as are provided for a full share.

Each Fund is a "diversified" series of the Trust, meaning each Fund is subject to the diversification requirements of the Investment Company Act of 1940 (the "1940 Act"), which generally limit investments, as to 75% of a fund's total assets, to no more than 5% in securities in a single issuer and 10% of an issuer's voting securities.

Each Fund's investment objective, restrictions and policies are more fully described here and in each Fund's prospectus. The Board may start other series and offer shares of a new fund under the Trust at any time.

Under the Trust's Agreement and Declaration of Trust, each Trustee will continue in office until the termination of the Trust or his/her earlier death, incapacity, resignation or removal. Shareholders can remove a Trustee to the extent provided by the 1940 Act and the rules and regulations promulgated thereunder. Vacancies may be filled by a majority of the remaining Trustees, except insofar as the 1940 Act may require the election by shareholders. As a result, normally no annual or regular meetings of shareholders will be held unless matters arise requiring a vote of shareholders under the Agreement and Declaration of Trust or the 1940 Act.

Each Fund will issue and redeem Shares at net asset value ("NAV") only in aggregations of 25,000 Shares (a "Creation Unit"). Each Fund will issue and redeem Creation Units principally in exchange for an in-kind deposit of a basket of designated securities (the "Deposit Securities"), together with the deposit of a specified cash payment (the "Cash Component"), plus a transaction fee. Each Fund is expected to be approved for listing, subject to notice of issuance, on Cboe BZX Exchange, Inc. (the "Exchange"). Shares will trade on the Exchange at market prices that may be below, at, or above NAV. In the event of the liquidation of a Fund, a share split, reverse split or the like, the Trust may revise the number of Shares in a Creation Unit.

Each Fund reserves the right to offer creations and redemptions of Shares for cash. In addition, Shares may be issued in advance of receipt of Deposit Securities subject to various conditions, including a requirement to maintain on deposit with the Trust cash equal to up to 115% of the market value of the missing Deposit Securities. In each instance of such cash creations or redemptions, transaction fees, may be imposed and may be higher than the transaction fees associated with in-kind creations or redemptions. See **PURCHASE, REDEMPTION AND PRICING OF SHARES** below.

Exchange Listing and Trading

In order to provide additional information regarding the indicative value of Shares of a Fund, the Exchange or a market data vendor will disseminate every 15 seconds through the facilities of the Consolidated Tape Association or other widely disseminated means an updated "intraday indicative value" ("IIV") for each Fund as calculated by an information provider or market data vendor. The Trust is not involved in or responsible for any aspect of the calculation or dissemination of the IIV and makes no representation or warranty as to the accuracy of the IIV.

TYPES OF INVESTMENTS

The investment objective of each Fund and the description of each Fund's principal investment strategies are set forth under "Investment Objective" and Principal Investment Strategies" in each Fund's prospectus. Each Fund's investment objective is not fundamental and may be changed without the approval of a majority of the outstanding voting securities of the Trust.

The following pages contain more detailed information about the types of instruments in which the Funds may invest directly or indirectly as a principal or non-principal investment strategy. These instruments include other investment companies and strategies Regents Park Funds, LLC ("Regents Park" or the "Adviser") or Anfield Capital Management, LLC ("Anfield" or the "Sub-Adviser") employed in pursuit of each Fund's investment objective and a summary of related risks.

Securities of Other Investment Companies

Investments in exchange-traded funds (“ETFs”) and mutual funds involve certain additional expenses and certain tax results, which would not be present in a direct investment in such funds. Due to legal limitations, a Fund will be prevented from: 1) purchasing more than 3% of an investment company’s (including ETFs) outstanding shares; 2) investing more than 5% of a Fund’s assets in any single such investment company, and 3) investing more than 10% of a Fund’s assets in investment companies overall; unless: (i) the underlying investment company and/or the Fund has received an order for exemptive relief from such limitations from the Securities and Exchange Commission (“SEC”); and (ii) the underlying investment company and a Fund take appropriate steps to comply with any conditions in such order. In the alternative, each Fund may rely on Rule 12d1-3, which allows unaffiliated mutual funds to exceed the 5% limitation and the 10% limitation, provided the aggregate sales loads any investor pays (i.e., the combined distribution expenses of both the acquiring fund and the acquired fund) does not exceed the limits on sales loads established by Financial Industry Regulatory Authority (“FINRA”) for funds of funds. In addition to ETFs, the Funds may invest in other investment companies such as open-end mutual funds, exchange-traded funds, and closed-end funds within the limitations described above. Each investment company is subject to specific risks, depending on the nature of a Fund. ETFs and mutual funds may employ leverage, which magnifies the changes in the underlying stock or other index upon which they are based.

Open-End Investment Companies

Each Fund may invest in shares of open-end investment companies. Each Fund and any “affiliated persons,” as defined by the 1940 Act, may purchase in the aggregate only up to 3% of the total outstanding securities of any underlying fund unless: (i) the underlying investment company and/or a Fund has received an order for exemptive relief from such limitations from the SEC; and (ii) the underlying investment company and a Fund take appropriate steps to comply with any conditions in such order. Accordingly, when affiliated persons hold shares of any of the underlying funds, each Fund’s ability to invest fully in shares of those funds is restricted, and the Adviser or Sub-Adviser must then, in some instances, select alternative investments that would not have been its first preference. The 1940 Act also provides that an underlying fund whose shares are purchased by a Fund will be obligated to redeem shares held by the Fund only in an amount up to 1% of the underlying fund’s outstanding securities during any period of less than 30 days. Shares held by a Fund in excess of 1% of an underlying fund’s outstanding securities therefore, will be considered not readily marketable securities, which, together with other such securities, may not exceed 15% of a Fund’s total assets. Under certain circumstances an underlying fund may determine to make payment of a redemption by a Fund wholly or partly by a distribution in kind of securities from its portfolio, in lieu of cash, in conformity with the rules of the SEC. In such cases, each Fund may hold securities distributed by an underlying fund until the Adviser or Sub-Adviser determines that it is appropriate to dispose of such securities.

Investment decisions by the investment advisers of the underlying funds are made independently of each Fund and its Adviser and Sub-Adviser. Therefore, the investment adviser of one underlying fund may be purchasing shares of the same issuer whose shares are being sold by the Adviser or Sub-Adviser of a Fund. The result would be an indirect expense to a Fund without accomplishing any investment purpose.

Exchange-Traded Funds

ETFs are typically passively managed funds that track their related index and have the flexibility of trading like a security. They are managed by professionals and provide the investor with diversification, cost and tax efficiency, liquidity, marginability, are useful for hedging, have the ability to go long and short, and some provide quarterly dividends. Additionally, some ETFs are unit investment trusts (UITs) that have two markets. The primary market is where institutions swap “creation units” in block-multiples of 50,000 shares for in-kind securities and cash in the form of dividends. The secondary market is where individual investors can trade as little as a single share during trading hours on the exchange. This is different from open-ended mutual funds that are traded after hours once the NAV is calculated.

Closed-End Investment Companies

Each Fund may invest its assets in “closed-end” investment companies (or “closed-end funds”), subject to the investment restrictions set forth below. A Fund may purchase in the aggregate only up to 3% of the total outstanding voting stock of any closed-end fund. Shares of closed-end funds are typically offered to the public in a one-time initial public offering by a group of underwriters who retain a spread or underwriting commission of between 4% or 6% of the initial public offering price. Such securities are then listed for trading on the New York Stock Exchange, the American Stock Exchange, the National Association of Securities Dealers Automated Quotation System (commonly known as “NASDAQ”) and, in some cases, may be traded in other over-the-counter markets. Because the shares of closed-end funds cannot be redeemed upon demand to the issuer like the shares of an open-end investment company (such as a Fund), investors seek to buy and sell shares of closed-end funds in the secondary market.

Each Fund generally will purchase shares of closed-end funds only in the secondary market. Each Fund will incur normal brokerage costs on such purchases similar to the expenses a Fund would incur for the purchase of securities of any other type of issuer in the secondary market. Each Fund may, however, also purchase securities of a closed-end fund in an initial public offering when, in the opinion of the Adviser or Sub-Adviser, based on a consideration of the nature of the closed-end fund's proposed investments, the prevailing market conditions and the level of demand for such securities, they represent an attractive opportunity for growth of capital. The initial offering price typically will include a dealer spread, which may be higher than the applicable brokerage cost if a Fund purchased such securities in the secondary market.

The shares of many closed-end funds, after their initial public offering, frequently trade at a price per share, which is less than the net asset value per share, the difference representing the "market discount" of such shares. This market discount may be due in part to the investment objective of long-term appreciation, which is sought by many closed-end funds, as well as to the fact that the shares of closed-end funds are not redeemable by the holder upon demand to the issuer at the next determined net asset value but rather are subject to the principles of supply and demand in the secondary market. A relative lack of secondary market purchasers of closed-end fund shares also may contribute to such shares trading at a discount to their net asset value.

Each Fund may invest in shares of closed-end funds that are trading at a discount to net asset value or at a premium to net asset value. There can be no assurance that the market discount on shares of any closed-end fund purchased by a Fund will ever decrease. In fact, it is possible that this market discount may increase and a Fund may suffer realized or unrealized capital losses due to further decline in the market price of the securities of such closed-end funds, thereby adversely affecting the net asset value of a Fund's shares. Similarly, there can be no assurance that any shares of a closed-end fund purchased by a Fund at a premium will continue to trade at a premium or that the premium will not decrease subsequent to a purchase of such shares by the Fund.

Closed-end funds may issue senior securities (including preferred stock and debt obligations) for the purpose of leveraging the closed-end fund's common shares in an attempt to enhance the current return to such closed-end fund's common shareholders. Each Fund's investment in the common shares of closed-end funds that are financially leveraged may create an opportunity for greater total return on its investment, but at the same time may be expected to exhibit more volatility in market price and net asset value than an investment in shares of investment companies without a leveraged capital structure.

Business Development Companies

Business development companies ("BDCs") are regulated under the 1940 Act and are taxed as regulated investment companies ("RICs") under the Internal Revenue Code of 1986, as amended (the "Code"). BDCs typically operate as publicly traded private equity firms that invest in early stage to mature private companies and small public companies. BDCs realize operating income when their investments are sold off, and therefore maintain complex organizational, operational, tax and compliance requirements, and must distribute at least 90% of their taxable earnings as dividends. Additionally, a BDC's expenses are not direct expenses paid by Fund shareholders and are not used to calculate a Fund's net asset value.

Adviser Risks

If the Adviser to the Funds manages more money in the future, including money raised in this offering, such additional funds could affect its performance or trading strategies. Also, the Adviser manages other accounts. This increases the competition for the same trades which the Funds make. There is no assurance that a Fund's trading will generate the same results as any other accounts managed by the Adviser.

Borrowing

While the Funds does not anticipate doing so, other than for cash management, each Fund may borrow money for investment purposes. Borrowing for investment purposes is one form of leverage. Leveraging investments, by purchasing securities with borrowed money, is a speculative technique that increases investment risk, but also increases investment opportunity. Because substantially all of a Fund's assets will fluctuate in value, whereas the interest obligations on borrowings may be fixed, the NAV per share of a Fund will increase more when the Fund's portfolio assets increase in value and decrease more when the Fund's portfolio assets decrease in value than would otherwise be the case. Moreover, interest costs on borrowings may fluctuate with changing market rates of interest and may partially offset or exceed the returns on the borrowed funds. Under adverse conditions, a Fund might have to sell portfolio securities to meet interest or principal payments at a time when investment considerations would not favor such sales. Each Fund may use leverage during periods when the Adviser believes that a Fund's investment objective would be furthered.

Each Fund may also borrow money to facilitate management of the Fund's portfolio by enabling such Fund to meet redemption requests when the liquidation of portfolio instruments would be inconvenient or disadvantageous. Such borrowing is not for investment purposes and will be repaid by a Fund promptly. As required by the 1940 Act, the Funds must maintain continuous asset coverage (total assets,

including assets acquired with borrowed funds, less liabilities exclusive of borrowings) of 300% of all amounts borrowed. If, at any time, the value of a Fund's assets should fail to meet this 300% coverage test, the Fund, within three days (not including Sundays and holidays), will reduce the amount of the Fund's borrowings to the extent necessary to meet this 300% coverage requirement. Maintenance of this percentage limitation may result in the sale of portfolio securities at a time when investment considerations otherwise indicate that it would be disadvantageous to do so.

In addition to the foregoing, each Fund is authorized to borrow money as a temporary measure for extraordinary or emergency purposes in amounts not in excess of 5% of the value of the Funds' total assets. Borrowings for extraordinary or emergency purposes are not subject to the foregoing 300% asset coverage requirement.

Certificates of Deposit and Bankers' Acceptances

Certificates of deposit are receipts issued by a depository institution in exchange for the deposit of funds. The issuer agrees to pay the amount deposited plus interest to the bearer of the receipt on the date specified on the certificate. The certificate usually can be traded in the secondary market prior to maturity. Bankers' acceptances typically arise from short-term credit arrangements designed to enable businesses to obtain funds to finance commercial transactions. Generally, an acceptance is a time draft drawn on a bank by an exporter or an importer to obtain a stated amount of funds to pay for specific merchandise. The draft is then "accepted" by a bank that, in effect, unconditionally guarantees to pay the face value of the instrument on its maturity date. The acceptance may then be held by the accepting bank as an earning asset or it may be sold in the secondary market at the going rate of discount for a specific maturity. Although maturities for acceptances can be as long as 270 days, most acceptances have maturities of six months or less.

Commercial Paper

Commercial paper consists of short-term (usually from 1 to 270 days) unsecured promissory notes issued by corporations in order to finance their current operations. It may be secured by letters of credit, a surety bond or other forms of collateral. Commercial paper is usually repaid at maturity by the issuer from the proceeds of the issuance of new commercial paper. As a result, investment in commercial paper is subject to the risk the issuer cannot issue enough new commercial paper to satisfy its outstanding commercial paper, also known as rollover risk. Commercial paper may become illiquid or may suffer from reduced liquidity in certain circumstances. Like all fixed income securities, commercial paper prices are susceptible to fluctuations in interest rates. If interest rates rise, commercial paper prices will decline. The short-term nature of a commercial paper investment makes it less susceptible to interest rate risk than many other fixed income securities because interest rate risk typically increases as maturity lengths increase. Commercial paper tends to yield smaller returns than longer-term corporate debt because securities with shorter maturities typically have lower effective yields than those with longer maturities. As with all fixed income securities, there is a chance that the issuer will default on its commercial paper obligation.

Convertible Securities

Convertible securities include fixed income securities that may be exchanged or converted into a predetermined number of shares of the issuer's underlying common stock at the option of the holder during a specified period. Convertible securities may take the form of convertible preferred stock, convertible bonds or debentures, units consisting of "usable" bonds and warrants or a combination of the features of several of these securities. Convertible securities are senior to common stocks in an issuer's capital structure, but are usually subordinated to non-convertible fixed income securities. While providing a fixed-income stream (generally higher in yield than the income derivable from common stock but lower than that afforded by a similar nonconvertible security), a convertible security also gives an investor the opportunity, through its conversion feature, to participate in the capital appreciation of the issuing company depending upon a market price advance in the convertible security's underlying common stock.

Corporate Debt Securities

Corporate debt securities are typically fixed-income securities issued by businesses to finance their operations, but may also include bank loans to companies. Notes, bonds, debentures and commercial paper are the most common types of corporate debt securities. The primary differences between the different types of corporate debt securities are their maturities and secured or un-secured status. Commercial paper has the shortest term and is usually unsecured. The broad category of corporate debt securities includes debt issued by domestic or foreign companies of all kinds, including those with small-, mid- and large-capitalizations. Corporate debt may be rated investment-grade or below investment-grade and may carry variable or floating rates of interest.

Because of the wide range of types, and maturities, of corporate debt securities, as well as the range of creditworthiness of its issuers, corporate debt securities have widely varying potentials for return and risk profiles. For example, commercial paper issued by a large established domestic corporation that is rated investment-grade may have a modest return on principal, but carries relatively limited risk. On the other hand, a long-term corporate note issued by a small foreign corporation from an emerging market country that has not been rated may have the potential for relatively large returns on principal, but carries a relatively high degree of risk.

Corporate debt securities carry both credit risk and interest rate risk. Credit risk is the risk that a Fund could lose money if the issuer of a corporate debt security is unable to pay interest or repay principal when it is due. Some corporate debt securities that are rated below investment-grade are generally considered speculative because they present a greater risk of loss, including default, than higher quality debt securities. The credit risk of a particular issuer's debt security may vary based on its priority for repayment. For example, higher ranking (senior) debt securities have a higher priority than lower ranking (subordinated) securities. This means that the issuer might not make payments on subordinated securities while continuing to make payments on senior securities. In addition, in the event of bankruptcy, holders of higher-ranking senior securities may receive amounts otherwise payable to the holders of more junior securities. Interest rate risk is the risk that the value of certain corporate debt securities will tend to fall when interest rates rise. In general, corporate debt securities with longer duration tend to fall more in value when interest rates rise than corporate debt securities with shorter duration.

Cyber Security Risk

Each Fund and its service providers may be prone to operational and information security risks resulting from breaches in cyber security. A breach in cyber security refers to both intentional and unintentional events that may cause a Fund to lose proprietary information, suffer data corruption, or lose operational capacity. Breaches in cyber security include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information or various other forms of cyber-attacks. Cyber security breaches affecting a Fund or its Adviser or Sub-Adviser, custodian, transfer agent, intermediaries and other third-party service providers may adversely impact such Fund. For instance, cyber security breaches may interfere with the processing of shareholders transactions, impact a Fund's ability to calculate its NAVs, cause the release of private shareholder information or confidential business information, impede trading, subject a Fund to regulatory fines or financial losses and/or cause reputational damage. Each Fund may also incur additional costs for cyber security risk management purposes. Similar types of cyber security risks are also present for issuers of securities in which a Fund may invest, which could result in material adverse consequences for such issuers and may cause a Fund's investment in such companies to lose value.

Depository Receipts

Sponsored and unsponsored American Depositary Receipts ("ADRs"), are receipts issued by an American bank or trust company evidencing ownership of underlying securities issued by a foreign issuer. ADRs, in registered form, are designed for use in U.S. securities markets. Unsponsored ADRs may be created without the participation of the foreign issuer. Holders of these ADRs generally bear all the costs of the ADR facility, whereas foreign issuers typically bear certain costs in a sponsored ADR. The bank or trust company depository of an unsponsored ADR may be under no obligation to distribute shareholder communications received from the foreign issuer or to pass through voting rights. Many of the risks described below regarding foreign securities apply to investments in ADRs.

Global Depositary Receipts ("GDRs"), receipts issued by non-U.S. financial institutions evidencing ownership of underlying foreign or U.S. securities and are usually denominated in foreign currencies. GDRs may not be denominated in the same currency as the securities they represent. Generally, GDRs are designed for use in the foreign securities markets.

Derivative Instruments

Each Fund may purchase and write call and put options on securities, securities indices and foreign (non-U.S.) currencies, and enter into futures contracts and use options on futures contracts as further described below. Each Fund may also enter into swap agreements with respect to foreign (non-U.S.) currencies, interest rates and securities indices. Each Fund may use these techniques to hedge against changes in interest rates, foreign (non-U.S.) currency exchange rates or securities prices or to attempt to achieve investment returns as part of its overall investment strategies. Each Fund may also purchase and sell options relating to foreign (non-U.S.) currencies for purposes of increasing exposure to a foreign (non-U.S.) currency or to shift exposure to foreign (non-U.S.) currency fluctuations from one country to another. Each Fund will segregate or " earmark " assets determined to be liquid by the Adviser or Sub-Adviser in accordance with procedures established by the Board (or, as permitted by applicable regulation, enter into certain offsetting positions) to cover its obligations under options, futures, and swaps to avoid leveraging the portfolio of a Fund as described below.

Each Fund considers derivative instruments to consist of securities or other instruments whose value is derived from or related to the value of some other instrument or asset, and not to include those securities whose payment of principal and/or interest depends upon cash flows from underlying assets, such as mortgage-related or asset-backed securities. The value of some derivative instruments in which a Fund invests may be particularly sensitive to changes in prevailing interest rates, and, like the other investments of a Fund, the ability of a Fund to successfully utilize these instruments may depend in part upon the ability of the Adviser or Sub-Adviser to correctly forecast interest rates and other economic factors. If the Adviser or Sub-Adviser incorrectly forecasts such factors and has taken positions in derivative instruments contrary to prevailing market trends, a Fund could be exposed to the risk of loss. In addition, while the use of derivatives for hedging purposes can reduce losses, it can also reduce or eliminate gains, and hedges are sometimes subject to imperfect matching between the derivative and security it is hedging, which means that a hedge might not be effective. A Fund might not employ any of the strategies described above, and no assurance can be given that any strategy used will succeed. A decision as to whether, when

and how to utilize derivative instruments involves skill and judgment, and even a well-conceived derivatives strategy may be unsuccessful. The use of derivative instruments involves brokerage fees and/or other transaction costs.

Investment in futures-related and commodity-linked derivatives may subject a Fund to additional risks, and in particular may subject a Fund to greater volatility than investments in traditional securities. The value of futures-related and commodity-linked derivative instruments may be affected by changes in overall market movements, commodity index volatility, changes in interest rates or factors affecting a particular industry or commodity, such as drought, floods, weather, livestock disease, embargoes, tariffs, and international economic, political and regulatory developments. In order to qualify for the special tax treatment available to regulated investment companies under the Code, a Fund must derive at least 90% of its gross income each taxable year from certain specified types of investments. It is currently unclear which types of commodities-linked derivatives fall within these specified investment types. As a result, if a Fund's investment in commodities-linked derivatives were to exceed a certain threshold, the Fund could fail to qualify for the special tax treatment available to regulated investment companies under the Code.

Regulatory Risks of Derivative Use

In February 2012, the CFTC adopted certain regulatory changes that will subject advisers to certain registered investment companies to registration with the CFTC as a commodity pool operator ("CPO") if an investment company is unable to meet certain trading and marketing limitations. These rules became effective on January 1, 2013. In relation to these regulatory changes adopted by the CFTC, each Fund's Adviser intends to rely on an exemption from the CFTC's CPO registration requirements. However, it is possible that the Adviser may be required to register as a CPO in the future and comply with any applicable reporting, disclosure or other regulatory requirements. Compliance with CFTC regulatory requirements will increase Fund expenses. Other potentially adverse regulatory initiatives could also develop.

It is also possible that additional government regulation of various types of derivative instruments, including futures, options and swap agreements, may limit or prevent a Fund from using such instruments as a part of its investment strategy, and could ultimately prevent a Fund from being able to achieve its investment objective. It is impossible to fully predict the effects of past, present or future legislation and regulation in this area, but the effects could be substantial and adverse. It is possible that legislative and regulatory activity could limit or restrict the ability of a Fund to use certain instruments as a part of its investment strategy. Limits or restrictions applicable to the counterparties with which a Fund may engage in derivative transactions could also prevent the Fund from using certain instruments.

There is a possibility of future regulatory changes altering, perhaps to a material extent, the nature of an investment in a Fund or the ability of a Fund to continue to implement its investment strategy. The futures, options and swaps markets are subject to comprehensive statutes, regulations, and margin requirements. In addition, the SEC, CFTC and the exchanges are authorized to take extraordinary actions in the event of a market emergency, including, for example, the implementation or reduction of speculative position limits, the implementation of higher margin requirements, the establishment of daily price limits and the suspension of trading. The regulation of futures, options and swaps transactions in the U.S. is a rapidly changing area of law and is subject to modification by government and judicial action.

In 2010, the U.S. government enacted legislation that provides for new regulation of the derivatives market, including clearing, margin, reporting and registration requirements. The CFTC and certain futures exchanges have also established limits, referred to as "position limits," on the maximum net long or net short positions which any person may hold or control in particular options and futures contracts. All positions owned or controlled by the same person or entity, even if in different accounts, may be aggregated for purposes of determining whether the applicable position limits have been exceeded. Thus, even if a Fund does not intend to exceed applicable position limits, it is possible that different clients managed by the Adviser and its affiliates may be aggregated for this purpose. The trading decisions of the Adviser or Sub-Adviser may have to be modified and positions held by a Fund may have to be liquidated in order to avoid exceeding such limits. The modification of investment decisions or the elimination of open positions, if it occurs, may adversely affect the profitability of a Fund.

The SEC has in the past adopted interim rules requiring reporting of all short positions on securities above a certain *de minimis* threshold and is expected to adopt rules requiring monthly public disclosure in the future. In addition, other non-U.S. jurisdictions where a Fund may trade have adopted reporting requirements. If a Fund's securities short positions or its strategy become generally known, it could have a significant effect on the Adviser's or Sub-Adviser's ability to implement its investment strategy. In particular, it would make it more likely that other investors could cause a "short squeeze" in the securities held short by a Fund forcing such Fund to cover its positions at a loss. Such reporting requirements may also limit the Adviser's or Sub-Adviser's ability to access management and other personnel at certain companies where the Adviser or Sub-Adviser seeks to take a short position. In addition, if other investors engage in copycat behavior by taking positions in the same issuers as a Fund, the cost of borrowing securities to sell short could increase drastically and the availability of such securities to such Fund could decrease drastically. Such events could make a Fund unable to execute its investment strategy. In addition, the SEC recently proposed additional restrictions on short sales.

If the SEC were to adopt additional restrictions regarding short sales, they could restrict a Fund's ability to engage in short sales of securities in certain circumstances, and such Fund may be unable to execute its investment strategy as a result.

The SEC and regulatory authorities in other jurisdictions may adopt (and in certain cases, have adopted) bans on short sales of certain securities in response to market events. Bans on short selling may make it impossible for a Fund to execute certain investment strategies and may have a material adverse effect on such Fund's ability to generate returns.

Equity Securities

Equity securities include common stocks, preferred stocks and securities convertible into common stocks, such as convertible bonds, warrants, rights and options. The value of equity securities varies in response to many factors, including the activities and financial condition of individual companies, the business market in which individual companies compete and general market and economic conditions. Equity securities fluctuate in value, often based on factors unrelated to the value of the issuer of the securities, and such fluctuations can be significant.

Common Stock

Common stock represents an equity (ownership) interest in a company, and usually possesses voting rights and earns dividends. Dividends on common stock are not fixed but are declared at the discretion of the issuer. Common stock generally represents the riskiest investment in a company. In addition, common stock generally has the greatest appreciation and depreciation potential because increases and decreases in earnings are usually reflected in a company's stock price.

Preferred Stock

Preferred stock is a class of stock having a preference over common stock as to the payment of dividends and the recovery of investment should a company be liquidated, although preferred stock is usually junior to the debt securities of the issuer. Preferred stock typically does not possess voting rights and its market value may change based on changes in interest rates.

The fundamental risk of investing in common and preferred stock is the risk that the value of the stock might decrease. Stock values fluctuate in response to the activities of an individual company or in response to general market and/or economic conditions. Historically, common stocks have provided greater long-term returns and have entailed greater short-term risks than preferred stocks, fixed-income securities and money market investments. The market value of all securities, including common and preferred stocks, is based upon the market's perception of value and not necessarily the book value of an issuer or other objective measures of a company's worth.

Foreign Investments - General

To the extent consistent with its investment objective and strategies, a Fund may invest in foreign securities, including bonds and other fixed-income securities of foreign issuers. Foreign fixed-income securities may include eurodollar convertible securities, which are fixed-income securities that are issued in U.S. dollars outside the United States and are convertible into or exchangeable for equity securities of the same or a different issuer.

Investment in foreign securities involves special risks. These include market risk, interest rate risk and the risks of investing in securities of foreign issuers and of companies whose securities are principally traded outside the United States on foreign exchanges or foreign over-the-counter markets and in investments denominated in foreign currencies. Market risk involves the possibility that security prices will decline over short or even extended periods. The markets tend to be cyclical, with periods of generally rising prices and periods of generally declining prices. These cycles will affect the value of a Fund to the extent that it invests in foreign securities. The holdings of a Fund, to the extent that they invest in fixed-income securities, will be sensitive to changes in interest rates and the interest rate environment. Generally, the prices of bonds and debt securities fluctuate inversely with interest rate changes. In addition, the performance of investments in securities denominated in a foreign currency will depend on the strength of the foreign currency against the U.S. dollar and the interest rate environment in the country issuing the currency. Absent other events which could otherwise affect the value of a foreign security (such as a change in the political climate or an issuer's credit quality), appreciation in the value of the foreign currency generally can be expected to increase the value of a foreign currency-denominated security in terms of U.S. dollars. A rise in foreign interest rates or decline in the value of the foreign currency relative to the U.S. dollar generally can be expected to depress the value of a foreign currency-denominated security.

There are other risks and costs involved in investing in foreign securities which are in addition to the usual risks inherent in domestic investments. Investment in foreign securities involves higher costs than investment in U.S. securities, including higher transaction and custody costs as well as the imposition of additional taxes by foreign governments. Foreign investments also involve risks associated with the level of currency exchange rates, less complete financial information about the issuers, less market liquidity, more market volatility and political instability. Future political and economic developments, the possible imposition of withholding taxes on dividend

income, the possible seizure or nationalization of foreign holdings, the possible establishment of exchange controls, or the adoption of other governmental restrictions might adversely affect an investment in foreign securities. Additionally, foreign banks and foreign branches of domestic banks are subject to less stringent reserve requirements, and to different accounting, auditing and recordkeeping requirements. Also, the legal remedies for investors may be more limited than the remedies available in the United States. Additionally, many countries throughout the world are dependent on a healthy U.S. economy and are adversely affected when the U.S. economy weakens or its markets decline. For example, the decline in the U.S. subprime mortgage market quickly spread throughout global credit markets, triggering a liquidity crisis that affected fixed-income and equity markets around the world.

To the extent consistent with its investment objectives and strategies, a Fund may invest in foreign debt, including the securities of foreign governments. Several risks exist concerning such investments, including the risk that foreign governments may default on their obligations, may not respect the integrity of such debt, may attempt to renegotiate the debt at a lower rate, and may not honor investments by U.S. entities or citizens.

Although a Fund may invest in securities denominated in foreign currencies, its portfolio securities and other assets are valued in U.S. dollars. Currency exchange rates may fluctuate significantly over short periods of time causing, together with other factors, a Fund's NAV to fluctuate as well. Currency exchange rates can be affected unpredictably by the intervention or the failure to intervene by U.S. or foreign governments or central banks, or by currency controls or political developments in the United States or abroad. To the extent that a Fund's total assets, adjusted to reflect such Fund's net position after giving effect to currency transactions, are denominated in the currencies of foreign countries, a Fund will be more susceptible to the risk of adverse economic and political developments within those countries.

Dividends and interest payable on a Fund's foreign portfolio securities may be subject to foreign withholding taxes. To the extent such taxes are not offset by credits or deductions allowed to investors under U.S. federal income tax law, they may reduce the net return to the shareholders

A Fund's income and, in some cases, capital gains from foreign stocks and securities will be subject to applicable taxation in certain of the countries in which they invest, and treaties between the United States and such countries may not be available in some cases to reduce the otherwise applicable tax rates.

A Fund also is subject to the possible imposition of exchange control regulations or freezes on the convertibility of currency. In addition, through the use of forward currency exchange contracts with other instruments, the respective net currency positions of a Fund may expose it to risks independent of its securities positions. Although the net long and short foreign currency exposure of a Fund will not exceed its respective total asset values, to the extent that a Fund is fully invested in foreign securities while also maintaining currency positions, it may be exposed to greater risk than it would have if it did not maintain the currency positions. Foreign markets also have different clearance and settlement procedures, and in certain markets there have been times when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct such transactions. Such delays in settlement could result in temporary periods when a portion of the assets of a Fund remain uninvested and no return is earned on such assets. The inability of an underlying fund to make intended security purchases or sales due to settlement problems could result in missed attractive investment opportunities, losses to the underlying fund due to subsequent declines in value of the portfolio securities or, if the underlying fund has entered into a contract to sell the securities, possible liability to the purchaser. Losses can also result from lost, stolen or counterfeit securities; defaults by brokers and banks; failures or defects of the settlement system; or poor and improper record keeping by registrars and issuers.

Share blocking refers to a practice in certain foreign markets under which an issuer's securities are blocked from trading at the custodian or sub-custodian level for a specified number of days before and, in certain instances, after a shareholder meeting where a vote of shareholders takes place. The blocking period can last up to several weeks. Share blocking may prevent the underlying funds from buying or selling securities during this period, because during the time shares are blocked, trades in such securities will not settle. It may be difficult or impossible to lift blocking restrictions, with the particular requirements varying widely by country.

Foreign Investments—Emerging and Frontier Markets

A Fund may also invest in countries with emerging economies or securities markets. Emerging and frontier market countries are generally located in the Asia and Pacific regions, the Middle East, Eastern Europe, Central America, South America and Africa. Political and economic structures in many of these countries may be undergoing significant evolution and rapid development, and these countries may lack the social, political and economic stability characteristics of more developed countries.

In general, the securities markets of emerging countries are less liquid, subject to greater price volatility, and have a smaller market capitalization than the U.S. securities markets. In certain countries, there may be fewer publicly traded securities and the market may be dominated by a few issues or sectors. Issuers and securities markets in such countries are not subject to as extensive and frequent accounting, financial and other reporting requirements or as comprehensive government regulations as are issuers and securities markets in the United States. In particular, the assets and profits appearing on the financial statements of emerging country issuers may not reflect their financial position or results of operations in the same manner as financial statements for U.S. issuers. Substantially less information may be publicly available about emerging country issuers than is available about issuers in the United States.

Emerging country securities markets are typically marked by a high concentration of market capitalization and trading volume in a small number of issuers representing a limited number of industries, as well as a high concentration of ownership of such securities by a limited number of investors. The markets for securities in certain emerging countries are in the earliest stages of their development. Even the markets for relatively widely traded securities in emerging countries may not be able to absorb, without price disruptions, a significant increase in trading volume or trades of a size customarily undertaken by institutional investors in the securities markets of developed countries. The limited size of many of these securities markets can cause prices to be erratic for reasons apart from factors that affect the soundness and competitiveness of the securities issuers. For example, prices may be unduly influenced by traders who control large positions in these markets. Additionally, market making and arbitrage activities are generally less extensive in such markets, which may contribute to increased volatility and reduced liquidity of such markets. The limited liquidity of emerging country securities may also affect a Fund's ability to accurately value its portfolio securities or to acquire or dispose of securities at the price and time it wishes to do so or in order to meet redemption requests.

Certain emerging market countries may have antiquated legal systems, which may adversely impact a Fund. For example, while the potential liability of a shareholder in a U.S. corporation with respect to acts of the corporation is generally limited to the amount of the shareholder's investment, the notion of limited liability is less clear in certain emerging market countries. Similarly, the rights of investors in emerging market companies may be more limited than those of shareholders in U.S. corporations. In addition, the systems of corporate governance to which issuers in certain emerging countries are subject may be less advanced than the systems to which issuers located in more developed countries are subject, and therefore, shareholders of such issuers may not receive many of the protections available to shareholders of issuers located in more developed countries.

Illiquid and Restricted Securities

Pursuant to Rule 22e-4 under the 1940 Act, each of the Funds may invest up to 15% of its net assets in illiquid investments. An illiquid investment is an investment that a Fund reasonably expects cannot be sold or disposed of in current market conditions within 7 calendar days or less without the sale or disposition significantly changing the market value of the investment. Illiquid investments include securities that are illiquid by virtue of the absence of a readily available market (*e.g.*, because trading in the security is suspended or because market makers do not exist or will not entertain bids or offers) or legal or contractual restrictions on resale (*e.g.*, because they have not been registered under the Securities Act). Illiquid investments include: repurchase agreements and time deposits with a notice or demand period of more than seven days; interest rate; currency, mortgage and credit default swaps; interest rate caps; floors and collars; municipal leases; certain restricted securities, such as those purchased in a private placement of securities, unless it is determined, based upon a review of the trading markets for a specific restricted security, that such restricted security is liquid; and certain over-the-counter options. Securities that have legal or contractual restrictions on resale but have a readily available market are not considered illiquid for purposes of this limitation. With respect to each Fund, repurchase agreements subject to demand are deemed to have a maturity equal to the notice period. Foreign (non-U.S.) securities that are freely tradable in their principal markets are not considered to be illiquid.

Mutual funds do not typically hold a significant amount of restricted or other illiquid investments because of the potential for delays on resale and uncertainty in valuation. Limitations on resale may have an adverse effect on the marketability of portfolio securities and a mutual fund might be unable to dispose of restricted or other illiquid investments promptly or at reasonable prices and might thereby experience difficulty in satisfying redemptions within seven days. A mutual fund might also have to register such restricted securities in order to dispose of them resulting in additional expense and delay. Adverse market conditions could impede such a public offering of securities. To the extent an investment held by a Fund is deemed to be an illiquid investment or a less liquid investment, the Fund will be exposed to a greater liquidity risk. Restricted and other illiquid investments may be subject to the potential for delays on resale and uncertainty in valuation. A Fund might be unable to dispose of illiquid investments promptly or at reasonable prices and might thereby experience difficulty in satisfying redemption requests from shareholders. A Fund might have to register restricted securities in order to dispose of them, resulting in additional expense and delay. Adverse market conditions could impede such a public offering of securities.

A large institutional market exists for certain securities that are not registered under the Securities Act, including foreign (non-U.S.) securities. The fact that there are contractual or legal restrictions on resale to the general public or to certain institutions may not be indicative of the liquidity of such investments. Rule 144A under the Securities Act allows such a broader institutional trading market for securities otherwise subject to restrictions on resale to the general public. Rule 144A establishes a "safe harbor" from the registration requirements of the Securities Act for resale of certain securities to qualified institutional buyers. Rule 144A has produced enhanced liquidity for many restricted securities, and market liquidity for such securities may continue to expand as a result of this regulation and the consequent existence of the PORTAL system, which is an automated system for the trading, clearance and settlement of unregistered securities of domestic and foreign (non-U.S.) issuers sponsored by the Financial Industry Regulatory, Inc.

Under guidelines adopted by the Trust's Board, each Fund's Adviser may determine that particular Rule 144A securities, and commercial paper issued in reliance on the private placement exemption from registration afforded by Section 4(a)(2) of the Securities Act, are liquid even though they are not registered. A determination of whether such a security is liquid or not is a question of fact. In making this determination, the Adviser or Sub-Adviser will consider, as it deems appropriate under the circumstances and among other factors:

(1) the frequency of trades and quotes for the security; (2) the number of dealers willing to purchase or sell the security; (3) the number of other potential purchasers of the security; (4) dealer undertakings to make a market in the security; (5) the nature of the security (e.g., debt or equity, date of maturity, terms of dividend or interest payments, and other material terms) and the nature of the marketplace trades (e.g., the time needed to dispose of the security, the method of soliciting offers, and the mechanics of transfer); and (6) the rating of the security and the financial condition and prospects of the issuer. In the case of commercial paper, the Adviser or Sub-Adviser will also determine that the paper (1) is not traded flat or in default as to principal and interest, and (2) is rated in one of the two highest rating categories by at least two National Statistical Rating Organizations ("NRSROs") or, if only one NRSRO rates the security, by that NRSRO, or, if the security is unrated, the Adviser or Sub-Adviser determines that it is of equivalent quality.

Rule 144A securities and Section 4(a)(2) commercial paper that have been deemed liquid as described above will continue to be monitored by the Adviser or Sub-Adviser to determine if the security is no longer liquid as the result of changed conditions. Investing in Rule 144A securities or Section 4(a)(2) commercial paper could have the effect of increasing the amount of a Fund's assets invested in illiquid securities if institutional buyers are unwilling to purchase such securities.

The Trust has implemented a liquidity risk management program and related procedures to identify illiquid investments pursuant to Rule 22e-4. If the limitation on illiquid investments is exceeded, other than by a change in market values, the condition will be reported to the Board and, when required, to the SEC.

Insured Bank Obligations

A Fund may invest in insured bank obligations. The Federal Deposit Insurance Corporation ("FDIC") insures the deposits of federally insured banks and savings and loan associations (collectively referred to as "banks"), currently up to \$250,000. A Fund may purchase bank obligations, which are fully insured as to principal by the FDIC. Currently, to remain fully insured as to principal, these investments must be limited to \$250,000 per bank; if the principal amount and accrued interest together exceed \$250,000, the excess principal and accrued interest will not be insured. Insured bank obligations may have limited marketability.

Lending Portfolio Securities

For the purpose of achieving income, each Fund may lend its portfolio securities, provided (1) the loan is secured continuously by collateral consisting of U.S. Government securities or cash or cash equivalents (cash, U.S. Government securities, negotiable certificates of deposit, bankers' acceptances or letters of credit) maintained on a daily mark-to-market basis in an amount at least equal to the current market value of the securities loaned, (2) a Fund may at any time call the loan and obtain the return of securities loaned, (3) a Fund will receive any interest or dividends received on the loaned securities, and (4) the aggregate value of the securities loaned will not at any time exceed one-third of the total assets of a Fund.

As with other extensions of credit, there are risks that collateral could be inadequate in the event of the borrower failing financially, which could result in actual financial loss, and risks that recovery of loaned securities could be delayed, which could result in interference with portfolio management decisions or exercise of ownership rights. Each Fund will be responsible for the risks associated with the investment of cash collateral, including the risk that such Fund may lose money on the investment or may fail to earn sufficient income to meet its obligations to the borrower. In addition, a Fund may lose its right to vote its shares of the loaned securities at a shareholders meeting if the Adviser or Sub-Adviser does not recall or does not timely recall the loaned securities, or if the borrower fails to return the recalled securities in advance of the record date for the meeting.

Securities lending involves counterparty risk, including the risk that the loaned securities may not be returned or returned in a timely manner and/or a loss of rights in the collateral if the borrower or the lending agent defaults or fails financially. This risk is increased when a Fund's loans are concentrated with a single or limited number of borrowers. There are no limits on the number of borrowers to which a Fund may lend securities and a Fund may lend securities to only one or a small group of borrowers.

Regulation as a Commodity Pool Operator

The Trust, on behalf of each Fund, will file with the National Futures Association, a notice claiming an exclusion from the definition of the term "commodity pool operator" under the Commodity Exchange Act, as amended, and the rules of the Commodity Futures Trading Commission promulgated thereunder, with respect to each Fund's operation. Accordingly, neither Fund will be subject to registration or regulation as a commodity pool operator.

Real Estate Investment Trusts

A Fund may invest in securities of real estate investment trusts ("REITs"). REITs are publicly traded corporations or trusts that specialize in acquiring, holding and managing residential, commercial or industrial real estate. A REIT is not taxed at the entity level on income

distributed to its shareholders or unitholders if it distributes to shareholders or unitholders at least 95% of its taxable income for each taxable year and complies with regulatory requirements relating to its organization, ownership, assets and income.

REITs generally can be classified as "Equity REITs", "Mortgage REITs" and "Hybrid REITs." An Equity REIT invests the majority of its assets directly in real property and derives its income primarily from rents and from capital gains on real estate appreciation, which are realized through property sales. A Mortgage REIT invests the majority of its assets in real estate mortgage loans and services its income primarily from interest payments. A Hybrid REIT combines the characteristics of an Equity REIT and a Mortgage REIT. Although a Fund can invest in all three kinds of REITs, its emphasis is expected to be on investments in Equity REITs.

Investments in the real estate industry involve particular risks. The real estate industry has been subject to substantial fluctuations and declines on a local, regional and national basis in the past and may continue to be in the future. Real property values and income from real property may decline due to general and local economic conditions, overbuilding and increased competition, increases in property taxes and operating expenses, changes in zoning laws, casualty or condemnation losses, regulatory limitations on rents, changes in neighborhoods and in demographics, increases in market interest rates, or other factors. Factors such as these may adversely affect companies that own and operate real estate directly, companies that lend to such companies, and companies that service the real estate industry.

Investments in REITs also involve risks. Equity REITs will be affected by changes in the values of and income from the properties they own, while Mortgage REITs may be affected by the credit quality of the mortgage loans they hold. In addition, REITs are dependent on specialized management skills and on their ability to generate cash flow for operating purposes and to make distributions to shareholders or unitholders. REITs may have limited diversification and are subject to risks associated with obtaining financing for real property, as well as to the risk of self-liquidation. REITs also can be adversely affected by their failure to qualify for tax-free pass-through treatment of their income under the Code, or their failure to maintain an exemption from registration under the 1940 Act. By investing in REITs indirectly through a Fund, a shareholder bears not only a proportionate share of the expenses of a Fund, but also may indirectly bear similar expenses of some of the REITs in which it invests.

Repurchase Agreements

A Fund may enter into repurchase agreements. In a repurchase agreement, an investor (such as a Fund) purchases a security (known as the "underlying security") from a securities dealer or bank. Any such dealer or bank must be deemed creditworthy by the Adviser or Sub-Adviser. At that time, the bank or securities dealer agrees to repurchase the underlying security at a mutually agreed upon price on a designated future date. The repurchase price may be higher than the purchase price, the difference being income to a Fund, or the purchase and repurchase prices may be the same, with interest at an agreed upon rate due to such Fund on repurchase. In either case, the income to a Fund generally will be unrelated to the interest rate on the underlying securities. Repurchase agreements must be "fully collateralized," in that the market value of the underlying securities (including accrued interest) must at all times be equal to or greater than the repurchase price. Therefore, a repurchase agreement can be considered a loan collateralized by the underlying securities.

Repurchase agreements are generally for a short period of time, often less than a week, and will generally be used by a Fund to invest excess cash or as part of a temporary defensive strategy. Repurchase agreements that do not provide for payment within seven days will be treated as illiquid securities. In the event of a bankruptcy or other default by the seller of a repurchase agreement, a Fund could experience both delays in liquidating the underlying security and losses. These losses could result from: (a) possible decline in the value of the underlying security while a Fund is seeking to enforce its rights under the repurchase agreement; (b) possible reduced levels of income or lack of access to income during this period; and (c) expenses of enforcing its rights.

Securities Options

A Fund may purchase and write (*i.e.*, sell) put and call options. Such options may relate to particular securities or stock indices, and may or may not be listed on a domestic or foreign securities exchange and may or may not be issued by the Options Clearing Corporation. Options trading is a highly specialized activity that entails greater than ordinary investment risk. Options may be more volatile than the underlying instruments, and therefore, on a percentage basis, an investment in options may be subject to greater fluctuation than an investment in the underlying instruments themselves.

A call option for a particular security gives the purchaser of the option the right to buy, and the writer (seller) the obligation to sell, the underlying security at the stated exercise price at any time prior to the expiration of the option, regardless of the market price of the security. The premium paid to the writer is in consideration for undertaking the obligation under the option contract. A put option for a particular security gives the purchaser the right to sell the security at the stated exercise price at any time prior to the expiration date of the option, regardless of the market price of the security.

Stock index options are put options and call options on various stock indices. In most respects, they are identical to listed options on common stocks. The primary difference between stock options and index options occurs when index options are exercised. In the case

of stock options, the underlying security, common stock, is delivered. However, upon the exercise of an index option, settlement does not occur by delivery of the securities comprising the index. The option holder who exercises the index option receives an amount of cash if the closing level of the stock index upon which the option is based is greater than, in the case of a call, or less than, in the case of a put, the exercise price of the option. This amount of cash is equal to the difference between the closing price of the stock index and the exercise price of the option expressed in dollars times a specified multiple. A stock index fluctuates with changes in the market value of the stocks included in the index. For example, some stock index options are based on a broad market index, such as the Standard & Poor's 500® Index or the Value Line Composite Index or a narrower market index, such as the Standard & Poor's 100®. Indices may also be based on an industry or market segment, such as the NYSE AMEX Oil and Gas Index or the Computer and Business Equipment Index. Options on stock indices are currently traded on the Chicago Board Options Exchange, the New York Stock Exchange, the American Stock Exchange, the Pacific Stock Exchange, the Philadelphia Stock Exchange, and the NASDAQ PHLX.

A Fund's obligation to sell an instrument subject to a call option written by it, or to purchase an instrument subject to a put option written by it, may be terminated prior to the expiration date of the option by a Fund's execution of a closing purchase transaction, which is effected by purchasing on an exchange an option of the same series (*i.e.*, same underlying instrument, exercise price and expiration date) as the option previously written. A closing purchase transaction will ordinarily be effected to realize a profit on an outstanding option, to prevent an underlying instrument from being called, to permit the sale of the underlying instrument or to permit the writing of a new option containing different terms on such underlying instrument. The cost of such a liquidation purchase plus transactions costs may be greater than the premium received upon the original option, in which event a Fund will have incurred a loss in the transaction. There is no assurance that a liquid secondary market will exist for any particular option. An option writer unable to effect a closing purchase transaction will not be able to sell the underlying instrument or liquidate the assets held in a segregated account, as described below, until the option expires or the optioned instrument is delivered upon exercise. In such circumstances, the writer will be subject to the risk of market decline or appreciation in the instrument during such period.

If an option purchased by a Fund expires unexercised, such Fund realizes a loss equal to the premium paid. If a Fund enters into a closing sale transaction on an option purchased by it, such Fund will realize a gain if the premium received by the Fund on the closing transaction is more than the premium paid to purchase the option, or a loss if it is less. If an option written by a Fund expires on the stipulated expiration date or if a Fund enters into a closing purchase transaction, it will realize a gain (or loss if the cost of a closing purchase transaction exceeds the net premium received when the option is sold). If an option written by a Fund is exercised, the proceeds of the sale will be increased by the net premium originally received and such Fund will realize a gain or loss.

Certain Risks Regarding Options

There are several risks associated with transactions in options. For example, there are significant differences between the securities and options markets that could result in an imperfect correlation between these markets, causing a given transaction not to achieve its objectives. In addition, a liquid secondary market for particular options, whether traded over-the-counter or on an exchange, may be absent for reasons which include the following: there may be insufficient trading interest in certain options; restrictions may be imposed by an exchange on opening transactions or closing transactions or both; trading halts, suspensions or other restrictions may be imposed with respect to particular classes or series of options or underlying securities or currencies; unusual or unforeseen circumstances may interrupt normal operations on an exchange; the facilities of an exchange or the Options Clearing Corporation may not at all times be adequate to handle current trading value; or one or more exchanges could, for economic or other reasons, decide or be compelled at some future date to discontinue the trading of options (or a particular class or series of options), in which event the secondary market on that exchange (or in that class or series of options) would cease to exist, although outstanding options that had been issued by the Options Clearing Corporation as a result of trades on that exchange would continue to be exercisable in accordance with their terms.

Successful use by a Fund of options on stock indices will be subject to the ability of the Adviser or Sub-Adviser to correctly predict movements in the directions of the stock market. This requires different skills and techniques than predicting changes in the prices of individual securities. In addition, a Fund's ability to effectively hedge all or a portion of the securities in its portfolio, in anticipation of or during a market decline, through transactions in put options on stock indices, depends on the degree to which price movements in the underlying index correlate with the price movements of the securities held by a Fund. Inasmuch as a Fund's securities will not duplicate the components of an index, the correlation will not be perfect. Consequently, a Fund bears the risk that the prices of its securities being hedged will not move in the same amount as the prices of its put options on the stock indices. It is also possible that there may be a negative correlation between the index and a Fund's securities that would result in a loss on both such securities and the options on stock indices acquired by a Fund.

The hours of trading for options may not conform to the hours during which the underlying securities are traded. To the extent that the options markets close before the markets for the underlying securities, significant price and rate movements can take place in the underlying markets that cannot be reflected in the options markets. The purchase of options is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. The purchase of stock index options involves the risk that the premium and transaction costs paid by a Fund in

purchasing an option will be lost as a result of unanticipated movements in prices of the securities comprising the stock index on which the option is based.

There is no assurance that a liquid secondary market on an options exchange will exist for any particular option, or at any particular time, and for some options no secondary market on an exchange or elsewhere may exist. If a Fund is unable to close out a call option on securities that it has written before the option is exercised, such Fund may be required to purchase the optioned securities in order to satisfy its obligation under the option to deliver such securities. If a Fund is unable to effect a closing sale transaction with respect to options on securities that it has purchased, it would have to exercise the option in order to realize any profit and would incur transaction costs upon the purchase and sale of the underlying securities.

Cover for Options Positions

Transactions using options (other than options that a Fund has purchased) expose such Fund to an obligation to another party. A Fund will not enter into any such transactions unless it owns either (i) an offsetting ("covered") position in securities or other options or (ii) cash or liquid securities with a value sufficient at all times to cover its potential obligations not covered as provided in (i) above. Each Fund will comply with SEC guidelines regarding cover for these instruments and, if the guidelines so require, set aside cash or liquid securities in a segregated account with a Fund's custodian in the prescribed amount. Under current SEC guidelines, a Fund will segregate assets to cover transactions in which the Fund writes or sells options.

Assets used as cover or held in a segregated account cannot be sold while the position in the corresponding option is open, unless they are replaced with similar assets. As a result, the commitment of a large portion of a Fund's assets to cover or segregated accounts could impede portfolio management or such Fund's ability to meet redemption requests or other current obligations.

Dealer Options

A Fund may engage in transactions involving dealer options as well as exchange-traded options. Certain additional risks are specific to dealer options. While a Fund might look to a clearing corporation to exercise exchange-traded options, if such Fund were to purchase a dealer option it would need to rely on the dealer from which it purchased the option to perform if the option were exercised. Failure by the dealer to do so would result in the loss of the premium paid by a Fund as well as loss of the expected benefit of the transaction.

Exchange-traded options generally have a continuous liquid market while dealer options may not. Consequently, a Fund may generally be able to realize the value of a dealer option it has purchased only by exercising or reselling the option to the dealer who issued it. Similarly, when a Fund writes a dealer option, it may generally be able to close out the option prior to its expiration only by entering into a closing purchase transaction with the dealer to whom a Fund originally wrote the option. While a Fund will seek to enter into dealer options only with dealers who will agree to and which are expected to be capable of entering into closing transactions with such Fund, there can be no assurance that the Fund will at any time be able to liquidate a dealer option at a favorable price at any time prior to expiration. Unless a Fund, as a covered dealer call option writer, is able to effect a closing purchase transaction, it will not be able to liquidate securities (or other assets) used as cover until the option expires or is exercised. In the event of insolvency of the other party, a Fund may be unable to liquidate a dealer option. With respect to options written by a Fund, the inability to enter into a closing transaction may result in material losses to such Fund. For example, because a Fund must maintain a secured position with respect to any call option on a security it writes, the Fund may not sell the assets, which it has segregated to secure the position while it is obligated under the option. This requirement may impair a Fund's ability to sell portfolio securities at a time when such sale might be advantageous.

The Staff of the SEC has taken the position that purchased dealer options are illiquid securities. A Fund may treat the cover used for written dealer options as liquid if the dealer agrees that such Fund may repurchase the dealer option it has written for a maximum price to be calculated by a predetermined formula. In such cases, the dealer option would be considered illiquid only to the extent the maximum purchase price under the formula exceeds the intrinsic value of the option. Accordingly, a Fund will treat dealer options as subject to such Fund's limitation on illiquid securities. If the SEC changes its position on the liquidity of dealer options, a Fund will change its treatment of such instruments accordingly.

Options on Futures Contracts

A Fund may purchase and sell options on the same types of futures in which it may invest. Options on futures are similar to options on underlying instruments except that options on futures give the purchaser the right, in return for the premium paid, to assume a position in a futures contract (a long position if the option is a call and a short position if the option is a put), rather than to purchase or sell the futures contract, at a specified exercise price at any time during the period of the option. Upon exercise of the option, the delivery of the futures position by the writer of the option to the holder of the option will be

accompanied by the delivery of the accumulated balance in the writer's futures margin account which represents the amount by which the market price of the futures contract, at exercise, exceeds (in the case of a call) or is less than (in the case of a put) the exercise price of the option on the futures contract. Purchasers of options who fail to exercise their options prior to the exercise date suffer a loss of the premium paid.

Spread Transactions

A Fund may purchase covered spread options from securities dealers. These covered spread options are not presently exchange-listed or exchange-traded. The purchase of a spread option gives a Fund the right to put securities that it owns at a fixed dollar spread or fixed yield spread in relationship to another security that such Fund does not own, but which is used as a benchmark. The risk to a Fund, in addition to the risks of dealer options described above, is the cost of the premium paid as well as any transaction costs. The purchase of spread options will be used to protect a Fund against adverse changes in prevailing credit quality spreads, *i.e.*, the yield spread between high quality and lower quality securities. This protection is provided only during the life of the spread options.

Short Sales

A Fund may sell securities short as an outright investment strategy and to offset potential declines in long positions in similar securities. A short sale is a transaction in which a Fund sells a security it does not own or have the right to acquire (or that it owns but does not wish to deliver) in anticipation that the market price of that security will decline.

When a Fund makes a short sale, the broker-dealer through which the short sale is made must borrow the security sold short and deliver it to the party purchasing the security. A Fund is required to make a margin deposit in connection with such short sales; a Fund may have to pay a fee to borrow particular securities and will often be obligated to pay over any dividends and accrued interest on borrowed securities.

If the price of the security sold short increases between the time of the short sale and the time a Fund covers its short position, such Fund will incur a loss; conversely, if the price declines, the Fund will realize a capital gain. Any gain will be decreased, and any loss increased, by the transaction costs described above. The successful use of short selling may be adversely affected by imperfect correlation between movements in the price of the security sold short and the securities being hedged.

To the extent a Fund sells securities short, it will provide collateral to the broker-dealer and (except in the case of short sales "against the box") will maintain additional asset coverage in the form of cash, U.S. government securities or other liquid securities with its custodian in a segregated account in an amount at least equal to the difference between the current market value of the securities sold short and any amounts required to be deposited as collateral with the selling broker. A short sale is "against the box" to the extent a Fund contemporaneously owns, or has the right to obtain at no added cost, securities identical to those sold short.

Technology Risk

The Adviser or Sub-Adviser uses various technologies in managing the Funds, consistent with each Fund's investment objective and strategy described in each Fund's prospectus. For example, proprietary and third-party data and systems are utilized to support decision making for the Funds. Data imprecision, software or other technology malfunctions, programming inaccuracies and similar circumstances may impair the performance of these systems, which may negatively impact a Fund.

Temporary Defensive Position

In anticipation of or in response to adverse market, economic, political or other conditions, each Fund may take temporary defensive positions (up to 100% of its assets) in cash, cash equivalents and short term U.S. government securities. If a Fund were to take a temporary defensive position, its opportunity to achieve upside return may be limited; however, the ability to be fully defensive is an integral part of achieving each Fund's investment objective.

Time Deposits and Variable Rate Notes

A Fund may invest in fixed time deposits, whether or not subject to withdrawal penalties. The commercial paper obligations which a Fund may buy are unsecured and may include variable rate notes. The nature and terms of a variable rate note (*i.e.*, a "Master Note") permit a Fund to invest fluctuating amounts at varying rates of interest pursuant to a direct arrangement between such Fund as lender, and the issuer, as borrower. It permits daily changes in the amounts borrowed. A Fund has the right at any time to increase, up to the full amount stated in the note agreement, or to decrease the amount outstanding under the note. The issuer may prepay at any time and without penalty any part of or the full amount of the note. The note may or may not be backed by one or more bank letters of credit. Because these notes are direct lending arrangements between a Fund and the issuer, it is not generally contemplated that they will be traded; moreover, there is currently no secondary market for them. Except as specifically provided in a Fund's prospectus, there is no

limitation on the type of issuer from whom these notes may be purchased; however, in connection with such purchase and on an ongoing basis, the Adviser or Sub-Adviser will consider the earning power, cash flow and other liquidity ratios of the issuer, and its ability to pay principal and interest on demand, including a situation in which all holders of such notes made demand simultaneously. Variable rate notes are subject to a Fund's investment restriction on illiquid securities unless such notes can be put back to the issuer on demand within seven days.

Trading in Futures Contracts

A futures contract provides for the future sale by one party and purchase by another party of a specified amount of a specific financial instrument (e.g., units of a stock index) for a specified price, date, time and place designated at the time the contract is made. Brokerage fees are paid when a futures contract is bought or sold and margin deposits must be maintained. Entering into a contract to buy is commonly referred to as buying or purchasing a contract or holding a long position. Entering into a contract to sell is commonly referred to as selling a contract or holding a short position.

Unlike when a Fund purchases or sells a security, no price would be paid or received by such Fund upon the purchase or sale of a futures contract. Upon entering into a futures contract, and to maintain a Fund's open positions in futures contracts, a Fund would be required to deposit with its custodian or futures broker in a segregated account in the name of the futures broker an amount of cash, U.S. government securities, suitable money market instruments, or other liquid securities, known as "initial margin." The margin required for a particular futures contract is set by the exchange on which the contract is traded, and may be significantly modified from time to time by the exchange during the term of the contract. Futures contracts are customarily purchased and sold on margins that may range upward from less than 5% of the value of the contract being traded.

If the price of an open futures contract changes (by increase in underlying instrument or index in the case of a sale or by decrease in the case of a purchase) so that the loss on the futures contract reaches a point at which the margin on deposit does not satisfy margin requirements, the broker will require an increase in the margin. However, if the value of a position increases because of favorable price changes in the futures contract so that the margin deposit exceeds the required margin, the broker will pay the excess to a Fund.

These subsequent payments, called "variation margin," to and from the futures broker, are made on a daily basis as the price of the underlying assets fluctuate making the long and short positions in the futures contract more or less valuable, a process known as "marking to the market." A Fund expect to earn interest income on margin deposits.

Although certain futures contracts, by their terms, require actual future delivery of and payment for the underlying instruments, in practice most futures contracts are usually closed out before the delivery date. Closing out an open futures contract purchase or sale is effected by entering into an offsetting futures contract sale or purchase, respectively, for the same aggregate amount of the identical underlying instrument or index and the same delivery date. If the offsetting purchase price is less than the original sale price, a Fund realizes a gain; if it is more, such Fund realizes a loss. Conversely, if the offsetting sale price is more than the original purchase price, a Fund realizes a gain; if it is less, such Fund realizes a loss. The transaction costs must also be included in these calculations. There can be no assurance, however, that a Fund will be able to enter into an offsetting transaction with respect to a particular futures contract at a particular time. If a Fund is not able to enter into an offsetting transaction, such Fund will continue to be required to maintain the margin deposits on the futures contract.

For example, one contract in the Financial Times Stock Exchange 100 Index future is a contract to buy 25 pounds sterling multiplied by the level of the UK Financial Times 100 Share Index on a given future date. Settlement of a stock index futures contract may or may not be in the underlying instrument or index. If not in the underlying instrument or index, then settlement will be made in cash, equivalent over time to the difference between the contract price and the actual price of the underlying asset at the time the stock index futures contract expires.

United States Government Agency

A Fund may invest in securities issued by United States Government Agencies. These consist of fixed income securities issued by agencies and instrumentalities of the United States Government, including the various types of instruments currently outstanding or which may be offered in the future. Agencies include, among others, the Federal Housing Administration, Government National Mortgage Association ("GNMA"), Export-Import Bank of the United States, Maritime Administration, and General Services Administration. Instrumentalities include, for example, each of the Federal Home Loan Banks, the National Bank for Cooperatives, the Federal Home Loan Mortgage Corporation ("FHLMC"), the Farm Credit Banks, the Federal National Mortgage Association ("FNMA"), and the United States Postal Service. These securities are either: (i) backed by the full faith and credit of the United States government (e.g., United States Treasury Bills); (ii) guaranteed by the United States Treasury (e.g., GNMA mortgage-backed securities); (iii) supported by the issuing agency's or instrumentality's right to borrow from the United States Treasury (e.g., FNMA Discount Notes); or (iv) supported only by the issuing agency's or instrumentality's own credit (e.g., Tennessee Valley Association).

Mortgage-backed securities issued by the Federal National Mortgage Association (“Fannie Mae”) include Fannie Mae Guaranteed Mortgage Pass-Through Certificates, which are solely the obligations of Fannie Mae and are not backed by or entitled to the full faith and credit of the United States, except as described below, but are supported by the right of the issuer to borrow from the U.S. Treasury. Fannie Mae is a stockholder-owned corporation chartered under an Act of the U.S. Congress. Fannie Mae certificates are guaranteed as to timely payment of the principal and interest by Fannie Mae. Mortgage-related securities issued by the Federal Home Loan Mortgage Corporation (“Freddie Mac”) include Freddie Mac Mortgage Participation Certificates. Freddie Mac is a corporate instrumentality of the United States, created pursuant to an Act of Congress. Freddie Mac certificates are not guaranteed by the United States or by any Federal Home Loan Banks and do not constitute a debt or obligation of the United States or of any Federal Home Loan Bank. Freddie Mac certificates entitle the holder to timely payment of interest, which is guaranteed by Freddie Mac. Freddie Mac guarantees either ultimate collection or timely payment of all principal payments on the underlying mortgage loans. When Freddie Mac does not guarantee timely payment of principal, Freddie Mac may remit the amount due on account of its guarantee of ultimate payment of principal after default.

From time to time, proposals have been introduced before Congress for the purpose of restricting or eliminating federal sponsorship of Fannie Mae and Freddie Mac. The Trust cannot predict what legislation, if any, may be proposed in the future in Congress with regard to such sponsorship or which proposals, if any, might be enacted. Such proposals, if enacted, might materially and adversely affect the availability of government guaranteed mortgage-backed securities and a Fund’s liquidity and value.

There is risk that the U.S. government will not provide financial support to its agencies, authorities, instrumentalities or sponsored enterprises. A Fund may purchase U.S. government securities that are not backed by the full faith and credit of the United States, such as those issued by Fannie Mae and Freddie Mac. The maximum potential liability of the issuers of some U.S. government securities held by a Fund may greatly exceed their current resources, including their legal right to support from the U.S. Treasury. It is possible that these issuers will not have the funds to meet their payment obligations in the future.

The volatility and disruption that impacted the capital and credit markets during late 2008 and into 2009 have led to increased market concerns about Freddie Mac’s and Fannie Mae’s ability to withstand future credit losses associated with securities held in their investment portfolios, and on which they provide guarantees, without the direct support of the federal government. On September 7, 2008, both Freddie Mac and Fannie Mae were placed under the conservatorship of the Federal Housing Finance Agency (“FHFA”).

Under the plan of conservatorship, the FHFA has assumed control of, and generally has the power to direct, the operations of Freddie Mac and Fannie Mae, and is empowered to exercise all powers collectively held by their respective shareholders, directors and officers, including the power to: (1) take over the assets of and operate Freddie Mac and Fannie Mae with all the powers of the shareholders, the directors, and the officers of Freddie Mac and Fannie Mae and conduct all business of Freddie Mac and Fannie Mae; (2) collect all obligations and money due to Freddie Mac and Fannie Mae; (3) perform all functions of Freddie Mac and Fannie Mae which are consistent with the conservator’s appointment; (4) preserve and conserve the assets and property of Freddie Mac and Fannie Mae; and (5) contract for assistance in fulfilling any function, activity, action or duty of the conservator. In addition, in connection with the actions taken by the FHFA, the U.S. Treasury Department (the “Treasury”) entered into certain preferred stock purchase agreements with each of Freddie Mac and Fannie Mae which established the Treasury as the holder of a new class of senior preferred stock in each of Freddie Mac and Fannie Mae, which stock was issued in connection with financial contributions from the Treasury to Freddie Mac and Fannie Mae.

The conditions attached to the financial contribution made by the Treasury to Freddie Mac and Fannie Mae and the issuance of this senior preferred stock placed significant restrictions on the activities of Freddie Mac and Fannie Mae. Freddie Mac and Fannie Mae must obtain the consent of the Treasury to, among other things: (i) make any payment to purchase or redeem its capital stock or pay any dividend other than in respect of the senior preferred stock issued to the Treasury, (ii) issue capital stock of any kind, (iii) terminate the conservatorship of the FHFA except in connection with a receivership, or (iv) increase its debt beyond certain specified levels. In addition, significant restrictions were placed on the maximum size of each of Freddie Mac’s and Fannie Mae’s respective portfolios of mortgages and mortgage-backed securities, and the purchase agreements entered into by Freddie Mac and Fannie Mae provide that the maximum size of their portfolios of these assets must decrease by a specified percentage each year. The future status and role of Freddie Mac and Fannie Mae could be impacted by (among other things): the actions taken and restrictions placed on Freddie Mac and Fannie Mae by the FHFA in its role as conservator; the restrictions placed on Freddie Mac’s and Fannie Mae’s operations and activities as a result of the senior preferred stock investment made by the Treasury; market responses to developments at Freddie Mac and Fannie Mae; and future legislative and regulatory action that alters the operations, ownership, structure and/or mission of these institutions, each of which may, in turn, impact the value of, and cash flows on, any mortgage-backed securities guaranteed by Freddie Mac and Fannie Mae, including any such mortgage-backed securities held by a Fund.

As a result of the economic recession that commenced in the United States in 2008, there is a heightened risk that the receivables and loans underlying the asset-backed securities purchased by a Fund may suffer greater levels of default than was historically experienced.

United States Government Obligations

These consist of various types of marketable securities issued by the United States Treasury, i.e., bills, notes and bonds. Such securities are direct obligations of the United States government and differ mainly in the length of their maturity. Treasury bills, the most frequently issued marketable government security, have a maturity of up to one year and are issued on a discount basis.

Receipts

Interests in separately traded interest and principal component parts of U.S. government obligations that are issued by banks or brokerage firms and are created by depositing U.S. government obligations into a special account at a custodian bank. The custodian holds the interest and principal payments for the benefit of the registered owners of the certificates or receipts. The custodian arranges for the issuance of the certificates or receipts evidencing ownership and maintains the register. Treasury Receipts ("TRs") and Separately Traded Registered Interest and Principal Securities ("STRIPS") are interests in accounts sponsored by the U.S. Treasury. Receipts are sold as zero coupon securities.

U.S. Government Zero Coupon Securities

STRIPS and receipts are sold as zero coupon securities, that is, fixed income securities that have been stripped of their unmaturing interest coupons. Zero coupon securities are sold at a (usually substantial) discount and redeemed at face value at their maturity date without interim cash payments of interest or principal. The amount of this discount is accreted over the life of the security, and the accretion constitutes the income earned on the security for both accounting and tax purposes. Because of these features, the market prices of zero coupon securities are generally more volatile than the market prices of securities that have similar maturity but that pay interest periodically. Zero coupon securities are likely to respond to a greater degree to interest rate changes than are non-zero coupon securities with similar maturity and credit qualities.

U.S. Treasury Obligations

U.S. Treasury obligations consist of bills, notes and bonds issued by the U.S. Treasury and separately traded interest and principal component parts of such obligations that are transferable through the federal book-entry system known as STRIPS and TRs.

Warrants

Warrants are options to purchase common stock at a specific price (usually at a premium above the market value of the optioned common stock at issuance) valid for a specific period of time. Warrants may have a life ranging from less than one year to twenty years, or they may be perpetual. However, most warrants have expiration dates after which they are worthless. In addition, a warrant is worthless if the market price of the common stock does not exceed the warrant's exercise price during the life of the warrant. Warrants have no voting rights, pay no dividends, and have no rights with respect to the assets of the corporation issuing them. The percentage increase or decrease in the market price of the warrant may tend to be greater than the percentage increase or decrease in the market price of the optioned common stock.

When-Issued, Forward Commitments and Delayed Settlements

A Fund may purchase and sell securities on a when-issued, forward commitment or delayed settlement basis. In this event, the Custodian (as defined under the section entitled "Custodian") will segregate liquid assets equal to the amount of the commitment in a separate account. Normally, the Custodian will set aside portfolio securities to satisfy a purchase commitment. In such a case, a Fund may be required subsequently to segregate additional assets in order to assure that the value of the account remains equal to the amount of a Fund's commitment. It may be expected that a Fund's net assets will fluctuate to a greater degree when it sets aside portfolio securities to cover such purchase commitments than when it sets aside cash.

A Fund does not intend to engage in these transactions for speculative purposes but only in furtherance of its investment objectives. Because a Fund will segregate liquid assets to satisfy purchase commitments in the manner described, such Fund's liquidity and the ability of the Adviser or Sub-Adviser to manage them may be affected in the event such Fund's forward commitments, commitments to purchase when-issued securities and delayed settlements ever exceeded 15% of the value of its net assets.

A Fund will purchase securities on a when-issued, forward commitment or delayed settlement basis only with the intention of completing the transaction. If deemed advisable as a matter of investment strategy, however, a Fund may dispose of or renegotiate a commitment after it is entered into, and may sell securities it has committed to purchase before those securities are delivered to such Fund on the settlement date. In these cases a Fund may realize a taxable capital gain or loss. When a Fund engages in when-issued, forward commitment and delayed settlement transactions, it relies on the other party to consummate the trade. Failure of such party to do so may result in a Fund incurring a loss or missing an opportunity to obtain a price credited to be advantageous.

The market value of the securities underlying a when-issued purchase, forward commitment to purchase securities, or a delayed settlement and any subsequent fluctuations in their market value is taken into account when determining the market value of a Fund starting on the day such Fund agrees to purchase the securities. A Fund does not earn interest on the securities it has committed to purchase until it has paid for and delivered on the settlement date.

INVESTMENT RESTRICTIONS

Each Fund has adopted the following investment restrictions that may not be changed without approval by a "majority of the outstanding shares" of each Fund, which, as used in this SAI, means the vote of the lesser of (a) 67% or more of the shares of a Fund represented at a meeting, if the holders of more than 50% of the outstanding shares of a Fund are present or represented by proxy, or (b) more than 50% of the outstanding shares of a Fund. Each Fund may not:

1. Issue senior securities, except as otherwise permitted under the 1940 Act, and the rules and regulations promulgated thereunder;
2. Borrow money, except (a) from a bank, provided that immediately after such borrowing there is an asset coverage of 300% for all borrowings of a Fund; or (b) from a bank or other persons for temporary purposes only, provided that such temporary borrowings are in an amount not exceeding 5% of a Fund's total assets at the time when the borrowing is made. This limitation does not preclude a Fund from entering into reverse repurchase transactions, provided that a Fund has an asset coverage of 300% for all borrowings and repurchase commitments of the Fund pursuant to reverse repurchase transactions;
3. Purchase securities on margin, participate on a joint or joint and several basis in any securities trading account, or underwrite securities. (Does not preclude a Fund from obtaining such short-term credit as may be necessary for the clearance of purchases and sales of its portfolio securities, and except to the extent that the Fund may be deemed an underwriter under the Securities Act, by virtue of disposing of portfolio securities);
4. Purchase or sell real estate or interests in real estate. This limitation is not applicable to investments in marketable securities that are secured by or represent interests in real estate. This limitation does not preclude a Fund from investing in mortgage-related securities or investing in companies engaged in the real estate business or that have a significant portion of their assets in real estate (including real estate investment trusts);
5. Concentrate its investments in a particular industry, as that term is used in the 1940 Act;
6. Purchase or sell commodities (unless acquired as a result of ownership of securities or other investments) or commodity futures contracts, except that a Fund may purchase and sell futures contracts and options to the full extent permitted under the 1940 Act, sell foreign currency contracts in accordance with any rules of the Commodity Futures Trading Commission, invest in securities or other instruments backed by commodities, and invest in companies that are engaged in a commodities business or have a significant portion of their assets in commodities; or
7. Make loans to others, except that a Fund may, in accordance with its investment objective and policies, (i) lend portfolio securities, (ii) purchase and hold debt securities or other debt instruments, including but not limited to loan participations and sub-participations, assignments, and structured securities, (iii) make loans secured by mortgages on real property, (iv) enter into repurchase agreements, (v) enter into transactions where each loan is represented by a note executed by the borrower, and (vi) make time deposits with financial institutions and invest in instruments issued by financial institutions. For purposes of this limitation, the term "loans" shall not include the purchase of a portion of an issue of publicly distributed bonds, debentures or other securities.

If a restriction on a Fund's investments is adhered to at the time an investment is made, a subsequent change in the percentage of Fund assets invested in certain securities or other instruments of a Fund's investment portfolio, resulting from changes in the value of a Fund's total assets, will not be considered a violation of the restriction; provided, however, that the asset coverage requirement applicable to borrowings shall be maintained in the manner contemplated by applicable law.

With respect to fundamental investment limitation 2 above, if a Fund's asset coverage falls below 300%, the Fund will reduce borrowing within 3 days in order to ensure that the Fund has 300% asset coverage.

With respect to the fundamental policy relating to concentration set forth in (5) above, the 1940 Act does not define what constitutes "concentration" in an industry. The SEC staff has taken the position that investment of 25% or more of a fund's total assets in one or more issuers conducting their principal activities in the same industry or group of industries constitutes concentration. It is possible that interpretations of concentration could change in the future. The policy in (5) above will be interpreted to refer to concentration as that term may be interpreted from time to time. The policy also will be interpreted to permit investment without limit

in the following: securities of the U.S. government and its agencies or instrumentalities; securities of state, territory, possession or municipal governments and their authorities, agencies, instrumentalities or political subdivisions; and repurchase agreements collateralized by any such obligations. Accordingly, issuers of the foregoing securities will not be considered to be members of any industry. There also will be no limit on investment in issuers domiciled in a single jurisdiction or country. Finance companies will be considered to be in the industries of their parents if their activities are primarily related to financing the activities of the parents. Each foreign government will be considered to be a member of a separate industry. With respect to the Fund's industry classifications, the Funds currently utilize any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Fund management. A Fund's investment adviser may analyze the characteristics of a particular issuer and security and assign an industry classification consistent with those characteristics in the event that either a third-party classification provider used by the investment adviser or another Fund service provider does not assign a classification or assigns a classification inconsistent with that believed appropriate by the investment adviser based on its analysis of the economic characteristics of the issuer. With respect to the fundamental policy relating to concentration set forth in (5) above, if a Fund invests in one or more investment companies that concentrates its investments in a particular industry, the Fund will examine its other investment company holdings to ensure that the Fund is not indirectly concentrating its investments in a particular industry.

POLICIES AND PROCEDURES FOR DISCLOSURE OF PORTFOLIO HOLDINGS

The Trust has adopted policies and procedures that govern the disclosure of each Fund's portfolio holdings. These policies and procedures are designed to ensure that such disclosure is in the best interests of each Fund's shareholders.

It is the Trust's policy to: (1) ensure that any disclosure of portfolio holdings information is in the best interest of Trust shareholders; (2) protect the confidentiality of portfolio holdings information; (3) have procedures in place to guard against personal trading based on the information; and (4) ensure that the disclosure of portfolio holdings information does not create conflicts between the interests of the Trust's shareholders and those of the Trust's affiliates.

Each Fund's portfolio holdings are, or will be, disclosed on the Funds' website at RegentsParkFunds.com each day each Fund is open for business. Each Fund's portfolio holdings information will also generally be provided for dissemination through the facilities of the National Securities Clearing Corporation ("NSCC") and/or other fee-based subscription services to NSCC members and/or subscribers to those other fee-based subscription services, including Authorized Participants (as defined below), and to entities that publish and/or analyze such information in connection with the process of purchasing or redeeming Creation Units or trading shares of the Funds in the secondary market. This information typically reflects each Fund's anticipated holdings as of the next Business Day.

Each Fund discloses its portfolio holdings by mailing its annual and semi-annual reports to shareholders approximately two months after the end of the fiscal year and semi-annual period. Each Fund also discloses its portfolio holdings reports on Form N-CSR and Form N-Q two months after the end of each quarter/semi-annual period.

Each Fund may choose to make portfolio holdings available to rating agencies such as Lipper, Morningstar or Bloomberg earlier and more frequently on a confidential basis.

Under limited circumstances, as described below, each Fund's portfolio holdings may be disclosed to, or known by, certain third parties in advance of their filing with the SEC on Form N-CSR or Form N-Q. In each case, a determination has been made that such advance disclosure is supported by a legitimate business purpose and that the recipient is subject to a duty to keep the information confidential.

• **The Adviser and Sub-Adviser.** Personnel of the Adviser and Sub-Adviser, including personnel responsible for managing each Fund's portfolio, may have full daily access to portfolio holdings since that information is necessary in order for the Adviser and Sub-Adviser to provide its management, administrative, and investment services to each Fund. As required for purposes of analyzing the impact of existing and future market changes on the prices, availability, demand and liquidity of such securities, as well as for the assistance of the portfolio managers in the trading of such securities, Adviser and Sub-Adviser personnel may also release and discuss certain portfolio holdings with various broker-dealers.

• **Gemini Fund Services, LLC** is the fund accountant, administrator and custody administrator for each Fund; therefore, its personnel have full daily access to each Fund's portfolio holdings since that information is necessary in order for them to provide the agreed-upon services for the Trust.

• **Brown Brothers Harriman & Co. ("BBH")** is custodian and transfer agent for each Fund; therefore, its personnel have full daily access to each Fund's portfolio holdings since that information is necessary in order for them to provide the agreed-upon services for the Trust.

• **RSM US LLP** is each Fund’s independent registered public accounting firm; therefore, its personnel have access to each Fund’s portfolio holdings in connection with auditing of each Fund’s annual financial statements and providing other audit, tax and related services for each Fund.

• **Drinker Biddle & Reath LLP** is counsel to each Fund; therefore, its personnel have access to each Fund’s portfolio holdings in connection with review of each Fund’s annual and semi-annual shareholder reports and SEC filings.

Additions to List of Approved Recipients. The Trust’s Chief Compliance Officer is the person responsible, and whose prior approval is required, for any disclosure of each Fund’s portfolio securities at any time or to any persons other than those described above. In such cases, the recipient must have a legitimate business need for the information and must be subject to a duty to keep the information confidential. There are no ongoing arrangements in place with respect to the disclosure of portfolio holdings. In no event shall a Fund, the Adviser, the Sub-Adviser or any other party receive any direct or indirect compensation in connection with the disclosure of information about a Fund’s portfolio holdings.

Compliance With Portfolio Holdings Disclosure Procedures. The Trust’s Chief Compliance Officer will report periodically to the Board with respect to compliance with a Fund’s portfolio holdings disclosure procedures, and from time to time will provide the Board any updates to the portfolio holdings disclosure policies and procedures.

There is no assurance that the Trust’s policies on disclosure of portfolio holdings will protect a Fund from the potential misuse of holdings information by individuals or firms in possession of that information.

MANAGEMENT

The business of the Trust is managed under the direction of the Board in accordance with the Agreement and Declaration of Trust and the Trust’s By-laws (collectively, the “Governing Documents”), which have been filed with the SEC and are available upon request. The Board consists of four individuals, all of whom are not “interested persons” (as defined under the 1940 Act) of the Trust and the Adviser (“Independent Trustees”). Pursuant to the Governing Documents of the Trust, the Trustees shall elect officers including, but not limited to, a President, a Secretary, a Treasurer, and a Chief Compliance Officer. The Board retains the power to conduct, operate and carry on the business of the Trust and has the power to incur and pay any expenses, which, in the opinion of the Board, are necessary or incidental to carry out any of the Trust’s purposes. The Trustees, officers, employees and agents of the Trust, when acting in such capacities, shall not be subject to any personal liability except for his or her own bad faith, willful misfeasance, gross negligence or reckless disregard of his or her duties.

Board Leadership Structure. The Board is led by Mark Gersten, who has served as the Chairman of the Board since the Trust was first registered with the SEC in 2012. Under the Trust’s Agreement and Declaration of Trust and By-Laws, the Chairman of the Board is responsible for (a) presiding at Board meetings, (b) calling special meetings on an as-needed basis, and (c) execution and administration of Trust policies, including (i) setting the agendas for Board meetings and (ii) providing information to Board members in advance of each Board meeting and between Board meetings. Generally, the Trust believes it best to have a non-executive Chairman of the Board, who together with the President (principal executive officer), are seen by our shareholders, business partners and other stakeholders as providing strong leadership. The Trust believes that its Chairman, the independent chair of the Audit Committee, and, as an entity, the full Board of Trustees, provide effective leadership that is in the best interests of the Trust, each Fund and each shareholder.

Board Risk Oversight. The Board of Trustees is comprised entirely of Independent Trustees and has established an Audit Committee with a separate chair. The Board is responsible for overseeing risk management, and the full Board regularly engages in discussions of risk management and receives compliance reports that inform its oversight of risk management from its Chief Compliance Officer at quarterly meetings and on an ad hoc basis, when and if necessary. The Audit Committee considers financial and reporting the risk within its area of responsibilities. Generally, the Board believes that its oversight of material risks is adequately maintained through the compliance-reporting chain where the Chief Compliance Officer is the primary recipient and communicator of such risk-related information.

Trustee Qualifications. Generally, each Fund believe that each Trustee is competent to serve because of their individual overall merits including: (i) experience, (ii) qualifications, (iii) attributes and (iv) skills. Mark Garbin has over 30 years of experience in corporate balance sheet and income statement risk management for large asset managers. Mr. Garbin has extensive derivatives experience and has provided consulting services to alternative asset managers. Mr. Garbin holds both a Chartered Financial Analyst (“CFA”) and Professional Risk Manager (“PRM”) designation and has earned advanced degrees in international business, negotiation and derivatives. Mark Gersten has over 35 years of business experience in the investment management business with a focus on mutual funds and alternative funds. He serves as a member of other mutual fund boards outside of the Fund Complex and possesses a strong understanding of the regulatory framework under which investment companies must operate based on his service to this board and extensive experience administering mutual funds. Mr. Gersten is a certified public accountant and holds an MBA in accounting. Neil Kaufman has over 30 years of experience as a corporate and securities attorney and possesses a deep understanding of the securities industry in general and

financial statements in particular. Mr. Kaufman has previously served as the Chairman of a NASDAQ-listed technology company and the Chairman of the Banking & Securities Law committee of the Nassau County Bar Association. Anita Krug has 9 years of experience as an attorney advising investment advisory firms, particularly those managing hedge funds. She also has extensive experience as a law professor whose scholarship focuses on investment advisers, hedge funds and mutual funds. The Funds do not believe any one factor is determinative in assessing a Trustee’s qualifications, but that the collective experience of each Trustee makes them well qualified.

Trustees and Officers. The Trustees and officers of the Trust, together with information as to their principal business occupations during the past five years and other information, are shown below. Unless otherwise noted, the address of each Trustee and Officer is 17645 Wright Street, Suite 200, Omaha, Nebraska 68130.

Independent Trustees *

** As of the date of this SAI, the Trust was comprised of 21 active portfolios managed by seven unaffiliated investment advisers and two affiliated investment advisers. The term “Fund Complex” applies only to those funds that are (i) advised by a common investment adviser or by an investment adviser that is an affiliated person of the investment adviser of any of the other funds of the Trust or (ii) hold themselves out to investors as related companies for purposes of investment and investor services. The Funds do not hold themselves out as related to any other series within the Trust, except for the Anfield Universal Fixed Income Fund, which is advised by Anfield, the Anfield Universal Fixed Income ETF and the Anfield Capital Diversified Alternatives ETF, which are advised by the Funds’ Adviser and sub-advised by Anfield and the Affinity World Leaders Equity ETF, which is advised by the Adviser.

Audit Committee. The Board has an Audit Committee that consists of all of the Trustees, none of whom is an “interested person” of the Trust within the meaning of the 1940 Act. The Audit Committee’s responsibilities include, among other things: (i) the selection, retention or termination of the Trust’s independent auditors and approval of audit and non-audit services to be provided by the independent auditors; (ii) reviewing with the independent auditors the scope, performance and anticipated cost of their audit; (iii) discussing with the independent auditors certain matters relating to the Trust’s financial statements, including any adjustment to such financial statements recommended by such independent auditors, or any other results of any audit; (iv) reviewing on a periodic basis a formal written statement from the independent auditors with respect to their independence, discussing with the independent auditors any relationships or services disclosed in the statement that may impact the objectivity and independence of the Trust’s independent auditors and recommending that the Board take appropriate action in response thereto to satisfy itself of the auditor’s independence; and (v) considering the comments of the independent auditors and management’s responses thereto with respect to the quality and adequacy of the Trust’s accounting and financial reporting policies and practices and internal controls. The Audit Committee operates pursuant to an Audit Committee Charter. During the fiscal year ended July 31, 2019, the Audit Committee held eight meetings.

Compensation of Directors. Effective January 1, 2019, the Trust pays each Independent Trustee a fee of \$50,000 per annum, as well as reimbursements for any reasonable expenses incurred attending the meetings, to be paid at the end of each calendar quarter. In addition, the Chairman of the Board receives an additional annual fee of \$12,500 and the Chairman of the Audit Committee receives an additional annual fee of \$10,000. The Trust also pays each Independent Trustee a fee of \$1,000 for each Board meeting (and/or Committee meeting held in connection with such a Board meeting) other than a regularly scheduled meeting (a “Special Meeting”), except that the Audit Committee will permit up to four Special Meetings a year without any additional fees.

Effective April 1, 2018, the Trust paid each Independent Trustee a fee of \$47,500 per annum, as well as reimbursements for any reasonable expenses incurred attending the meetings, to be paid at the end of each calendar quarter. In addition, the Chairman of the

Board received an additional annual fee of \$10,000 and the Chairman of the Audit Committee received an additional annual fee of \$7,500. The Trust also paid each Independent Trustee a fee of \$1,000 for Special Meeting, except that the Audit Committee will permit up to four Special Meetings a year without any additional fees.

Effective January 1, 2018, the Trust paid each Independent Trustee a fee of \$42,500 per annum, as well as reimbursements for any reasonable expenses incurred attending the meetings, to be paid at the end of each calendar quarter. In addition, the Chairman of the Board received an additional annual fee of \$12,500, the Chairman of the Audit Committee received an additional annual fee of \$10,000, the Chairman of the Valuation Committee received an additional annual fee of \$5,000 and the Chairman of the Corporate Governance Committee received an additional annual fee of \$5,000. The Trust also paid each Independent Trustee a fee of \$1,000 for each Board meeting (and/or Committee meeting held in connection with such a Board meeting) other than a regularly scheduled meeting (a “Special Meeting”), except that the Audit Committee will permit up to four Special Meetings a year without any additional fees.

No “interested persons” who serves as a Trustee of the Trust will receive any compensation for their services as Trustee. None of the executive officers receive compensation from the Trust. The Trust does not have a bonus, profit sharing, deferred compensation, pension or retirement plan.

The table below details the amount of compensation the Trustees received from the Funds during the year ended July 31, 2019*. The Trust does not have a bonus, profit sharing, deferred compensation, pension or retirement plan.

Name and Position	Aggregate Compensation From Anfield U.S. Equity Sector Rotation ETF	Aggregate Compensation From Anfield Tactical Fixed Income ETF	Total Compensation From Fund Complex Paid to Trustees**
Mark Garbin	\$0	\$0	\$5,623
Mark Gersten	\$0	\$0	\$6,073
Neil Kaufman	\$0	\$0	\$5,398
Anita Krug	\$0	\$0	\$5,173

* The Trust is comprised of multiple series with differing fiscal year ends. Each Fund in the Fund Complex, as defined below, may also have differing fiscal year ends. The compensation paid to the Board of Trustees is determined on a calendar quarter basis.

** As of the date of this SAI, the Trust was comprised of 21 active portfolios managed by seven unaffiliated investment advisers and two affiliated investment advisers. The term “Fund Complex” refers only to the Funds and to the Affinity World Leaders Equity ETF, the Anfield Capital Diversified Alternative ETF, the Anfield Universal Fixed Income ETF, and the Anfield Universal Fixed Income Fund, and not to any other series of the Trust. For the year ended March 31, 2019, the aggregate Independent Trustees’ fees paid by the entire Trust were \$218,125. Trustees’ fees are allocated equally to each series in the Trust.

Trustees’ Ownership of Shares in the Funds. As of December 31, 2018 the Trustees beneficially owned the following amounts in each Fund and the Two Roads Shared Trust.

Name of Trustee	Dollar Range of Equity Securities in the Anfield U.S. Equity Sector Rotation ETF	Dollar Range of Equity Securities in the Anfield Tactical Fixed Income ETF	Aggregate Dollar Range of Equity Securities in All Registered Investment Companies Overseen by Trustee in Family of Investment Companies
Mark Garbin	None	None	None
Mark Gersten	None	None	\$50,001-\$100,000

Neil Kaufman	None	None	None
Anita Krug	None	None	None

Management Ownership

Because there were no shares of the Funds outstanding as of the date of this SAI, the Trustees and officers, as a group, owned 0% of each Fund's outstanding shares. As of July 31, 2019, the Trustees and officers, as a group, owned less than 1% of the Fund Complex's outstanding shares.

CONTROL PERSONS AND PRINCIPAL HOLDERS

A principal shareholder is any person who owns (either of record or beneficially) 5% or more of the outstanding shares of a fund. A control person is one who owns, either directly or indirectly more than 25% of the voting securities of a company or acknowledges the existence of control. A control person is one who owns beneficially or through controlled companies more than 25% of the voting securities of a company or acknowledged the existence of control.

As of the date of this SAI, no shareholder(s) of record owned 5% or more of the outstanding shares of each class of either Fund.

INVESTMENT ADVISER AND SUB-ADVISER

Regents Park Funds, LLC, 4041 MacArthur Blvd., Suite 155, Newport Beach, CA 92660, serves as each Fund's investment adviser. The Adviser is registered with the SEC as an investment adviser under the Investment Advisers Act of 1940, as amended.

Subject to the authority of the Board of Trustees, the Adviser is responsible for the overall management of each Fund's investment-related business affairs. Pursuant to an investment advisory agreement (the "Advisory Agreement") with the Trust, on behalf of each Fund, the Adviser, in conformity with the stated policies of each Fund, has overall supervisory responsibilities for the general management and investment of each Fund's securities portfolio, as detailed below, which are subject to review and approval by the Board of Trustees. In general, the Adviser's duties include setting each Fund's overall investment strategies and asset allocation.

Pursuant to the Advisory Agreement, the Adviser, under the supervision of the Board, agrees to provide a program of continuous investment management for each Fund in accordance with applicable law and the investment objective, policies and restrictions set forth in each Fund's current prospectus and SAI, and subject to such further limitations as the Trust may from time to time impose by written notice to the Adviser. Pursuant to the Advisory Agreement and subject to the delegation of any such duties to a Sub-Adviser as described below, the Adviser shall act as the investment adviser to each Fund and, as such shall, (i) obtain and evaluate such information relating to the economy, industries, business, securities markets and securities as it may deem necessary or useful in discharging its responsibilities here under, (ii) formulate a continuing program for the investment of the assets of each Fund in a manner consistent with its investment objective, policies and restrictions, and (iii) determine from time to time securities to be purchased, sold, retained or lent by each Fund, and implement those decisions, including the selection of entities with or through which such purchases, sales or loans are to be effected; provided, that the Adviser or its designee, directly, will place orders pursuant to its investment determinations either directly with the issuer or with a broker or dealer, and if with a broker or dealer, (a) will attempt to obtain the best price and execution of its orders, and (b) may nevertheless in its discretion purchase and sell portfolio securities from and to brokers who provide the Adviser with research, analysis, advice and similar services and pay such brokers in return a higher commission or spread than may be charged by other brokers.

The Advisory Agreement further provides that the Adviser shall make investment decisions for each Fund, including, but not limited to, the selection and management of investment sub-advisers for each Fund, in which case any of the duties of the Adviser set forth in the Advisory Agreement, including those duties described in the preceding paragraph, may be delegated to such investment sub-advisers subject to approval by the Board. Additionally, if one or more investment sub-advisers are appointed with respect to each Fund, the Advisory Agreement provides that the Adviser shall monitor and evaluate the performance of such investment sub-advisers under their respective sub-advisory agreements in light of the investment objectives and policies of each Fund and render to the Trustees such periodic and special reports related to such performance monitoring as the Trustees may reasonably request, and analyze and recommend changes in investment sub-advisers as the Adviser may deem appropriate. The Adviser also provides each Fund with all necessary office facilities and personnel for servicing each Fund's investments, compensates all officers, Trustees and employees of the Trust who are officers, directors or employees of the Adviser, and all personnel of each Fund or the Adviser performing services relating to research, statistical and investment activities.

In addition, the Adviser, subject to the supervision of the Board of Trustees, provides the management and supplemental administrative services necessary for the operation of each Fund. These services include providing assisting in the supervising of relations with custodians, transfer and pricing agents, accountants, underwriters and other persons dealing with each Fund; assisting in the preparing of all general shareholder communications and conducting shareholder relations; assisting in maintaining each Fund's records and the registration of each Fund's shares under federal securities laws and making necessary filings under state securities laws; assisting in developing management and shareholder services for each Fund; and furnishing reports, evaluations and analyses on a variety of subjects to the Trustees.

Each Fund pays an annual management fee (computed daily and payable monthly) of the Fund's average daily net assets to the Adviser pursuant to the Advisory Agreement as follows:

Fund	Advisory Fee
Anfield U.S. Equity Sector Rotation ETF	0.80%
Anfield Tactical Fixed Income ETF	0.80%

The Adviser has contractually agreed to reduce its fees and/or absorb expenses of each Fund, until at least November 17, 2020, to ensure that total annual fund operating expenses after fee waiver and/or reimbursement (exclusive of any front-end or contingent deferred loads, taxes, brokerage fees and commissions, borrowing costs (such as interest and dividend expense on securities sold short), acquired fund fees and expenses, fees and expenses associated with investments in other collective investment vehicles or derivative instruments (including for example option and swap fees and expenses), and extraordinary expenses such as litigation expenses) will not exceed 1.30% of each Fund's average daily net assets; subject to possible recoupment from each Fund in future years within the three years after the fees have been waived or reimbursed if such recoupment can be achieved within the lesser of the foregoing expense limits or the expense limits in place at the time of the recoupment.

Expenses not expressly assumed by the Adviser under the Advisory Agreement are paid by a Fund. Under the terms of the Advisory Agreement, each Fund is responsible for the payment of the following expenses among others: (a) the fees payable to the Adviser, (b) the fees and expenses of Trustees who are not affiliated persons of the Adviser or Distributor (as defined under the section entitled ("The Distributor")) (c) the fees and certain expenses of the Custodian and Transfer and Dividend Disbursing Agent, including the cost of maintaining certain required records of each Fund and of pricing each Fund's shares, (d) the charges and expenses of legal counsel and independent accountants for each Fund, (e) brokerage commissions and any issue or transfer taxes chargeable to each Fund in connection with its securities transactions, (f) all taxes and corporate fees payable by each Fund to governmental agencies, (g) the fees of any trade association of which each Fund may be a member, (h) the cost of fidelity and liability insurance, (i) the fees and expenses involved in registering and maintaining registration of each Fund and of shares with the SEC, qualifying its shares under state securities laws, including the preparation and printing of each Fund's registration statements and prospectuses for such purposes, (j) all expenses of shareholders and Trustees' meetings (including travel expenses of trustees and officers of the Trust who are not directors, officers or employees of the Adviser) and of preparing, printing and mailing reports, proxy statements and prospectuses to shareholders in the amount necessary for distribution to the shareholders and (k) litigation and indemnification expenses and other extraordinary expenses not incurred in the ordinary course of each Fund's business.

The Advisory Agreement will continue in effect for two (2) years initially and thereafter shall continue from year to year provided such continuance is approved at least annually by (a) a vote of the majority of the Independent Trustees, cast in person at a meeting specifically called for the purpose of voting on such approval and by (b) the majority vote of either all of the Trustees or the vote of a majority of the outstanding shares of each Fund. The Advisory Agreement may be terminated without penalty on 60 days written notice by a vote of a majority of the Trustees or by the Adviser, or by holders of a majority of each Fund's outstanding shares (with respect to each Fund). The Advisory Agreement shall terminate automatically in the event of its assignment.

Sub-Adviser and Sub-Advisory Agreement

The Adviser has engaged Anfield Capital Management, LLC to serve as Sub-Adviser to each Fund. The Sub-Adviser is responsible for selecting investments and assuring that investments are made in accordance with each Fund's investment objective, policies and restrictions.

The Sub-Advisory Agreement provides that the Sub-Adviser will formulate and implement a continuous investment program for each Fund, in accordance with each Fund's objective, policies and limitations and any investment guidelines established by the Adviser. The Sub-Adviser will, subject to the supervision and control of the Adviser, determine in its discretion which issuers and securities will be purchased, held, sold or exchanged by each Fund, and will place orders with and give instruction to brokers and dealers to cause the execution of such transactions. The Sub-Adviser is required to furnish, at its own expense, all investment facilities necessary to perform its obligations under the Sub-Advisory Agreement. Pursuant to the Sub-Advisory Agreement between the Adviser and Sub-

Adviser, the Sub-Adviser is entitled to receive an annual sub-advisory fee on its portion of each Fund's average daily net assets. The Sub-Adviser is paid by the Adviser, not a Fund.

The Sub-Advisory Agreement shall continue in effect for two (2) years initially and then from year to year, provided it is approved at least annually by a vote of the majority of the Trustees, who are not parties to the agreement or interested persons of any such party, cast in person at a meeting specifically called for the purpose of voting on such approval. The Sub-Advisory Agreement may be terminated without penalty at any time by the Adviser or the Sub-Adviser on 60 days written notice, and will automatically terminate in the event of its "assignment" (as that term is defined in the 1940 Act).

Affiliated Sub-Adviser

Regents Park and Anfield are affiliates in that they are both owned and controlled by Anfield Group, LLC. Regents Park and Anfield share the same principal place of business and are under joint ownership and control and share common officers and employees. Advisory arrangements involving affiliated sub-advisers present certain conflicts of interest. Since Regents Park and Anfield are affiliates, Regents Park's use of Anfield presents a potential conflict of interest because Regents Park has financial and non-financial incentives for selecting Anfield over other sub-advisers. An investment adviser may be inclined to act in its own interest by recommending to clients the services of an affiliated sub-adviser that provide benefits to the investment adviser, instead of recommending the service that is in the best interest of the client. Anfield, the affiliated sub-adviser, will benefit from increased sub-advisory fees. In addition, Regents Park will benefit, not only from the net advisory fee retained by the Adviser but also from the sub-advisory fee paid by the Adviser to Anfield. Consequently, Regents Park and Anfield may be viewed as benefiting financially from: (i) the appointment of or continued service of Anfield as a Sub-Adviser by Regents Park; and (ii) the allocation by Anfield of the funds advised by Regents Park as part of certain investment portfolios for its clients. However, both Regents Park, in recommending to the Board the appointment or continued service of Anfield as a Sub-Adviser, and Anfield, in the allocation by Anfield of funds advised by Regents Park, including each Fund, as part of certain investment portfolios, have a fiduciary duty to act in the best interests of their clients, including each Fund and its shareholders. Regents Park has a duty to recommend that Anfield be selected, retained, or replaced only when Regents Park believes it is in the best interests of Fund shareholders. The Board, comprised wholly of Independent Trustees, is aware of and monitor these conflicts of interest.

Codes of Ethics

The Trust, the Adviser, the Sub-Adviser and the Distributor each have adopted codes of ethics under Rule 17j-1 under the 1940 Act that govern the personal securities transactions of their board members, officers and employees who may have access to current trading information of the Trust. Under the code of ethics adopted by the Trust (the "Code"), the Trustees are permitted to invest in securities that may also be purchased by the Funds.

In addition, the Trust has adopted a separate code of ethics that applies only to the Trust's executive officers to ensure that these officers promote professional conduct in the practice of corporate governance and management. The purpose behind these guidelines is to promote i) honest and ethical conduct, including the ethical handling of actual or apparent conflicts of interest between personal and professional relationships; ii) full, fair, accurate, timely, and understandable disclosure in reports and documents that a registrant files with, or submits to, the SEC and in other public communications made by each Fund; iii) compliance with applicable governmental laws, rule and regulations; iv) the prompt internal reporting of violations of this Code to an appropriate person or persons identified in the Code; and v) accountability for adherence to the Code.

Proxy Voting Policies

The Board has adopted Proxy Voting Policies and Procedures ("Policies") on behalf of the Trust, which delegate the responsibility for voting proxies to the Adviser or Sub-Adviser, as applicable, subject to the Board's continuing oversight. The Policies require that the Adviser or Sub-Adviser vote proxies received in a manner consistent with the best interests of each Fund and its shareholders. The Policies also require the Adviser or Sub-Adviser to present to the Board, at least annually, the Adviser's (and Sub-Adviser's) Proxy Policies and a record of each proxy voted by the Adviser or Sub-Adviser on behalf of each Fund, including a report on the resolution of all proxies identified by the Adviser or Sub-Adviser as involving a conflict of interest.

Where a proxy proposal raises a material conflict between the Adviser's or Sub-Adviser's interests and each Fund's interests, the Adviser or Sub-Adviser will resolve the conflict by voting in accordance with the policy guidelines or at the client's directive using the recommendation of an independent third party. If the third party's recommendations are not received in a timely fashion, the Adviser or Sub-Adviser will abstain from voting the securities held by that client's account. A copy of the Adviser's and Sub-Adviser's proxy voting policies are attached hereto as Appendix A.

More information. Information regarding how each Fund voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available (1) without charge, upon request, by calling a Fund at 1-866-866-4848 and (2) on the SEC's website at <http://www.sec.gov> and will be sent within three business days of receipt of a request.

THE DISTRIBUTOR

Northern Lights Distributors, LLC, located at 17645 Wright Street, Ste. 200, Omaha, Nebraska 68130 (the "Distributor") serves as the principal underwriter and national distributor for the shares of each Fund pursuant to an ETF Distribution Agreement with the Trust. The Distributor is registered as a broker-dealer under the Securities Exchange Act of 1934 and each state's securities laws and is a member of the FINRA. The offering of each Fund's shares is continuous. The ETF Distribution Agreement provides that the Distributor, as agent in connection with the distribution of a Fund's shares, will use reasonable efforts to facilitate the sale of each Fund's shares.

The ETF Distribution Agreement provides that, unless sooner terminated, it will continue in effect for two years initially and thereafter shall continue from year to year, subject to annual approval by (a) the Board or a vote of a majority of the outstanding shares, and (b) by a majority of the Trustees who are not interested persons of the Trust or of the Distributor by vote cast in person at a meeting called for the purpose of voting on such approval.

The ETF Distribution Agreement may be terminated by each Fund at any time, without the payment of any penalty, by vote of a majority of the entire Board of the Trust or by vote of a majority of the outstanding shares of each Fund on 60 days written notice to the Distributor, or by the Distributor at any time, without the payment of any penalty, on 60 days written notice to each Fund. The ETF Distribution Agreement will automatically terminate in the event of its assignment.

The Distributor may enter into selling agreements with broker-dealers that solicit orders for the sale of shares of each Fund and may allow concessions to dealers that sell shares of each Fund.

Rule 12b-1 Plan

The Trust, with respect to each Fund, has adopted a Distribution Plan pursuant to Rule 12b-1 under the 1940 Act (the "Plan") for Shares pursuant to which each Fund is authorized to pay the Distributor, as compensation for Distributor's account maintenance services under the Plans. The Board has approved a distribution and shareholder servicing fee at the rate of up to 0.25% of each Fund's average daily net assets. Such fees are to be paid by each Fund monthly, or at such other intervals as the Board shall determine. Such fees shall be based upon each Fund's average daily net assets during the preceding month, and shall be calculated and accrued daily. Each Fund may pay fees to the Distributor at a lesser rate, as agreed upon by the Board and the Distributor. The Plan authorizes payments to the Distributor as compensation for providing account maintenance services to Fund shareholders, including arranging for certain securities dealers or brokers, administrators and others ("Recipients") to provide these services and paying compensation for these services. Each Fund will bear its own costs of distribution with respect to its shares. The Plan was adopted in order to permit the implementation of each Fund's method of distribution. No fees are currently paid by either Fund under the Plan, and there are no current plans to impose such fees. In the event such fees were to be charged, over time they would increase the cost of an investment in a Fund.

The services to be provided by Recipients may include, but are not limited to, the following: assistance in the offering and sale of Fund shares and in other aspects of the marketing of the shares to clients or prospective clients of the respective recipients; answering routine inquiries concerning a Fund; assisting in the establishment and maintenance of accounts or sub-accounts in each Fund and in processing purchase and redemption transactions; making each Fund's investment plan and shareholder services available; and providing such other information and services to investors in shares of each Fund as the Distributor or the Trust, on behalf of each Fund, may reasonably request. The distribution services shall also include any advertising and marketing services provided by or arranged by the Distributor with respect to each Fund.

The Distributor is required to provide a written report, at least quarterly to the Board, specifying in reasonable detail the amounts expended pursuant to the Plan and the purposes for which such expenditures were made. Further, the Distributor will inform the Board of any Rule 12b-1 fees to be paid by the Distributor to Recipients.

The initial term of the Plan is one year and will continue in effect from year to year thereafter, provided such continuance is specifically approved at least annually by a majority of the Board and a majority of the Independent Trustees who do not have a direct or indirect financial interest in the Plan ("Rule 12b-1 Trustees") by votes cast in person at a meeting called for the purpose of voting on the Plan. The Plan may be terminated at any time by the Trust or each Fund by vote of a majority of the Rule 12b-1 Trustees or by vote of a majority of the outstanding voting shares of each Fund.

The Plan may not be amended to increase materially the amount of the Distributor's compensation to be paid by each Fund, unless such amendment is approved by the vote of a majority of the outstanding voting securities of the affected class of each Fund (as defined in

the 1940 Act). All material amendments must be approved by a majority of the Board and a majority of the Rule 12b-1 Trustees by votes cast in person at a meeting called for the purpose of voting on the Plan. During the term of the Plan, the selection and nomination of Independent Trustees will be committed to the discretion of current Independent Trustees. The Distributor will preserve copies of the Plan, any related agreements, and all reports, for a period of not less than six years from the date of such document and for at least the first two years in an easily accessible place.

Any agreement related to the Plan will be in writing and provide that: (a) it may be terminated by the Trust or a Fund at any time upon sixty days' written notice, without the payment of any penalty, by vote of a majority of the respective Rule 12b-1 Trustees, or by vote of a majority of the outstanding voting securities of the Trust or a Fund; (b) it will automatically terminate in the event of its assignment (as defined in the 1940 Act); and (c) it will continue in effect for a period of more than one year from the date of its execution or adoption only so long as such continuance is specifically approved at least annually by a majority of the Board and a majority of the Rule 12b-1 Trustees by votes cast in person at a meeting called for the purpose of voting on such agreement. No "interested person" (as defined in the 1940 Act) of the Funds nor any Trustee had a direct or indirect financial interest in the operation of the plans or related agreements.

PORTFOLIO MANAGERS

Peter Van de Zilver and David Young serve as the portfolio managers of the Sector Rotation ETF. Shailesh Gupta, Peter Van de Zilver, and Cyrille Conseil serve as the portfolio managers of the Tactical Fixed Income ETF. As of July 31, 2019 the portfolio managers are responsible for the portfolio management of the following types of accounts in addition to each Fund:

Peter Van de Zilver

Conflicts of Interest

As a general matter, certain conflicts of interest may arise in connection with a portfolio manager's management of each Fund's investments, on the one hand, and the investments of other accounts for which the portfolio manager is responsible, on the other. For example, it is possible that the various accounts managed could have different investment strategies that, at times, might conflict with one another to the possible detriment of a Fund. Alternatively, to the extent that the same investment opportunities might be desirable for more than one account, possible conflicts could arise in determining how to allocate them. Other potential conflicts might include conflicts created by specific portfolio manager compensation arrangements, and conflicts relating to selection of brokers or dealers to execute each Fund's portfolio trades and/or specific uses of commissions from each Fund's portfolio trades (for example, research, or "soft dollars", if any). The Adviser and Sub-Adviser each have adopted policies and procedures and has structured the portfolio managers' compensation in a manner reasonably designed to safeguard each Fund from being negatively affected as a result of any such potential conflicts.

Compensation

Messrs. Young, Van de Zilver, Gupta and Cnseill are compensated through a combination of base salary, discretionary bonus and equity participation in the Sub-Adviser.

Ownership of Securities

The following table shows the dollar range of equity securities beneficially owned by the portfolio managers in the Funds as of the date of this SAI.

Name of Portfolio Manager	Dollar Range of Equity Securities in the Sector Rotation ETF	Dollar Range of Equity Securities in the Tactical Fixed Income ETF
David Young	\$0	-
Peter Van de Zilver	\$0	\$0
Shailesh Gupta	-	\$0
Cyrille Conseil	-	\$0

ALLOCATION OF PORTFOLIO BROKERAGE

Specific decisions to purchase or sell securities for each Fund are made by the portfolio managers who are employees of the Adviser or a Sub-Adviser. The Adviser and the Sub-Adviser are authorized by the Trustees to allocate the orders placed by them on behalf of each Fund to brokers or dealers who may, but need not, provide research or statistical material or other services to each Fund or the Adviser or Sub-Adviser for each Fund's use. Such allocation is to be in such amounts and proportions as the Adviser or Sub-Adviser may determine.

In selecting a broker or dealer to execute each particular transaction, the Adviser or Sub-Adviser will take the following into consideration:

- the best net price available;
- the reliability, integrity and financial condition of the broker or dealer;
- the size of and difficulty in executing the order; and

- the value of the expected contribution of the broker or dealer to the investment performance of a Fund on a continuing basis.

Brokers or dealers executing a portfolio transaction on behalf of each Fund may receive a commission in excess of the amount of commission another broker or dealer would have charged for executing the transaction if the Adviser or Sub-Adviser determines in good faith that such commission is reasonable in relation to the value of brokerage and research services provided to a Fund. In allocating portfolio brokerage, the Adviser or Sub-Adviser may select brokers or dealers who also provide brokerage, research and other services to other accounts over which the Adviser or Sub-Adviser exercises investment discretion. Some of the services received as the result of Fund transactions may primarily benefit accounts other than a Fund, while services received as the result of portfolio transactions effected on behalf of those other accounts may primarily benefit each Fund. The Funds had not commenced operation as of the date of this SAI and, therefore, had paid \$0 in brokerage commissions.

PORTFOLIO TURNOVER

Each Fund's portfolio turnover rate is calculated by dividing the lesser of purchases or sales of portfolio securities for the fiscal year by the monthly average of the value of the fund securities owned by each Fund during the fiscal year. The calculation excludes from both the numerator and the denominator securities with maturities at the time of acquisition of one year or less. High portfolio turnover involves correspondingly greater brokerage commissions and other transaction costs, which will be borne directly by a Fund. A 100% turnover rate would occur if all of a Fund's portfolio securities were replaced once within a one-year period.

OTHER SERVICE PROVIDERS

Fund Administration

Gemini Fund Services, LLC, (the "Administrator"), which has its principal office at 80 Arkay Drive, Suite 110, Hauppauge, NY 11788, and is primarily in the business of providing administrative, fund accounting and transfer agent services to retail and institutional mutual funds. The Administrator is an affiliate of the Distributor.

Pursuant to an ETF Services Agreement with the Funds, the Administrator provides administrative services to each Fund, subject to the supervision of the Board. The Administrator may provide persons to serve as officers of each Fund. Such officers may be directors, officers or employees of the Administrator or its affiliates.

The ETF Services Agreement is dated September 19, 2017. The ETF Services Agreement will remain in effect for two years from the effective date of the agreement, and will remain in effect subject to annual approval of the Board for one-year periods thereafter. The ETF Services Agreement is terminable by the Board or the Administrator on ninety days' written notice and may be assigned provided the non-assigning party provides prior written consent. This ETF Services Agreement provides that in the absence of willful misfeasance, bad faith or gross negligence on the part of the Administrator or reckless disregard of its obligations thereunder, the Administrator shall not be liable for any action or failure to act in accordance with its duties thereunder.

Under the ETF Services Agreement, the Administrator provides facilitating administrative services, including: (i) providing services of persons competent to perform such administrative and clerical functions as are necessary to provide effective administration of each Fund; (ii) facilitating the performance of administrative and professional services to each Fund by others, including each Fund's Custodian; (iii) preparing, but not paying for, the periodic updating of each Fund's Registration Statement, Prospectus and Statement of Additional Information in conjunction with Fund counsel, including the printing of such documents for the purpose of filings with the SEC and state securities administrators, and preparing reports to each Fund's shareholders and the SEC; (iv) preparing in conjunction with Fund counsel, but not paying for, all filings under the securities or "Blue Sky" laws of such states or countries as are designated by the Distributor, which may be required to register or qualify, or continue the registration or qualification, of each Fund and/or its shares under such laws; (v) preparing notices and agendas for meetings of the Board and minutes of such meetings in all matters required by the 1940 Act to be acted upon by the Board; and (vi) monitoring daily and periodic compliance with respect to all requirements and restrictions of the 1940 Act, the Internal Revenue Code and the prospectuses.

The Administrator also provides each Fund with accounting services, including: (i) daily computation of net asset value; (ii) maintenance of security ledgers and books and records as required by the 1940 Act; (iii) production of each Fund's listing of portfolio securities and general ledger reports; (iv) reconciliation of accounting records; (v) calculation of yield and total return for each Fund; (vi) maintaining certain books and records described in Rule 31a-1 under the 1940 Act, and reconciling account information and balances among each Fund's custodian and Adviser; and (vii) monitoring and evaluating daily income and expense accruals, and sales and redemptions of shares of each Fund.

For administrative services rendered to each Fund under the ETF Services Agreement, each Fund pay GFS the greater of an annual minimum fee or an asset based fee, which scales downward based upon net assets. For the fund accounting services rendered to

the Funds under the ETF Services Agreement, each Fund pay GFS the greater of an annual minimum fee or an asset based fee, which scales downward based upon net assets. Each Fund also pay GFS for any out-of-pocket expenses.

Effective February 1, 2019, NorthStar Financial Services Group, LLC, the parent company of GFS, the Distributor, and Northern Lights Compliance Services, LLC (collectively, the “Gemini Companies”), sold its interest in the Gemini Companies to a third party private equity firm that contemporaneously acquired Ultimus Fund Solutions, LLC (an independent mutual fund administration firm) and its affiliates (collectively, the “Ultimus Companies”). As a result of these separate transactions, the Gemini Companies and the Ultimus Companies are now indirectly owned through a common parent entity, The Ultimus Group, LLC.

Transfer Agent

Brown Brothers Harriman & Co. (“BBH”), 50 Post Office Square, Boston, MA 02110, acts as transfer, dividend disbursing, and shareholder servicing agent for each Fund pursuant to the Custodian and Transfer Agent Agreement between BBH and the Trust on behalf of each Fund (the “Transfer Agent”). Under the Agreement, the Transfer Agent is responsible for administering and performing transfer agent functions, dividend distribution, shareholder administration, and maintaining necessary records in accordance with applicable rules and regulations.

Custodian

BBH (the “Custodian”), serves as the custodian of each Fund's assets pursuant to a Custodian and Transfer Agent Agreement by and between the Custodian and the Trust on behalf of each Fund. The Custodian's responsibilities include safeguarding and controlling each Fund's cash and securities, handling the receipt and delivery of securities, and collecting interest and dividends on each Fund's investments. Pursuant to the Custodian and Transfer Agent Agreement, the Custodian also maintains original entry documents and books of record and general ledgers; posts cash receipts and disbursements; and records purchases and sales based upon communications from the Adviser. Each Fund may employ foreign sub-custodians that are approved by the Board to hold foreign assets.

Compliance Officer

Northern Lights Compliance Services, LLC (“NLCS”), 17605 Wright Street, Suite 2, Omaha, NE 68130, an affiliate of GFS and the Distributor, provides a Chief Compliance Officer to the Trust as well as related compliance services pursuant to a consulting agreement between NLCS and the Trust. NLCS's compliance services consist primarily of reviewing and assessing the policies and procedures of the Trust and its service providers pertaining to compliance with applicable federal securities laws, including Rule 38a-1 under the 1940 Act. For the compliance services rendered to Funds, each Fund pays NLCS a one-time fee plus an annual asset based fee, which scales downward based upon net assets. Each Fund also pays NLCS for any out-of-pocket expenses.

DESCRIPTION OF SHARES

Each share of beneficial interest of the Trust has one vote in the election of Trustees. Cumulative voting is not authorized for the Trust. This means that the holders of more than 50% of the shares voting for the election of Trustees can elect 100% of the Trustees if they choose to do so, and, in that event, the holders of the remaining shares will be unable to elect any Trustees.

Shareholders of the Trust and any other future series of the Trust will vote in the aggregate and not by series except as otherwise required by law or when the Board determines that the matter to be voted upon affects only the interest of the shareholders of a particular series or classes. Matters such as election of Trustees are not subject to separate voting requirements and may be acted upon by shareholders of the Trust voting without regard to series.

The Trust is authorized to issue an unlimited number of shares of beneficial interest. Each share has equal, per-class, dividend, distribution and liquidation rights. There are no conversion or preemptive rights applicable to any shares of a Fund. All shares issued are fully paid and non-assessable.

ANTI-MONEY LAUNDERING PROGRAM

The Trust has established an Anti-Money Laundering Compliance Program (the “Program”) as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (“USA PATRIOT Act”). To ensure compliance with this law, the Trust's Program provides for the development of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program. The Trust's Secretary serves as its Anti-Money Laundering Compliance Officer.

Procedures to implement the Program include, but are not limited to, determining that the Funds' Distributor, and Transfer Agent have established proper anti-money laundering procedures, reported suspicious and/or fraudulent activity and a complete and

thorough review of all new opening account applications. The Trust will not transact business with any person or entity whose identity cannot be adequately verified under the provisions of the USA PATRIOT Act.

As a result of the Program, the Trust may be required to “freeze” the account of a shareholder if the shareholder appears to be involved in suspicious activity or if certain account information matches information on government lists of known terrorists or other suspicious persons, or the Trust may be required to transfer the account or proceeds of the account to a governmental agency.

PURCHASE, REDEMPTION AND PRICING OF SHARES

Calculation of Share Price

As indicated in each Fund’s prospectus under the heading “Net Asset Value,” (“NAV”) of a Fund’s shares is determined by dividing the total value of a Fund’s portfolio investments and other assets, less any liabilities, by the total number of shares outstanding of such Fund.

Generally, a Fund’s domestic securities (including underlying ETFs which hold portfolio securities primarily listed on foreign (non-U.S.) exchanges) are valued each day at the last quoted sales price on each security’s primary exchange. Securities traded or dealt in upon one or more securities exchanges for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid and ask prices on such exchange. Securities primarily traded in the NASDAQ National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price. If market quotations are not readily available, securities will be valued at their fair market value as determined in good faith by the Funds’ fair value committee in accordance with procedures approved by the Board and as further described below. Securities that are not traded or dealt in any securities exchange (whether domestic or foreign) and for which over-the-counter market quotations are readily available generally shall be valued at the last sale price or, in the absence of a sale, at the mean between the current bid and ask price on such over-the-counter market.

Certain securities or investments for which daily market quotes are not readily available may be valued, pursuant to guidelines established by the Board, with reference to other securities or indices. Debt securities not traded on an exchange may be valued at prices supplied by a pricing agent(s) based on broker or dealer supplied valuations or matrix pricing, a method of valuing securities by reference to the value of other securities with similar characteristics, such as rating, interest rate and maturity. Short-term investments having a maturity of 60 days or less may be generally valued at amortized cost when it approximated fair value.

Exchange traded options are valued at the last quoted sales price or, in the absence of a sale, at the mean between the current bid and ask prices on the exchange on which such options are traded. Futures and options on futures are valued at the settlement price determined by the exchange. Other securities for which market quotes are not readily available are valued at fair value as determined in good faith by the Board or persons acting at their direction. Swap agreements and other derivatives are generally valued daily based upon quotations from market makers or by a pricing service in accordance with the valuation procedures approved by the Board.

Under certain circumstances, a Fund may use an independent pricing service to calculate the fair market value of foreign equity securities on a daily basis by applying valuation factors to the last sale price or the mean price as noted above. The fair market values supplied by the independent pricing service will generally reflect market trading that occurs after the close of the applicable foreign markets of comparable securities or the value of other instruments that have a strong correlation to the fair-valued securities. The independent pricing service will also take into account the current relevant currency exchange rate. A security that is fair valued may be valued at a price higher or lower than actual market quotations or the value determined by other funds using their own fair valuation procedures. Because foreign securities may trade on days when Fund shares are not priced, the value of securities held by a Fund can change on days when Fund shares cannot be redeemed or purchased. In the event that a foreign security’s market quotations are not readily available or are deemed unreliable (for reasons other than because the foreign exchange on which it trades closed before a Fund’s calculation of NAV), the security will be valued at its fair market value as determined in good faith by a Fund’s fair value committee in accordance with procedures approved by the Board as discussed below. Without fair valuation, it is possible that short-term traders could take advantage of the arbitrage opportunity and dilute the NAV of long-term investors. Fair valuation of a Fund’s portfolio securities can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that it will prevent dilution of a Fund’s NAV by short-term traders. In addition, because each Fund may invest in underlying ETFs which hold portfolio securities primarily listed on foreign (non-U.S.) exchanges, and these exchanges may trade on weekends or other days when the underlying ETFs do not price their shares, the value of these portfolio securities may change on days when you may not be able to buy or sell Fund shares

Investments initially valued in currencies other than the U.S. dollar are converted to U.S. dollars using exchange rates obtained from pricing services. As a result, the NAV of a Fund’s shares may be affected by changes in the value of currencies in relation to the U.S. dollar. The value of securities traded in markets outside the United States or denominated in currencies other than the U.S. dollar may be affected significantly on a day that the New York Stock Exchange is closed and an investor is not able to purchase, redeem or exchange shares

Fund shares are valued at the close of regular trading on the New York Stock Exchange (normally 4:00 p.m., Eastern time) (the "NYSE Close") on each day that the New York Stock Exchange is open. For purposes of calculating the NAV, each Fund normally use pricing data for domestic equity securities received shortly after the NYSE Close and does not normally take into account trading, clearances or settlements that take place after the NYSE Close. Domestic fixed income and foreign securities are normally priced using data reflecting the earlier closing of the principal markets for those securities. Information that becomes known to a Fund or its agents after the NAV has been calculated on a particular day will not generally be used to retroactively adjust the price of the security or the NAV determined earlier that day.

When market quotations are insufficient or not readily available, a Fund may value securities at fair value or estimate their value as determined in good faith by the Board or its designees, pursuant to procedures approved by the Board. Fair valuation may also be used by the Board if extraordinary events occur after the close of the relevant market but prior to the NYSE Close.

Notice to Texas Shareholders

Under section 72.1021(a) of the Texas Property Code, initial investors in a Fund who are Texas residents may designate a representative to receive notices of abandoned property in connection with Fund shares. Texas shareholders who wish to appoint a representative should notify the Trust's Transfer Agent by writing to the address below to obtain a form for providing written notice to the Trust:

Anfield U.S. Equity Sector Rotation ETF
Anfield Tactical Fixed Income ETF
c/o Gemini Fund Services, LLC
17645 Wright Street, Suite 200
Omaha, Nebraska 68130

Creation Units

Each Fund sells and redeems Shares in Creation Units on a continuous basis through the Distributor, without a sales load, at the NAV next determined after receipt of an order in proper form on any Business Day. A "Business Day" is any day on which the NYSE is open for business. As of the date of this SAI, the NYSE observes the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

A Creation Unit is an aggregation of 25,000 Shares. The Board may declare a split or a consolidation in the number of Shares outstanding of a Fund or Trust, and make a corresponding change in the number of Shares in a Creation Unit.

Authorized Participants

To purchase or redeem any Creation Units, you must be, or transact through, an Authorized Participant. In order to be an Authorized Participant, you must be either a broker-dealer or other participant ("Participating Party") in the Continuous Net Settlement System ("Clearing Process") of the National Securities Clearing Corporation ("NSCC") or a participant in DTC with access to the DTC system ("DTC Participant"), and you must execute an agreement ("Participant Agreement") with the Distributor that governs transactions in each Fund's Creation Units.

Investors who are not Authorized Participants but want to transact in Creation Units may contact the Distributor for the names of Authorized Participants. An Authorized Participant may require investors to enter into a separate agreement to transact through it for Creation Units and may require orders for purchases of shares placed with it to be in a particular form. Investors transacting through a broker that is not itself an Authorized Participant and therefore must still transact through an Authorized Participant may incur additional charges. There are expected to be a limited number of Authorized Participants at any one time.

Orders must be transmitted by an Authorized Participant by telephone or other transmission method acceptable to the Distributor. Market disruptions and telephone or other communication failures may impede the transmission of orders.

Transaction Fees

A fixed fee payable to the Custodian is imposed on each creation and redemption transaction regardless of the number of Creation Units involved in the transaction ("Fixed Fee"). Purchases and redemptions of Creation Units for cash or involving cash-in-lieu (as defined below) are required to pay an additional variable charge to compensate each Fund and its ongoing shareholders for brokerage and market impact expenses relating to Creation Unit transactions ("Variable Charge," and together with the Fixed Fee, the "Transaction Fees"). With the approval of the Board, the Adviser may waive or adjust the Transaction Fees, including the Fixed Fee and/or Variable Charge (shown in the table below), from time to time. In such cases, the Authorized Participant will reimburse a Fund for, among other things, any difference between the market value at which the securities and/or financial instruments were purchased

by the Fund and the cash-in-lieu amount, applicable registration fees, brokerage commissions and certain taxes. In addition, purchasers of Creation Units are responsible for the costs of transferring the Deposit Securities to the account of a Fund.

Investors who use the services of a broker, or other such intermediary may be charged a fee for such services. The Transaction Fees for each Fund are listed in the table below.

Fund	Fee for In-Kind and Cash Purchases	Maximum Additional Variable Charge for Cash Purchases*
Anfield U.S. Equity Sector Rotation ETF	\$250	2.00%
Anfield Tactical Fixed Income ETF	\$250	2.00%

* As a percentage of the amount invested.

The Clearing Process

Transactions by an Authorized Participant that is a Participating Party using the NSCC system are referred to as transactions “through the Clearing Process.” Transactions by an Authorized Participant that is a DTC Participant using the DTC system are referred to as transactions “outside the Clearing Process.” The Clearing Process is an enhanced clearing process that is available only for certain securities and only to DTC participants that are also participants in the Continuous Net Settlement System of the NSCC. In-kind (portions of) purchase orders not subject to the Clearing Process will go through a manual clearing process run by DTC. Portfolio Deposits that include government securities must be delivered through the Federal Reserve Bank wire transfer system (“Federal Reserve System”). Fund Deposits that include cash may be delivered through the Clearing Process or the Federal Reserve System. In-kind deposits of securities for orders outside the Clearing Process must be delivered through the Federal Reserve System (for government securities) or through DTC (for corporate securities).

Foreign Securities

Because the portfolio securities of a Fund may trade on days that the Exchange is closed or are otherwise not Business Days for a Fund, shareholders may not be able to redeem their shares of a Fund, or to purchase or sell shares of a Fund on the Exchange, on days when the NAV of a Fund could be significantly affected by events in the relevant foreign markets.

Purchasing Creation Units

Portfolio Deposit

The consideration for a Creation Unit generally consists of the Deposit Securities and a Cash Component. Together, the Deposit Securities and the Cash Component constitute the “Portfolio Deposit.” The Cash Component serves the function of compensating for any differences between the net asset value per Creation Unit and the Deposit Securities. Thus, the Cash Component is equal to the difference between (x) the net asset value per Creation Unit of a Fund and (y) the market value of the Deposit Securities. If (x) is more than (y), the Authorized Participant will pay the Cash Component to a Fund. If (x) is less than (y), the Authorized Participant will receive the Cash Component from a Fund.

On each Business Day, prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern Time), the Adviser through the Custodian makes available through NSCC the name and amount of each Deposit Security in the current Portfolio Deposit (based on information at the end of the previous Business Day) for a Fund and the (estimated) Cash Component, effective through and including the previous Business Day, per Creation Unit. The Deposit Securities announced are applicable to purchases of Creation Units until the next announcement of Deposit Securities.

Payment of any stamp duty or the like shall be the sole responsibility of the Authorized Participant purchasing a Creation Unit. The Authorized Participant must ensure that all Deposit Securities properly denote change in beneficial ownership.

Custom Orders and Cash-in-lieu

Each Fund may, in its sole discretion, permit or require the substitution of an amount of cash (“cash-in-lieu”) to be added to the Cash Component to replace any Deposit Security. Each Fund may permit or require cash-in-lieu when, for example, a Deposit Security may not be available in sufficient quantity for delivery or may not be eligible for transfer through the systems of DTC or the Clearing Process. Similarly, each Fund may permit or require cash in lieu of Deposit Securities when, for example, the Authorized Participant or its underlying investor is restricted under U.S. or local securities laws or policies from transacting in one or more Deposit Securities. Each Fund will comply with the federal securities laws in accepting Deposit Securities including that the Deposit Securities are sold in transactions that would be exempt from registration under the Securities Act. All orders involving cash-in-lieu are considered to be “Custom Orders.”

Purchase Orders

To order a Creation Unit, an Authorized Participant must submit an irrevocable purchase order to the Distributor.

Timing of Submission of Purchase Orders

An Authorized Participant must submit an irrevocable purchase order no later than the earlier of (i) 4:00 p.m. Eastern Time or (ii) the closing time of the bond markets and/or the trading session on the Exchange, on any Business Day in order to receive that Business Day's NAV ("Cut-off Time"). The Cut-off Time for Custom Orders is generally two hours earlier. The Business Day the order is deemed received by the Distributor is referred to as the "Transmittal Date." An order to create Creation Units is deemed received on a Business Day if (i) such order is received by the Distributor by the Cut-off Time on such day and (ii) all other procedures set forth in the Participant Agreement are properly followed. Persons placing or effectuating custom orders and/or orders involving cash should be mindful of time deadlines imposed by intermediaries, such as DTC and/or the Federal Reserve Bank wire system, which may impact the successful processing of such orders to ensure that cash and securities are transferred by the "Settlement Date," which is generally the Business Day immediately following the Transmittal Date ("T+1") for cash and the second Business Day following the Transmittal Date for securities ("T+2").

Orders Using the Clearing Process

If available, (portions of) orders may be settled through the Clearing Process. In connection with such orders, the Distributor transmits, on behalf of the Authorized Participant, such trade instructions as are necessary to effect the creation order. Pursuant to such trade instructions, the Authorized Participant agrees to deliver the requisite Portfolio Deposit to a Fund, together with such additional information as may be required by the Distributor. Cash Components will be delivered using either the Clearing Process or the Federal Reserve System.

Orders Outside the Clearing Process

If the Clearing Process is not available for (portions of) an order, Portfolio Deposits will be made outside the Clearing Process. Orders outside the Clearing Process must state that the DTC Participant is not using the Clearing Process and that the creation of Creation Units will be effected through DTC. The Portfolio Deposit transfer must be ordered by the DTC Participant on the Transmittal Date in a timely fashion so as to ensure the delivery of Deposit Securities (whether standard or custom) through DTC to a Fund account by 11:00 a.m., Eastern time, on T+1. The Cash Component, along with any cash-in-lieu and Transaction Fee, must be transferred directly to the Custodian through the Federal Reserve System in a timely manner so as to be received by the Custodian no later than 12:00 p.m., Eastern Time, on T+1. If the Custodian does not receive both the Deposit Securities and the cash by the appointed time, the order may be canceled. A canceled order may be resubmitted the following Business Day but must conform to that Business Day's Portfolio Deposit. Authorized Participants that submit a canceled order will be liable to a Fund for any losses incurred by a Fund in connection therewith.

Orders involving foreign Deposit Securities are expected to be settled outside the Clearing Process. Thus, upon receipt of an irrevocable purchase order, the Distributor will notify the Adviser and the Custodian of such order. The Custodian, who will have caused the appropriate local sub-custodian(s) of a Fund to maintain an account into which an Authorized Participant may deliver Deposit Securities (or cash -in-lieu), with adjustments determined by such Fund, will then provide information of the order to such local sub-custodian(s). The ordering Authorized Participant will then deliver the Deposit Securities (and any cash-in-lieu) to a Fund's account at the applicable local sub-custodian. The Authorized Participant must also make available on or before the contractual settlement date, by means satisfactory to a Fund, immediately available or same day funds in U.S. dollars estimated by a Fund to be sufficient to pay the Cash Component and Transaction Fee. When a relevant local market is closed due to local market holidays, the local market settlement process will not commence until the end of the local holiday period. Settlement must occur by 2:00 p.m., Eastern Time, on the contractual settlement date.

Acceptance of Purchase Order

All questions as to the number of shares of each security in the Deposit Securities and the validity, form, eligibility and acceptance for deposit of any securities to be delivered shall be determined by each Fund. Each Fund's determination shall be final and binding.

Each Fund reserves the absolute right to reject or revoke acceptance of a purchase order transmitted to it by the Distributor if (a) the order is not in proper form; (b) the investor(s), upon obtaining the shares ordered, would own 80% or more of the currently outstanding shares of a Fund; (c) the Deposit Securities delivered do not conform to the Deposit Securities for the applicable date; (d) acceptance of the Deposit Securities would have certain adverse tax consequences to a Fund; (e) the acceptance of the Portfolio Deposit would, in the opinion of counsel, be unlawful; (f) the acceptance of the Portfolio Deposit would otherwise, in the discretion of the Trust, Fund or the Adviser, have an adverse effect on the Trust, Fund or the rights of beneficial owners; or (g) in the event that circumstances outside the control of the Trust, the Distributor and the Adviser make it for all practical purposes impossible to process purchase orders.

Examples of such circumstances include acts of God; public service or utility problems resulting in telephone, telecopy or computer failures; fires, floods or extreme weather conditions; market conditions or activities causing trading halts; systems failures involving computer or other informational systems affecting the Trust, the Distributor, DTC, NSCC, the Adviser, each Fund's Custodian, a sub-custodian or any other participant in the creation process; and similar extraordinary events. The Distributor shall notify an Authorized Participant of its rejection of the order. Each Fund, the Custodian, any sub-custodian and the Distributor are under no duty, however, to give notification of any defects or irregularities in the delivery of Portfolio Deposits, and they shall not incur any liability for the failure to give any such notification.

Issuance of a Creation Unit

Once a Fund has accepted an order, upon next determination of the Fund's NAV, such Fund will confirm the issuance of a Creation Unit, against receipt of payment, at such NAV. The Distributor will transmit a confirmation of acceptance to the Authorized Participant that placed the order.

Except as provided below, a Creation Unit will not be issued until a Fund obtains good title to the Deposit Securities and the Cash Component, along with any cash-in-lieu and Transaction Fee. Except as provided in Appendix C, the delivery of Creation Units will generally occur no later than T+2.

In certain cases, Authorized Participants will create and redeem Creation Units on the same trade date. In these instances, the Trust reserves the right to settle these transactions on a net basis.

With respect to orders involving foreign Deposit Securities, when the applicable local sub-custodian(s) have confirmed to the Custodian that the Deposit Securities (or cash -in-lieu) have been delivered to a Fund's account at the applicable local sub-custodian(s), the Distributor and the Adviser shall be notified of such delivery, and such Fund will issue and cause the delivery of the Creation Unit. While, as stated above, Creation Units are generally delivered on T+2, a Fund may settle Creation Unit transactions on a basis other than T+2 in order to accommodate foreign market holiday schedules, to account for different treatment among foreign and U.S. markets of dividend record dates and ex-dividend dates (that is the last day the holder of a security can sell the security and still receive dividends payable on the security), and in certain other circumstances.

Each Fund may issue a Creation Unit prior to receiving good title to the Deposit Securities, under the following circumstances. Pursuant to the applicable Participant Agreement, a Fund may issue a Creation Unit notwithstanding that (certain) Deposit Securities have not been delivered, in reliance on an undertaking by the relevant Authorized Participant to deliver the missing Deposit Securities as soon as possible, which undertaking is secured by such Authorized Participant's delivery to and maintenance with the Custodian of collateral having a value equal to at least 115% of the value of the missing Deposit Securities ("Collateral"), as adjusted by time to time by the Adviser. Such Collateral will have a value greater than the NAV of the Creation Unit on the date the order is placed. Such collateral must be delivered no later than 2:00 p.m., Eastern Time, on T+1. The only Collateral that is acceptable to each Fund is cash in U.S. Dollars.

While (certain) Deposit Securities remain undelivered, the Collateral shall at all times have a value equal to at least 115% (as adjusted by the Adviser) of the daily marked-to-market value of the missing Deposit Securities. At any time, a Fund may use the Collateral to purchase the missing securities, and the Authorized Participant will be liable to such Fund for any costs incurred thereby or losses resulting therefrom, whether or not they exceed the amount of the Collateral, including any Transaction Fee, any amount by which the purchase price of the missing Deposit Securities exceeds the market value of such securities on the Transmittal Date, brokerage and other transaction costs. The Trust will return any unused Collateral once all of the missing securities have been received by a Fund. More information regarding each Fund's current procedures for collateralization is available from the Distributor.

Cash Purchase Method

When cash purchases of Creation Units are available or specified for a Fund, they will be effected in essentially the same manner as in-kind purchases. In the case of a cash purchase, the investor must pay the cash equivalent of the Portfolio Deposit. In addition, cash purchases will be subject to Transaction Fees, as described above.

Redeeming a Creation Unit

Redemption Basket

The consideration received in connection with the redemption of a Creation Unit generally consists of an in-kind basket of designated securities ("Redemption Securities") and a Cash Component. Together, the Redemption Securities and the Cash Component constitute the "Redemption Basket."

There can be no assurance that there will be sufficient liquidity in Shares in the secondary market to permit assembly of a Creation Unit. In addition, investors may incur brokerage and other costs in connection with assembling a Creation Unit.

The Cash Component serves the function of compensating for any differences between the net asset value per Creation Unit and the Redemption Securities. Thus, the Cash Component is equal to the difference between (x) the net asset value per Creation Unit of a Fund and (y) the market value of the Redemption Securities. If (x) is more than (y), the Authorized Participant will receive the Cash Component from a Fund. If (x) is less than (y), the Authorized Participant will pay the Cash Component to a Fund.

If the Redemption Securities on a Business Day are different from the Deposit Securities, prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern Time), the Adviser through the Custodian makes available through NSCC the name and amount of each Redemption Security in the current Redemption Basket (based on information at the end of the previous Business Day) for a Fund and the (estimated) Cash Component, effective through and including the previous Business Day, per Creation Unit. If the Redemption Securities on a Business Day are different from the Deposit Securities, all redemption requests that day will be processed outside the Clearing Process.

The right of redemption may be suspended or the date of payment postponed: (i) for any period during which the NYSE is closed (other than customary weekend and holiday closings); (ii) for any period during which trading on the NYSE is suspended or restricted; (iii) for any period during which an emergency exists as a result of which disposal of the Shares or determination of the ETF's NAV is not reasonably practicable; or (iv) in such other circumstances as permitted by the SEC, including as described below.

Custom Redemptions and Cash-in-lieu

Each Fund may, in its sole discretion, permit or require the substitution of cash-in-lieu to be added to the Cash Component to replace any Redemption Security. Each Fund may permit or require cash-in-lieu when, for example, a Redemption Security may not be available in sufficient quantity for delivery or may not be eligible for transfer through the systems of DTC or the Clearing Process. Similarly, each Fund may permit or require cash-in-lieu of Redemption Securities when, for example, the Authorized Participant or its underlying investor is restricted under U.S. or local securities law or policies from transacting in one or more Redemption Securities. Each Fund will comply with the federal securities laws in satisfying redemptions with Redemption Securities, including that the Redemption Securities are sold in transactions that would be exempt from registration under the Securities Act. All redemption requests involving cash-in-lieu are considered to be "Custom Redemptions."

Redemption Requests

To redeem a Creation Unit, an Authorized Participant must submit an irrevocable redemption request to the Distributor.

An Authorized Participant submitting a redemption request is deemed to represent to a Fund that it has ascertained or has reasonable grounds to believe that as of the time of the contractual settlement date, that (i) it or its customer, as the case may be, owns, will own or have the authority and right to tender for redemption the Creation Unit to be redeemed and can receive the entire proceeds of the redemption, and (ii) all of the Shares that are in the Creation Unit to be redeemed have not been borrowed, loaned or pledged to another party nor are they the subject of a repurchase agreement, securities lending agreement or such other arrangement that would preclude the delivery of such Shares to a Fund on the contractual settlement date. Each Fund reserves the absolute right, in its sole discretion, to verify these representations, but will typically require verification in connection with higher levels of redemption activity and/or short interest in a Fund. If the Authorized Participant, upon receipt of a verification request, does not provide sufficient verification of the requested representations, the redemption request will not be considered to be in proper form and may be rejected by a Fund.

Timing of Submission of Redemption Requests

An Authorized Participant must submit an irrevocable redemption order no later than the Cut-off Time. The Cut-off Time for Custom Orders is generally two hours earlier. The Business Day the order is deemed received by the Distributor is referred to as the "Transmittal Date." A redemption request is deemed received if (i) such order is received by the Distributor by the Cut-off Time on such day and (ii) all other procedures set forth in the Participant Agreement are properly followed. Persons placing or effectuating Custom Redemptions and/or orders involving cash should be mindful of time deadlines imposed by intermediaries, such as DTC and/or the Federal Reserve System, which may impact the successful processing of such orders to ensure that cash and securities are transferred by the Settlement Date, as defined above.

Requests Using the Clearing Process

If available, (portions of) redemption requests may be settled through the Clearing Process. In connection with such orders, the Distributor transmits on behalf of the Authorized Participant, such trade instructions as are necessary to effect the redemption. Pursuant to such trade instructions, the Authorized Participant agrees to deliver the requisite Creation Unit(s) to a Fund, together with

such additional information as may be required by the Distributor. Cash Components will be delivered using either the Clearing Process or the Federal Reserve System, as described above.

Requests Outside the Clearing Process

If the Clearing Process is not available for (portions of) an order, Redemption Baskets will be delivered outside the Clearing Process. Orders outside the Clearing Process must state that the DTC Participant is not using the Clearing Process and that the redemption will be effected through DTC. The Authorized Participant must transfer or cause to be transferred the Creation Unit(s) of shares being redeemed through the book-entry system of DTC so as to be delivered through DTC to the Custodian by 10:00 a.m., Eastern Time, on received T+1. In addition, the Cash Component must be received by the Custodian by 12:00 p.m., Eastern Time, on T+1. If the Custodian does not receive the Creation Unit(s) and Cash Component by the appointed times on T+1, the redemption will be rejected, except in the circumstances described below. A rejected redemption request may be resubmitted the following Business Day.

Orders involving foreign Redemption Securities are expected to be settled outside the Clearing Process. Thus, upon receipt of an irrevocable redemption request, the Distributor will notify the Adviser and the Custodian. The Custodian will then provide information of the redemption to each Fund's local sub-custodian(s). The redeeming Authorized Participant, or the investor on whose behalf is acting, will have established appropriate arrangements with a broker-dealer, bank or other custody provider in each jurisdiction in which the Redemption Securities are customarily traded and to which such Redemption Securities (and any cash-in-lieu) can be delivered from a Fund's accounts at the applicable local sub-custodian(s).

Acceptance of Redemption Requests

All questions as to the number of shares of each security in the Deposit Securities and the validity, form, eligibility and acceptance for deposit of any securities to be delivered shall be determined by the Trust. The Trust's determination shall be final and binding.

Delivery of Redemption Basket

Once a Fund has accepted a redemption request, upon next determination of such Fund's NAV, the Fund will confirm the issuance of a Redemption Basket, against receipt of the Creation Unit(s) at such NAV, any cash-in-lieu and Transaction Fee. A Creation Unit tendered for redemption and the payment of the Cash Component, any cash-in-lieu and Transaction Fee will be effected through DTC. The Authorized Participant, or the investor on whose behalf it is acting, will be recorded on the book-entry system of DTC.

The Redemption Basket will generally be delivered to the redeeming Authorized Participant within T+2. Except under the circumstances described below, however, a Redemption Basket generally will not be issued until the Creation Unit(s) are delivered to a Fund, along with the Cash Component, any cash-in-lieu and Transaction Fee.

In certain cases, Authorized Participants will create and redeem Creation Units on the same trade date. In these instances, the Trust reserves the right to settle these transactions on a net basis.

With respect to orders involving foreign Redemption Securities, a Fund may settle Creation Unit transactions on a basis other than T+2 in order to accommodate foreign market holiday schedules, to account for different treatment among foreign and U.S. markets of dividend record dates and ex-dividend dates (that is the last day the holder of a security can sell the security and still receive dividends payable on the security), and in certain other circumstances. When a relevant local market is closed due to local market holidays, the local market settlement process will not commence until the end of the local holiday period. Listed below are the dates in calendar year 2019 in which the regular holidays in non-U.S. markets may impact Fund settlement. This list is based on information available to each Fund. The list may not be accurate or complete and is subject to change:

Cash Redemption Method

When cash redemptions of Creation Units are available or specified for a Fund, they will be effected in essentially the same manner as in-kind redemptions. In the case of a cash redemption, the investor will receive the cash equivalent of the Redemption Basket minus any Transaction Fees, as described above.

TAX STATUS

The following discussion is general in nature and should not be regarded as an exhaustive presentation of all possible tax ramifications. All shareholders should consult a qualified tax advisor regarding their investment in each Fund.

Each Fund has qualified and intends to continue to qualify and has elected to be treated as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"), and intends to continue to so qualify, which requires compliance with certain requirements concerning the sources of its income, diversification of its assets, and the amount and timing of its distributions to shareholders. Such qualification does not involve supervision of management or investment practices or policies by any government agency or bureau. By so qualifying, each Fund should not be subject to federal income or excise tax on its net investment income or net capital gain, which are distributed to shareholders in accordance with the applicable timing requirements. Net investment income and net capital gain of each Fund will be computed in accordance with Section 852 of the Code.

Net investment income is made up of dividends and interest less expenses. Net capital gain for a fiscal year is computed by taking into account any capital loss carryforward of each Fund. Capital losses incurred after January 31, 2011 may now be carried forward indefinitely and retain the character of the original loss. Under pre-enacted laws, capital losses could be carried forward to offset any capital gains for eight years, and carried forward as short-term capital, irrespective of the character of the original loss. Capital loss carry forwards are available to offset future realized capital gains. To the extent that these carry forwards are used to offset future capital gains it is probable that the amount offset will not be distributed to shareholders.

Each Fund intends to distribute all of its net investment income, any excess of net short-term capital gains over net long-term capital losses, and any excess of net long-term capital gains over net short-term capital losses in accordance with the timing requirements imposed by the Code and therefore should not be required to pay any federal income or excise taxes. Distributions of net investment income and net capital gain, if any, will be made annually no later than December 31 of each year. Both types of distributions will be in shares of each Fund unless a shareholder elects to receive cash.

To be treated as a regulated investment company under Subchapter M of the Code, each Fund must also (a) derive at least 90% of its gross income from dividends, interest, payments with respect to securities loans, net income from certain publicly traded partnerships and gains from the sale or other disposition of securities or foreign currencies, or other income (including, but not limited to, gains from options, futures or forward contracts) derived with respect to the business of investing in such securities or currencies, and (b) diversify its holding so that, at the end of each fiscal quarter, (i) at least 50% of the market value of each Fund's assets is represented by cash, U.S. government securities and securities of other regulated investment companies, and other securities (for purposes of this calculation, generally limited in respect of any one issuer, to an amount not greater than 5% of the market value of each Fund's assets and 10% of the outstanding voting securities of such issuer) and (ii) not more than 25% of the value of its assets is invested in the securities of (other than U.S. government securities or the securities of other regulated investment companies) any one issuer, two or more issuers that the Fund controls and that are determined to be engaged in the same or similar trades or businesses, or the securities of certain publicly traded partnerships.

If a Fund fails to qualify as a regulated investment company under Subchapter M in any fiscal year, it will be treated as a corporation for federal income tax purposes. As such a Fund would be required to pay income taxes on its net investment income and net realized capital gains, if any, at the rates generally applicable to corporations. Shareholders of each Fund generally would not be liable for income tax on a Fund's net investment income or net realized capital gains in their individual capacities. Distributions to shareholders, whether from a Fund's net investment income or net realized capital gains, would be treated as taxable dividends to the extent of current or accumulated earnings and profits of a Fund.

Each Fund is subject to a 4% nondeductible excise tax on certain undistributed amounts of ordinary income and capital gain under a prescribed formula contained in Section 4982 of the Code. The formula requires payment to shareholders during a calendar year of distributions representing at least 98% of a Fund's ordinary income for the calendar year and at least 98.2% of its capital gain

net income (i.e., the excess of its capital gains over capital losses) realized during the one-year period ending October 31 during such year plus 100% of any income that was neither distributed nor taxed to a Fund during the preceding calendar year. Under ordinary circumstances, a Fund expects to time its distributions so as to avoid liability for this tax.

The following discussion of tax consequences is for the general information of shareholders that are subject to tax. Shareholders that are IRAs or other qualified retirement plans are exempt from income taxation under the Code.

Distributions of taxable net investment income and the excess of net short-term capital gain over net long-term capital loss are taxable to shareholders as ordinary income.

Distributions of net capital gain ("capital gain dividends") generally are taxable to shareholders as long-term capital gain; regardless of the length of time the shares of the Trust have been held by such shareholders.

Each Fund may be able to report a portion of its income as "qualified dividend income," which, if certain conditions, including holding period requirements, are met by each Fund and its shareholders, is taxable to noncorporate shareholders at rates of up to 20%. In general, dividends may be reported by each Fund as qualified dividend income if they are attributable to qualified dividend income received by a Fund. Qualified dividend income is, in general, dividend income from U.S. corporations and certain foreign corporations (i.e., certain foreign corporations incorporated in a possession of the U.S. or in certain countries with a comprehensive tax treaty with the U.S., and certain other foreign corporations if the stock with respect to which the dividend is paid is readily tradable on an established securities market in the U.S.). Passive foreign investment companies are not qualified foreign corporations for this purpose, and dividends received by a Fund from REITs generally are not expected to qualify for treatment as qualified dividend income.

Certain U.S. shareholders, including individuals and estates and trusts, are subject to an additional 3.8% Medicare tax on all or a portion of their "net investment income," which should include dividends from a Fund and net gains from the disposition of shares of such Fund. U.S. shareholders are urged to consult their own tax advisors regarding the implications of the additional Medicare tax resulting from an investment in a Fund.

Redemption of Fund shares by a shareholder will result in the recognition of taxable gain or loss in an amount equal to the difference between the amount realized and the shareholder's tax basis in his or her Fund shares. Such gain or loss is treated as a capital gain or loss if the shares are held as capital assets. However, any loss realized upon the redemption of shares within six months from the date of their purchase will be treated as a long-term capital loss to the extent of any amounts treated as capital gain dividends during such six-month period. All or a portion of any loss realized upon the redemption of shares may be disallowed to the extent shares are purchased (including shares acquired by means of reinvested dividends) within 30 days before or after such redemption.

Distributions of taxable net investment income and net capital gain will be taxable as described above, whether received in additional cash or shares. Shareholders electing to receive distributions in the form of additional shares will have a cost basis for federal income tax purposes in each share so received equal to the net asset value of a share on the reinvestment date.

All distributions of taxable net investment income and net capital gain, whether received in shares or in cash, must be reported by each taxable shareholder on his or her federal income tax return. Dividends or distributions declared in October, November or December as of a record date in such a month, if any, will be deemed to have been received by shareholders on December 31, if paid during January of the following year. Redemptions of shares may result in tax consequences (gain or loss) to the shareholder and are also subject to these reporting requirements.

Under the Code, each Fund will be required to report to the Internal Revenue Service all distributions of taxable income and capital gains as well as gross proceeds from the redemption or exchange of Fund shares, except in the case of certain exempt shareholders. Under the backup withholding provisions of Section 3406 of the Code, distributions of taxable net investment income and net capital gain and proceeds from the redemption or exchange of the shares of a regulated investment company may be subject to withholding of federal income tax in the case of non-exempt shareholders who fail to furnish the investment company with their taxpayer identification numbers and with required certifications regarding their status under the federal income tax law, or if a Fund is notified by the IRS or a broker that withholding is required due to an incorrect TIN or a previous failure to report taxable interest or dividends. If the withholding provisions are applicable, any such distributions and proceeds, whether taken in cash or reinvested in additional shares, will be reduced by the amounts required to be withheld.

Options, Futures, Forward Contracts and Swap Agreements

To the extent such investments are permissible for a Fund, a Fund's transactions in options, futures contracts, hedging transactions, forward contracts, straddles and foreign currencies will be subject to special tax rules (including mark-to-market, constructive sale, straddle, wash sale and short sale rules), the effect of which may be to accelerate income to such Fund, defer losses to the Fund, cause adjustments in the holding periods of the Fund's securities, convert long-term capital gains into short-term capital gains

and convert short-term capital losses into long-term capital losses. These rules could therefore affect the amount, timing and character of distributions to shareholders.

To the extent such investments are permissible, certain of a Fund's hedging activities (including its transactions, if any, in foreign currencies or foreign currency-denominated instruments) are likely to produce a difference between its book income and its taxable income. If a Fund's book income exceeds its taxable income, the distribution (if any) of such excess book income will be treated as (i) a dividend to the extent of a Fund's remaining earnings and profits (including earnings and profits arising from tax-exempt income), (ii) thereafter, as a return of capital to the extent of the recipient's basis in the shares, and (iii) thereafter, as gain from the sale or exchange of a capital asset. If a Fund's book income is less than taxable income, the Fund could be required to make distributions exceeding book income to qualify as a regulated investment company that is accorded special tax treatment.

Passive Foreign Investment Companies

Investment by a Fund in certain "passive foreign investment companies" ("PFICs") could subject such Fund to a U.S. federal income tax (including interest charges) on distributions received from the company or on proceeds received from the disposition of shares in the company, which tax cannot be eliminated by making distributions to Fund shareholders. However, a Fund may elect to treat a PFIC as a "qualified electing fund" ("QEF"), in which case such Fund will be required to include its share of the company's income and net capital gains annually, regardless of whether it receives any distribution from the company.

A Fund also may make an election to mark the gains (and to a limited extent losses) in such holdings "to the market" as though it had sold and repurchased its holdings in those PFICs on the last day of such Fund's taxable year. Such gains and losses are treated as ordinary income and loss. The QEF and mark-to-market elections may accelerate the recognition of income (without the receipt of cash) and increase the amount required to be distributed for a Fund to avoid taxation. Making either of these elections, therefore, may require a Fund to liquidate other investments (including when it is not advantageous to do so) to meet its distribution requirement, which also may accelerate the recognition of gain and affect a Fund's total return.

REITs

A Fund may invest in REITs that hold residual interests in real estate mortgage investment conduits ("REMICs"). Under Treasury regulations that have not yet been issued, but may apply retroactively, a portion of a Fund's income from a REIT that is attributable to the REIT's residual interest in a REMIC (referred to in the Code as an "excess inclusion") will be subject to federal income tax in all events. These regulations are also expected to provide that excess inclusion income of a regulated investment company, such as a Fund, will be allocated to shareholders of the regulated investment company in proportion to the dividends received by such shareholders, with the same consequences as if the shareholders held the related REMIC residual interest directly. The IRS in Notice 2006-97 set forth some basic principles for the application of these rules until such regulations are issued. In general, the applicable rules under the Code and expected rules under the regulations will provide that the excess inclusion income allocated to shareholders (i) cannot be offset by net operating losses (subject to a limited exception for certain thrift institutions), (ii) will constitute unrelated business taxable income to entities (including a qualified pension plan, an individual retirement account, a 401(k) plan, a Keogh plan or other tax-exempt entity) subject to tax on unrelated business income, thereby potentially requiring such an entity that is allocated excess inclusion income, and otherwise might not be required to file a tax return, to file a tax return and pay tax on such income, and (iii) in the case of a foreign shareholder, will not qualify for any reduction in U.S. federal withholding tax. In addition, if at any time during any taxable year a "disqualified organization" (as defined in the Code to include governmental units, tax-exempt entities and certain cooperatives) is a record holder of a share in a regulated investment company, then the regulated investment company will be subject to a tax equal to that portion of its excess inclusion income for the taxable year that is allocable to the disqualified organization, multiplied by the highest federal income tax rate imposed on corporations.

Foreign Currency Transactions

A Fund's transactions in foreign currencies, foreign currency-denominated debt securities and certain foreign currency options, futures contracts and forward contracts (and similar instruments) may give rise to ordinary income or loss to the extent such income or loss results from fluctuations in the value of the foreign currency concerned.

Foreign Taxation

Income received by a Fund from sources within foreign countries may be subject to withholding and other taxes imposed by such countries. Tax treaties and conventions between certain countries and the U.S. may reduce or eliminate such taxes. If more than 50% of the value of a Fund's total assets at the close of its taxable year consists of securities of foreign corporations, the Fund may be able to elect to "pass through" to such Fund's shareholders the amount of eligible foreign income and similar taxes paid by the Fund. If this election is made, a shareholder generally subject to tax will be required to include in gross income (in addition to taxable dividends

actually received) his or her pro rata share of the foreign taxes paid by a Fund, and may be entitled either to deduct (as an itemized deduction) his or her pro rata share of foreign taxes in computing his or her taxable income or to use it as a foreign tax credit against his or her U.S. federal income tax liability, subject to certain limitations. In particular, a shareholder must hold his or her shares (without protection from risk of loss) on the ex-dividend date and for at least 15 more days during the 30-day period surrounding the ex-dividend date to be eligible to claim a foreign tax credit with respect to a gain dividend. No deduction for foreign taxes may be claimed by a shareholder who does not itemize deductions. Each shareholder will be notified within 60 days after the close of each Fund's taxable year whether the foreign taxes paid by a Fund will "pass through" for that year.

Generally, a credit for foreign taxes is subject to the limitation that it may not exceed the shareholder's U.S. tax attributable to his or her total foreign source taxable income. For this purpose, if the pass-through election is made, the source of a Fund's income will flow through to shareholders of such Fund. With respect to a Fund, gains from the sale of securities will be treated as derived from U.S. sources and certain currency fluctuation gains, including fluctuation gains from foreign currency-denominated debt securities, receivables and payables will be treated as ordinary income derived from U.S. sources. The limitation on the foreign tax credit is applied separately to foreign source passive income, and to certain other types of income. A shareholder may be unable to claim a credit for the full amount of his or her proportionate share of the foreign taxes paid by a Fund. The foreign tax credit can be used to offset only 90% of the revised alternative minimum tax imposed on corporations and individuals and foreign taxes generally are not deductible in computing alternative minimum taxable income.

Original Issue Discount and Pay-In-Kind Securities

Current federal tax law requires the holder of a U.S. Treasury or other fixed income zero coupon security to accrue as income each year a portion of the discount at which the security was purchased, even though the holder receives no interest payment in cash on the security during the year. In addition, pay-in-kind securities will give rise to income, which is required to be distributed and is taxable even though a Fund holding the security receives no interest payment in cash on the security during the year.

Some of the debt securities (with a fixed maturity date of more than one year from the date of issuance) that may be acquired by a Fund may be treated as debt securities that are issued originally at a discount. Generally, the amount of the original issue discount ("OID") is treated as interest income and is included in income over the term of the debt security, even though payment of that amount is not received until a later time, usually when the debt security matures. A portion of the OID includable in income with respect to certain high-yield corporate debt securities (including certain pay-in-kind securities) may be treated as a dividend for U.S. federal income tax purposes.

Some of the debt securities (with a fixed maturity date of more than one year from the date of issuance) that may be acquired by a Fund in the secondary market may be treated as having market discount. Generally, any gain recognized on the disposition of, and any partial payment of principal on, a debt security having market discount is treated as ordinary income to the extent the gain, or principal payment, does not exceed the "accrued market discount" on such debt security. Market discount generally accrues in equal daily installments. A Fund may make one or more of the elections applicable to debt securities having market discount, which could affect the character and timing of recognition of income.

Some debt securities (with a fixed maturity date of one year or less from the date of issuance) that may be acquired by a Fund may be treated as having acquisition discount, or OID in the case of certain types of debt securities. Generally, a Fund will be required to include the acquisition discount, or OID, in income over the term of the debt security, even though payment of that amount is not received until a later time, usually when the debt security matures. A Fund may make one or more of the elections applicable to debt securities having acquisition discount, or OID, which could affect the character and timing of recognition of income.

A Fund that holds the foregoing kinds of securities may be required to pay out as an income distribution each year an amount that is greater than the total amount of cash interest the Fund actually received. Such distributions may be made from the cash assets of a Fund or by liquidation of portfolio securities, if necessary (including when it is not advantageous to do so). A Fund may realize gains or losses from such liquidations. In the event a Fund realizes net capital gains from such transactions, its shareholders may receive a larger capital gain distribution, if any, than they would in the absence of such transactions.

Shareholders of a Fund may be subject to state and local taxes on distributions received from the Fund and on redemptions of such Fund's shares.

A brief explanation of the form and character of the distribution accompany each distribution. In January of each year each Fund issues to each shareholder a statement of the federal income tax status of all distributions.

Shareholders should consult their tax advisors about the application of federal, state and local and foreign tax law in light of their particular situation.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board has selected RSM US LLP, located at 551 17th Street, Suite 1000, Denver, CO 80202, serves as the independent registered public accounting firm for the current fiscal year. The firm provides services including audit of annual financial statements, and other tax, audit and related services for the Funds.

LEGAL COUNSEL

Drinker Biddle & Reath, LLP, located at One Logan Square, Suite 2000, Philadelphia, PA 19103, serves as the Trust's legal counsel.

FINANCIAL STATEMENTS

Because the Funds have recently commenced operations, there are no financial statements available at this time. Shareholders of each Fund will be informed of a Fund's progress through periodic reports when those reports become available. Financial statements certified by each Fund's independent public accounting firm will be submitted to shareholders at least annually.

APPENDIX A
Adviser and Sub-Adviser Proxy Voting Policies and Procedures

REGENTS PARK FUNDS, LLC

Proxy Voting Policy

Adopted: October 10, 2016

Proxy Voting

The Fund exercises its proxy voting rights with regard to the companies in that Fund's investment portfolio, with the goals of maximizing the value of the Fund's investments, promoting accountability of a company's management and board of directors to its shareholders, aligning the interests of management with those of shareholders, and increasing transparency of a company's business and operations.

In general, Regents Park believes that the sub-adviser, which selects the individual companies that are part of the Fund's portfolio, is the most knowledgeable and best suited to make decisions about proxy votes. Therefore, Regents Park defers to and relies on the sub-adviser, as appropriate, to make decisions on casting proxy votes.

Proxy Voting Policy

It is the policy of Regents Park to identify any potential conflicts of interest prior to the voting of any proxies. When reviewing proxy proposals, the CCO will monitor for conflicts of interest. If the proposal falls within our predetermined voting guidelines, we will vote according to the guidelines. If a conflict is identified, Regents Park may disclose the conflict to the applicable clients or contact a third party to advise Regents Park to determine the vote and/or provide voting recommendations.

It is feasible that from time to time a potential conflict of interest may arise in the voting of proxies. Such conflicts may occur if an adviser manages a pension plan, administers employee benefit plans, or provides brokerage, underwriting, insurance, or banking services to a company whose management is soliciting proxies. Failure to vote in favor of management may harm the adviser's relationship with the company. The adviser may also have relationships with participants in proxy contests, corporate directors or candidates for directorships. For example, an executive of the adviser may have a spouse or other close relative who serves as a director or executive of a company. Another potential conflict of interest would be voting for an increase in 12b-1 fees when this is a source of compensation for advisers.

Proxy and Mirror Voting

Section 12(d)(1) of the 1940 Act restricts investments by registered investment companies in the securities of other investment companies. Section 12(d)(1)(A) states that a registered investment company may not invest in the securities of another investment company if the acquiring company owns more than 3% of the total outstanding voting securities of the acquired company; the acquiring company owns securities issued by the acquired company with an aggregate value greater than 5% of its total assets; or the acquiring company owns securities issued by the acquired company and all other investment companies having an aggregate value greater than 10% of the value of its total assets.

Mirror Voting

Regents Park may invest in other investment companies in excess of the limitations in section 12(d)(1) of the 1940 Act. In order to benefit from the safe harbor of section 12(d)(1)(F), these Funds must mirror vote proposals on proxies issued by underlying investment companies.

Mirror voting means that the Fund votes its shares in the same proportion that all shares of the ETFs are voted, or in accordance with instructions received from fund shareholders, pursuant to Section 12(d)(1)(F) of the 1940 Act.

In addition, the Funds may invest in underlying investment companies in excess of the limitations prescribed within the 12d-1 safe-harbor. Such Funds may participate in exemptive orders of underlying investment companies to the extent the Trust has signed the requisite participation agreements.

Regents Park provides quarterly certifications with respect to its adherence to its proxy voting and exemptive order policies and procedures.

Form N-PX

Except with respect to sub-advised Funds, the Adviser is responsible for voting proxies for all portfolio securities of the Funds and keeping certain records relating to how the proxies were voted as required by the Advisers Act. The Adviser and the Sub-Adviser shall provide a complete voting record for the Funds, as requested.

Annual Report of Proxy Voting Record

Form N-PX is used by Funds to file reports with the SEC containing the Fund's proxy voting record for the most recent 12-month period ending June 30. The Form must be filed not later than August 31 of each year. The following information must be collected for the Trust separately for Fund in order to complete and file Form N-PX:

1. The name of the issuer of the Fund security;
2. The exchange ticker symbol of the Fund security;
3. The CUSIP number (may be omitted if not available through reasonably practicable means);
4. The shareholder meeting date;
5. A brief description of the matter voted on;
6. Whether the matter was proposed by the issuer or the security holder;
7. Whether the Fund cast its vote on the matter;
8. How the Fund cast its vote (e.g., for or against proposal, or abstain; for or withhold regarding election of directors)
9. Whether the Fund cast its vote for or against management
10. The Funds may invest in other mutual funds and ETFs, which have no requirement to have an annual meeting. Therefore, proxy votes on mutual funds and ETFs are rare.

Compliance Process

1. The Fund manager shall complete a Form N-PX Report at the time the Fund manager votes proxies on behalf of the Fund.
2. The Fund manager shall keep one copy of each completed of the Form N-PX Report and deliver a copy to the Chief Compliance Officer.
3. At least 30 days prior to August 31, the Chief Compliance Officer shall review the Adviser's corporate action records to determine whether any proxy votes were cast on behalf of the Fund for which reports were not filed. If an unreported vote is discovered, the Chief Compliance Officer shall contact the Fund manager for an explanation and documentation.
4. The Chief Compliance Officer shall compile all Form N-PX reports submitted for the 12-month period ended June 30 and complete Form N-PX.
5. Completed Form N-PX shall be sent to the Administrator who shall file Form N-PX with the SEC.

Recordkeeping

Regents Park will maintain the following records relating to our proxy voting procedures:

1. Our proxy voting procedures and policies, and all amendments;

2. All proxy statements received regarding client securities (provided however, that Regents Park may rely on the proxy statement filed on EDGAR as its records);
3. A record of all votes cast on behalf of clients;
4. Records of all client requests for proxy voting information;
5. Any documents prepared by Regents Park that were material to making a decision how to vote or that memorialized the basis for the decision; and
6. All records relating to requests made to clients regarding conflicts of interest in voting the proxy.
7. Documentation to support the method selected to resolve potential or actual conflicts of interests relating to a proxy proposal.

Pre-Trade Procedures for Funds of Funds

Regents Park may invest in series of other investment companies, including, but not limited to, mutual funds, closed end funds and ETFs (each an “Underlying Fund”). Fund investments in Underlying Funds are governed by Section 12d-1 of the 1940 Act, which restricts the amount that one investment company can invest in another.

By adopting “mirror voting” policies, Regents Park may rely on the safe harbor of Section 12d-1F of the 1940 Act, which permits broader latitude to invest in Underlying Funds.

In addition, Regents Park may further exceed the restrictions on investing in Underlying Funds through exemptive relief with the SEC. Regents Park has the ability to invest in Underlying Funds beyond the Section 12d-1F safe harbor, without directly obtaining an exemptive order, by participating in the exemptive orders of Underlying Funds (ETFs, mostly).

Oversight/Monitoring of SEC Exemptive Order Conditions

Prior to purchasing shares in an underlying ETF, mutual fund or closed end fund (and certain other investment companies), Regents Park will (1) ascertain the AUM of the underlying fund; (2) determine if the purchase would result in the Fund owning 3% or more of the outstanding shares of the underlying fund; and if not, whether any other Fund advised by Regents Park and other investment company accounts under its investment discretion own shares in the underlying fund; (3) will all Funds advised by Regents Park and other investment company accounts under Regents Park investment discretion, in the aggregate, including the anticipated purchase, own 3% or more of the outstanding shares of the underlying fund. If not, Regents Park can make the purchase

As the Adviser, Regents Park conducts post-trade portfolio compliance monitoring that includes monitoring for certain aspects of Section 12d-1 compliance, such as the three percent limit on the Fund’s ownership of the outstanding shares of an Underlying Fund. The CCO must ensure pre-trade compliance with investment restrictions under Section 12d-1, and must report compliance with said Section to the board on a quarterly basis.

Exchange Listing Compliance for ETFs

As long as the Fund operates in reliance on the applicable Exemptive Order, its shares must be listed on a national securities exchange.

Regents Park shall semi-annually review compliance of the Fund with the listing exchange’s requirements for continued listing and shall confirm payment of all listing fees. Regents Park shall promptly share any communications from the listing exchange with the Chief Compliance Officer and Trust Counsel.

ANFIELD CAPITAL MANAGEMENT, LLC

Proxy Voting Policy

Updated August 19, 2019

Proxy Voting

A registered investment adviser who exercises voting authority with respect to client securities must adopt and implement written policies and procedures:

- That are reasonably designed to ensure that the adviser votes client securities in the best interest of clients; and
- Which include how the adviser will address material conflicts that may arise between the adviser's interests and those of the client.

Additionally, pursuant to the rule advisers must disclose to clients how they may obtain information from the adviser about how the adviser voted with respect to their securities; and describe to clients the adviser's proxy voting policies and procedures and, upon request, furnish a copy of the policies and procedures to the requesting client.

Anfield, as an adviser, is a fiduciary that owes duties of care and loyalty to each of our clients with respect to the services undertaken on the client's behalf.

Proxy Voting Policy

Anfield does not accept or have the authority to vote securities in individually managed accounts. Anfield will not be deemed have proxy voting authority solely as a result of providing advice or information about a particular proxy vote to a client. Our individually managed account clients will receive their proxies or other solicitations directly from their custodian or a transfer agent. Where a client's account is invested in mutual funds, the investment adviser that manages the assets of the mutual fund generally votes proxies issued on securities held by the fund.

Mutual Funds

For the Anfield Universal Fixed Income Fund, Anfield is responsible for voting proxies for the securities held in the Fund in accordance with the voting policies of the Fund.

ETF Funds

For the Anfield ETFs (the "Funds"), Anfield will exercise its proxy voting rights with regard to the companies in each Fund's investment portfolio, with the goals of maximizing the value of the Fund's investments, promoting accountability of a company's management and board of directors to its shareholders, aligning the interests of management with those of shareholders, and increasing transparency of a company's business and operations.

Anfield will disclose a summary of our proxy voting policy to clients and prospective clients in the firm's ADV 2 along with instructions on how they may obtain a complete copy of Anfield's current proxy voting policies or report on how their proxies were voted.

Procedures and Responsible Party

1. For accounts for which Anfield does not have proxy voting authority, the CCO will take reasonable steps to confirm that the custodian will send proxies directly to the client
2. The CCO is responsible for the administration of the proxy voting system and records.

3. The CCO is responsible for voting proxies according to our written voting guidelines contained in the proxy voting policy. Anfield may deviate from these guidelines at our discretion if we determine that such action is in the best interests of the client.
4. The CCO is responsible for maintaining documents that were prepared when making a decision how to vote or that memorialized the basis for the decision.
5. The CCO is responsible for confirming that client requests for information on how their proxies were voted are responded to in a timely manner and are documented in the client file.
6. In an effort to determine if Anfield is receiving the correct number of proxies, the CCO will:
 - a) Include with the proxy an internal record of the number of shares Anfield's systems indicate Anfield should vote and compare that number to the number of shares received on the proxy.
 - b) If there is a significant discrepancy in the numbers, contact the appropriate custodian in an effort to correct the discrepancy.
 - c) Document and maintain all significant discrepancies, custodian notifications, and responses in an appropriately designated file.
7. When reviewing proxy proposals, the CCO will monitor for conflicts of interest. If the proposal falls within our predetermined voting guidelines, we will vote according to the guidelines. If a conflict is identified, Anfield may disclose the conflict to the applicable clients or contact a third party to advise Anfield to determine the vote and/or provide voting recommendations.

Recordkeeping

Anfield will maintain the following records relating to our proxy voting procedures:

1. Our proxy voting procedures and policies, and all amendments;
2. All proxy statements received regarding client securities (provided however, that Anfield may rely on the proxy statement filed on EDGAR as its records);
3. A record of all votes cast on behalf of clients;
4. Records of all client requests for proxy voting information;
5. Any documents prepared by Anfield that were material to making a decision how to vote or that memorialized the basis for the decision; and
6. All records relating to requests made to clients regarding conflicts of interest in voting the proxy.
7. Documentation to support the method selected to resolve potential or actual conflicts of interests relating to a proxy proposal.

Proxy and Mirror Voting

Section 12(d)(1) of the 1940 Act restricts investments by registered investment companies in the securities of other investment companies. Section 12(d)(1)(A) states that a registered investment company may not invest in the securities of another investment company if the acquiring company owns more than 3% of the total outstanding voting securities of the acquired company; the acquiring company owns securities issued by the acquired company with an aggregate value greater than 5% of its total assets; or the acquiring company owns securities issued by the acquired company and all other investment companies having an aggregate value greater than 10% of the value of its total assets.

Mirror Voting

Funds may invest in other investment companies in excess of the limitations in section 12(d)(1) of the 1940 Act. In order to benefit from the safe harbor of section 12(d)(1)(F), these Funds must mirror vote proposals on proxies issued by underlying investment companies.

Mirror voting means that the Fund votes its shares in the same proportion that all shares of the ETFs are voted, or in accordance with instructions received from fund shareholders, pursuant to Section 12(d)(1)(F) of the 1940 Act.

In addition, the Funds may invest in underlying investment companies in excess of the limitations prescribed within the 12d-1 safe-harbor. Such Funds may participate in exemptive orders of underlying investment companies to the extent the Trust have signed the requisite participation agreements.

Form N-PX

Except with respect to sub-advised Funds, the Adviser is responsible for voting proxies for all portfolio securities of the Funds and keeping certain records relating to how the proxies were voted as required by the Advisers Act. The Adviser and the Sub-Adviser shall provide a complete voting record for the Funds, as requested.

Annual Report of Proxy Voting Record

Form N-PX is used by Funds to file reports with the SEC containing the Fund's proxy voting record for the most recent 12-month period ending June 30. The Form must be filed not later than August 31 of each year. The following information must be collected for the Trust separately for Fund in order to complete and file Form N-PX:

1. The name of the issuer of the Fund security;
2. The exchange ticker symbol of the Fund security;
3. The CUSIP number (may be omitted if not available through reasonably practicable means);
4. The shareholder meeting date;
5. A brief description of the matter voted on;
6. Whether the matter was proposed by the issuer or the security holder;
7. Whether the Fund cast its vote on the matter;
8. How the Fund cast its vote (e.g., for or against proposal, or abstain; for or withhold regarding election of directors)
9. Whether the Fund cast its vote for or against management
10. The Funds may invest in other mutual funds and ETFs, which have no requirement to have an annual meeting. Therefore, proxy votes on mutual funds and ETFs are rare.

Compliance Process

1. The Fund manager shall complete a Form N-PX Report at the time the Fund manager votes proxies on behalf of the Fund.
2. The Fund manager shall keep one copy of each completed of the Form N-PX Report and deliver a copy to the Chief Compliance Officer.
3. At least 30 days prior to August 31, the Chief Compliance Officer shall review the Adviser's corporate action records to determine whether any proxy votes were cast on behalf of the Fund for which reports were not filed. If an unreported vote is discovered, the Chief Compliance Officer shall contact the Fund manager for an explanation and documentation.
4. The Chief Compliance Officer shall compile all Form N-PX reports submitted for the 12-month period ended June 30 and complete Form N-PX.
5. Completed Form N-PX shall be sent to the Administrator who shall file Form N-PX with the SEC.

Pre-Trade Procedures for Funds of Funds

For the Anfield ETFs (the "Funds"), Anfield may invest in series of other investment companies, including, but not limited to, mutual funds, closed end funds and ETFs (each an "Underlying Fund"). Fund investments in Underlying Funds are governed by Section 12d-1 of the 1940 Act, which restricts the amount that one investment company can invest in another.

By adopting "mirror voting" policies, Anfield may rely on the safe harbor of Section 12d-1F of the 1940 Act, which permits broader latitude to invest in Underlying Funds.

In addition, Anfield may further exceed the restrictions on investing in Underlying Funds through exemptive relief with the SEC. Anfield has the ability to invest in Underlying Funds beyond the Section 12d-1F safe harbor, without directly obtaining an exemptive order, by participating in the exemptive orders of Underlying Funds (ETFs, mostly).

Oversight/Monitoring of SEC Exemptive Order Conditions

Prior to purchasing shares in an underlying ETF, mutual fund or closed end fund (and certain other investment companies), Anfield will (1) ascertain the AUM of the Underlying Fund; (2) determine if the purchase would result in the Fund owning 3% or more of the outstanding shares of the Underlying Fund; and if not, whether any other Fund sub-advised by Anfield and other investment company accounts under its investment discretion own shares in the Underlying

Fund; (3) will all Funds sub-advised by Anfield and other investment company accounts under Anfield's investment discretion, in the aggregate, including the anticipated purchase, own 3% or more of the outstanding shares of the Underlying Fund. If not, Anfield can make the purchase.

As the Sub-Adviser, Anfield conducts post-trade portfolio compliance monitoring that includes monitoring for certain aspects of Section 12d-1 compliance, such as the three percent limit on the Fund's ownership of the outstanding shares of an Underlying Fund. The CCO must ensure pre-trade compliance with investment restrictions under Section 12d-1, and must report compliance with said Section to the Adviser on a quarterly basis.

Exchange Listing Compliance for ETFs

As long as the Fund operates in reliance on the applicable Exemptive Order, its shares must be listed on a national securities exchange.

As the Sub-Adviser, Anfield shall semi-annually review compliance of the Fund with the listing exchange's requirements for continued listing and shall confirm payment of all listing fees. Anfield shall promptly share any communications from the listing exchange with the Chief Compliance Officer of the Adviser.

Class Action Filings

A securities "class action" lawsuit is a civil suit brought by one or more individuals ("Plaintiffs") on behalf of themselves and others who have the same grievance against the issuer of a certain security. When a class action is filed, a written notice of filing and/or settlement is prepared (the "Notice"), which outlines the reasons for the lawsuit, the parameters for qualification as a member of the class and certain legal rights that need to be considered before becoming a member of the class (i.e. participating in the settlement). In addition, the Notice will contain instructions issued by the court or broker/dealers and/or other nominees (e.g. custodians) who receive the Notice and who hold the security on behalf of the owner/beneficiary, to either (1) provide the Claims Administrator (usually the attorney for the Plaintiffs) with the name and address of each such owner/beneficiary so the Claims Administrator can send the Notice directly to such owner/beneficiary, or (2) request additional copies of the Notice and send the Notice directly to the owner/beneficiary.

Anfield does not instruct or give advice to clients on whether or not to participate as a member of class action lawsuits and will not automatically file claims on the client's behalf. However, if a client notifies us that they wish to participate in a class action, we will provide the client with any transaction information pertaining to the client's account needed for the client to file a proof of claim in a class action.
