Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Fund's shareholder reports like this one will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Fund's website www.RegentsParkFunds.com, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from the Fund electronically or to continue receiving paper copies of shareholder reports, which are available free of charge, by contacting your financial intermediary (such as a broker-dealer or bank) or, if you are a direct investor, by following the instructions included with paper Fund documents that have been mailed to you.

December 2019

Semi-Annual Letter to Shareholders of the Anfield Capital Diversified Alternatives ETF (DALT)

Update on Performance and Outlook

Overall, we are pleased with both the asset growth and performance of the Anfield Capital Diversified Alternatives ETF ("DALT" or the "Fund"). In the semi-annual period ended October 31, 2019, the Fund grew to \$75 million in total assets under management, representing 50% asset growth from April 2019's \$50 million.

For the six-month period ended October 31, 2019, DALT returned 1.26% on a total return basis, net of fees, while the MSCI AC World Index (ACWI) returned 2.94% and the Bloomberg Barclays Global Aggregate Bond Index (Global Agg) rose 5.04%. A 50% / 50% blend of the MSCI AC World Index and the Bloomberg Barclays Global Aggregate Bond Index rose 3.99% over this same time period. Positive performance contributors over this six-month period included our allocations to real estate, private equity / business development companies, and frontier technology. These positions benefited from falling interest rates as well as positive risk-sentiment. Performance detractors for the period included our allocations to commodities and frontier markets, which saw performance suffer in the face of trade and geopolitical tensions.

Although past performance is no guarantee of future performance, the Fund has enjoyed strong calendar year-to-date performance as of 10/31/2019—up 17.40% on a total return basis, net of all fees and expenses, vs. a 10.20% return for a 50% ACWI / 50% Global Agg blend. We continue to see the fruits of changes made at the beginning of the calendar year previously outlined in other shareholder letters. These changes include risk-weighting instead of equal-weighting approach, increasing portfolio weights to more yield-centric securities, and utilizing equity market futures in order to help dampen portfolio volatility. We believe these changes, as well as our security selection, while noting that past results are no guarantee of future performance, have played a positive role in the Fund's performance year-to-date.

Principal Investment Strategy

DALT is an actively managed ETF and seeks to achieve its investment objective (growth and income) by investing primarily in alternative asset classes and securities that represent sectors, market segments or asset classes that do not represent the general investment universe. The Fund will implement this strategy primarily through investments in unaffiliated ETFs, closed-end funds, business development companies and real estate investment trusts. The market segments and sectors represented in these securities will typically have a lower correlation to the general equity and fixed income markets and whose performance and volatility is affected by factors different from those that determine the direction of the equity and fixed income markets.

Alternative sectors and asset class categories may include but are not limited to:

- Frontier technology companies at the forefront of major technical innovations
- Companies in frontier markets or involved in infrastructure development and resource exploitation
- Traditional alternatives such as real estate, private equity, private debt, and hedge funds
- Energy and commodity related securities
- Long and short volatility strategies & multi-asset / market neutral

On behalf of the entire staff at Anfield Capital Management and Regents Park Funds, we thank you for your continued support.

David Young, CFA
CEO & Founder

The views in this report are those of the Fund's management. This report contains certain forward-looking statements about factors that may affect the performance of the Fund in the future. These statements are based on the Fund's management's predictions and expectations concerning certain future events such as the performance of the economy as a whole and of specific industry sectors. Management believes these forward-looking statements are reasonable, although they are inherently uncertain and difficult to predict.

Anfield Capital Diversified Alternatives ETF
PORTFOLIO REVIEW (Unaudited)
October 31, 2019

The Fund's performance figures(*) for the periods ended October 31, 2019, compared to its benchmarks:

	Six Months	One Year	Since Inception ****
Anfield Capital Diversified Alternatives ETF - NAV	1.26%	9.82%	4.07%
Anfield Capital Diversified Alternatives ETF - Market Price	1.56%	9.79%	4.06%
Bloomberg Barclays Global Aggregate Bond Index **	5.03%	9.54%	3.24%
MSCI All Country World Equity Index ***	2.94%	12.59%	6.63%

* The performance data quoted here represents past performance. Current performance may be lower or higher than the performance data quoted above. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. The returns shown do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemptions of Fund shares. Past performance is no guarantee of future results. Performance figures for periods less than one year are not annualized. The Fund's adviser has contractually agreed to reduce the Fund's fees and/or absorb expenses of the Fund until at least September 30, 2020 to ensure that total annual Fund operating expenses after fee waiver and reimbursement (exclusive of any front-end or contingent deferred loads, brokerage fees and commissions, acquired fund fees and expenses, fees and expenses associated with investments in other collective investment vehicles or derivative instruments (including, for example, option and swap fees and expenses), borrowing costs (such as interest and dividend expense on securities sold short), taxes and extraordinary expenses, such as litigation expenses) will not exceed 1.30% of average daily net assets. This agreement may be terminated by the Fund's Board of Trustees on 60 days' written notice to the adviser. These fee waivers and expense reimbursements are subject to possible recoupment from the Fund in future years on a rolling three year basis (within the three years after the fees have been waived or reimbursed) if such recoupment can be achieved within the foregoing expense limits as well as any expense limitation that was in place at the time the reimbursement was made. Please review the Fund's most recent prospectus for more detail on the expense waiver.

The Fund's per share net asset value or "NAV" is the value of one share of the Fund as calculated in accordance with the standard formula for valuing exchange traded fund shares. The NAV return is based on the NAV of the Fund and the market return is based on the market price per share of the Fund. The price used to calculate market return ("Market Price") is determined by using the midpoint between the highest bid and the lowest offer on the primary stock exchange on which shares of the Fund are listed for trading, as of the time that the Fund's NAV is calculated. Market Price and NAV returns assume that dividends and capital gain distributions have been reinvested in the Fund at Market Price and NAV, respectively.

** The Bloomberg Barclays Global Aggregate Bond Index is a flagship measure of global investment grade debt from twenty-four local currency markets. This multi-currency benchmark includes treasury, government-related, corporate and securitized fixed-rate bonds from both developed and emerging markets issuers. The Fund's portfolio holdings may differ significantly from the securities held in the Index, and unlike a mutual fund, an unmanaged index assumes no transaction costs, taxes, management fees or other expenses. Investors may not invest directly in an index.

*** The MSCI All Country World Equity Index is a market capitalization weighted index designed to provide a broad measure of equity-market performance throughout the world. The index is maintained by Morgan Stanley Capital International (MSCI), and is comprised of stocks from both developed and emerging markets. The Fund's portfolio holdings may differ significantly from the securities held in the Index, and unlike a mutual fund, an unmanaged index assumes no transaction costs, taxes, management fees or other expenses. Investors may not invest directly in an index.

**** As of the close of business on the day of commencement of trading on September 29, 2017.

FINANCIAL HIGHLIGHTS

Per Share Data and Ratios for a Share of Beneficial Interest Outstanding Throughout each Year or Period Presented

	For the Six Months Ended October 31, 2019 (Unaudited)	For the Year Ended April 30, 2019	For the Period Ended April 30, 2018 (a)
Net asset value, beginning of year/period	\$ 10.25	\$ 9.97	\$ 10.00
Activity from investment operations:			
Net investment income (b)	0.22	0.36	0.17
Net realized and unrealized gain (loss) on investments	(0.09)	0.05	(0.02)
Total from investment operations	0.13	0.41	0.15
Less distributions from:			
Net investment income	(0.20)	(0.13)	(0.18)
Total distributions	(0.20)	(0.13)	(0.18)
Net asset value, end of year/period	\$ 10.18	\$ 10.25	\$ 9.97
Market price, end of year/period	\$ 10.19	\$ 10.23	\$ 9.97
Total return (c)(d)	1.26% (e)	6.30%	0.96% (e)(f)
Market Price Total return (c)(d)	1.56% (e)	6.07%	0.86% (e)
Net assets, end of year/period (000s)	\$ 74,788	\$ 50,219	\$ 25,422
Ratio of gross expenses to average net assets	1.10% (g)(i)	1.35% (h)	2.13% (g)(h)
Ratio of net expenses to average net assets	1.30% (g)(i)	1.30%	1.30% (g)
Ratio of net investment income to average net assets (i)	4.34% (g)	3.64%	2.83% (g)
Portfolio Turnover Rate	36% (e)	50%	0% (e)

(a) The Anfield Capital Diversified Alternatives ETF shares commenced operations on September 28, 2017.

(b) Per share amounts calculated using the average shares method, which more appropriately presents the per share data for the year/period.

(c) Total return is calculated assuming a purchase of shares at net asset value on the first day and a sale at net asset value on the last day of the year/period. Distributions are assumed, for the purpose of this calculation, to be reinvested at the ex-dividend date net asset value per share on their respective payment dates. Total return would have been lower absent fee waiver/expense reimbursement.

(d) Includes adjustments in accordance with accounting principles generally accepted in the United States and, consequently, the net asset value for financial reporting purposes and the returns based upon those net asset values may differ from the net asset values and returns for shareholder transactions.

(e) Not annualized.

(f) Represents total return based on net asset values per share from commencement of investment operations on September 28, 2017 through April 30, 2018. Total return based on net asset value per share, as of the close of business on the day of commencement of trading on the BATS on September 29, 2017 through April 30, 2018 was 0.96%.

(g) Annualized.

(h) Represents the ratio of expenses to average net assets absent fee waivers and/or expense reimbursements by the Adviser.

(i) Recognition of net investment income by the Fund is affected by the timing of the declaration of dividends by the underlying investment companies in which the Fund invests.

(j) Represents the ratio of expenses to average net assets inclusive of the Advisor's recapture of waived/reimbursed fees from prior periods.

Anfield Capital Diversified Alternatives ETF

NOTES TO FINANCIAL STATEMENTS (Unaudited)

October 31, 2019

(1) ORGANIZATION

The Anfield Capital Diversified Alternatives ETF (the “Fund”) is a series of shares of beneficial interest of the Two Roads Shared Trust (the “Trust”), a statutory trust organized under the laws of the State of Delaware on June 8, 2012, and is registered under the Investment Company Act of 1940, as amended (the “1940 Act”), as a diversified, open-end management investment company. The Fund commenced operations on September 28, 2017. The Fund is an actively managed exchange traded fund (“ETF”) that is a fund of funds. The Fund’s investment objective is to seek to provide capital growth and income. It seeks to achieve its investment objective by investing primarily in alternative asset classes and securities that represent sectors, market segments or asset classes that do not represent the general investment universe.

(2) SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements. These policies are in conformity with accounting principles generally accepted in the United States of America (“GAAP”), and require management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates. The Fund is an investment company and accordingly follows the investment company accounting and reporting guidance of the Financial Accounting Standards Board (FASB) Accounting Standard Codification Topic 946 “Financial Services – Investment Companies” including FASB Accounting Standard Update ASU 2013-08.

Security Valuation – Securities listed on an exchange are valued at the last reported sale price at the close of the regular trading session of the exchange on the business day the value is being determined, or in the case of securities listed on NASDAQ at the NASDAQ Official Closing Price. In the absence of a sale such securities shall be valued at the mean between the current bid and ask prices on the day of valuation. Short-term debt obligations having 60 days or less remaining until maturity, at time of purchase may be valued at amortized cost (which approximates fair value). Futures contracts listed for trading on a securities exchange or board of trade (whether domestic or foreign) for which market quotations are readily available shall be valued at the final settled price for the respective futures or futures options or, if no settled price is available, at the last sale price as of the close of business prior to the valuation time. Investments in open-end investment companies are valued at net asset value.

The Fund may hold securities, such as private investments, interests in commodity pools, other non-traded securities or temporarily illiquid securities, for which market quotations are not readily available or are determined to be unreliable. These securities will be valued using the “fair value” procedures approved by the Board. The Board has delegated execution of these procedures to a fair value committee composed of one or more representatives from each of the (i) Trust, (ii) administrator, and (iii) advisor. The committee may also enlist third party consultants such a valuation specialist at a public accounting firm, valuation consultant or financial officer of a security issuer on an as-needed basis to assist in determining a security-specific fair value. The Board has also engaged a third party valuation firm to, as needed, attend valuation meetings held by the Trust, review minutes of such meetings and report to the Board on a quarterly basis. The Board reviews and ratifies the execution of this process and the resultant fair value prices at least quarterly to assure the process produces reliable results.

Anfield Capital Diversified Alternatives ETF

NOTES TO FINANCIAL STATEMENTS (Unaudited)(Continued)

October 31, 2019

Fair Valuation Process –The applicable investments are valued collectively via inputs from each group within the fair value team. For example, fair value determinations are required for the following securities: (i) securities for which market quotations are insufficient or not readily available on a particular business day (including securities for which there is a short and temporary lapse in the provision of a price by the regular pricing source); (ii) securities for which, in the judgment of the advisor, the prices or values available do not represent the fair value of the instrument; factors which may cause the advisor to make such a judgment include, but are not limited to, the following: only a bid price or an asked price is available; the spread between bid and asked prices is substantial; the frequency of sales; the thinness of the market; the size of reported trades; and actions of the securities markets, such as the suspension or limitation of trading; (iii) securities determined to be illiquid; and (iv) securities with respect to which an event that will affect the value thereof has occurred (a “significant event”) since the closing prices were established on the principal exchange on which they are traded, but prior to a Fund’s calculation of its net asset value. Specifically, interests in commodity pools or managed futures pools are valued on a daily basis by reference to the closing market prices of each futures contract or other asset held by a pool, as adjusted for pool expenses. Restricted or illiquid securities, such as private investments or non-traded securities are valued via inputs from the advisor based upon the current bid for the security from two or more independent dealers or other parties reasonably familiar with the facts and circumstances of the security (who should take into consideration all relevant factors as may be appropriate under the circumstances). If the advisor is unable to obtain a current bid from such independent dealers or other independent parties, the fair value committee shall determine the fair value of such security using the following factors: (i) the type of security; (ii) the cost at date of purchase; (iii) the size and nature of the Fund’s holdings; (iv) the discount from market value of unrestricted securities of the same class at the time of purchase and subsequent thereto; (v) information as to any transactions or offers with respect to the security; (vi) the nature and duration of restrictions on disposition of the security and the existence of any registration rights; (vii) how the yield of the security compares to similar securities of companies of similar or equal creditworthiness; (viii) the level of recent trades of similar or comparable securities; (ix) the liquidity characteristics of the security; (x) current market conditions; and (xi) the market value of any securities into which the security is convertible or exchangeable.

Valuation of Underlying Funds - The Fund may invest in portfolios of open-end or closed-end investment companies (the “Underlying Funds”). Investment companies are valued at their respective net asset values as reported by such investment companies. Open-end investment companies value securities in their portfolios for which market quotations are readily available at their market values (generally the last reported sale price) and all other securities and assets at their fair value to the methods established by the board of directors of the open-end funds. The shares of many closed-end investment companies and ETFs, after their initial public offering, frequently trade at a price per share, which is different than the net asset value per share. The difference represents a market premium or market discount of such shares. There can be no assurances that the market discount or market premium on shares of any closed-end investment company or ETF purchased by the Fund will not change.

Exchange Traded Funds – The Fund may invest in ETFs, are a type of fund bought and sold on a securities exchange. An ETF trades like common stock and represents a fixed portfolio of securities. The risks of owning an ETF generally reflect the risks of owning the underlying securities in which it invests, although the lack of liquidity on an ETF could result in it being more volatile. Additionally, ETFs have fees and expenses that reduce their value.

Exchange Traded Notes – The Funds may invest in exchange traded notes (“ETNs”). ETNs are a type of debt security that is linked to the performance of underlying securities. The risks of owning ETNs generally reflect the risks of owning the underlying securities they are designed to track. In addition, ETNs are subject to credit risk generally to the same extent as debt securities.

Time Deposits - Time deposits are issued by a depository institution in exchange for the deposit of funds. The issuer agrees to pay the amount deposited plus interest to the depositor on the date specified with respect to the deposit. Time deposits do not trade in the secondary market prior to maturity. However, some time deposits may be redeemable prior to maturity and may be subject to withdrawal penalties.

Anfield Capital Diversified Alternatives ETF

NOTES TO FINANCIAL STATEMENTS (Unaudited)(Continued)

October 31, 2019

In unusual circumstances, securities may be valued at their fair value as determined in good faith by the Trust's Fair Value Committee and in accordance with the Trust's Portfolio Securities Valuation Procedures (the "Procedures"). The Board will review the fair value method in use for securities requiring a fair market value determination at least quarterly. The Procedures consider, among others, the following factors to determine a security's fair value: the nature and pricing history (if any) of the security; whether any dealer quotations for the security are available; and possible valuation methodologies that could be used to determine the fair value of the security.

The Fund utilizes various methods to measure the fair value of all of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The three levels of input are:

Level 1 – Unadjusted quoted prices in active markets for identical assets and liabilities that the Fund has the ability to access.

Level 2 – Observable inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates and similar data.

Level 3 – Unobservable inputs for the asset or liability, to the extent relevant observable inputs are not available, representing the Fund's own assumptions about the assumptions a market participant would use in valuing the asset or liability, and would be based on the best information available.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3.

The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety, is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following tables summarize the inputs used as of October 31, 2019 for the Fund's assets and liabilities measured at fair value:

Assets*	Level 1	Level 2	Level 3	Total
Common Stocks	\$ 17,340,858	\$ -	\$ -	\$ 17,340,858
Closed-End Funds	24,743,440	-	-	24,743,440
Exchange Traded Funds	28,807,945	-	-	28,807,945
Exchange Traded Note	702,175	-	-	702,175
Real Estate Investment Trust (REIT)	2,598,013	-	-	2,598,013
Total	\$ 74,192,431	\$ -	\$ -	\$ 74,192,431

The Fund did not hold any Level 3 securities during the period.

*Refer to the Schedule of Investments for portfolio composition.

Anfield Capital Diversified Alternatives ETF
NOTES TO FINANCIAL STATEMENTS (Unaudited)(Continued)
October 31, 2019

Impact of Derivatives on the Statements of Assets and Liabilities and Statements of Operations

The derivative instruments outstanding as of October 31, 2019 as disclosed in the Schedule of Investments and the amounts of realized and changes in unrealized gains and losses on derivative instruments during the period as disclosed in the Statements of Operations serve as indicators of the volume of derivative activity for the Fund.

The following is a summary of the location of derivative investments on the Fund's Statements of Operations as of October 31, 2019:

Derivative Investment Type	Location of Gain (Loss) on Derivatives
Equity Futures Contracts	Net realized loss from futures contracts; Net change in unrealized appreciation on futures contracts

The following is a summary of the Fund's realized loss and unrealized depreciation on derivative investments recognized in the Statements of Operations categorized by primary risk exposure for the six months ended October 31, 2019:

Realized loss on derivatives recognized in the Statements of Operations		
Derivative Investment Type	Equity Risk	Total for the Six Months Ended October 31, 2019
Futures contracts	\$ (276,781)	\$ (276,781)

Net change in unrealized appreciation on derivatives recognized in the Statements of Operations		
Derivative Investment Type	Equity Risk	Total for the Six Months Ended October 31,
Futures contracts	\$ 5,588	\$ 5,588

Security Transactions and Related Income

Security transactions are accounted for on trade date basis. Interest income is recognized on an accrual basis. Discounts are accreted and premiums are amortized on securities purchased over the lives of the respective securities. Dividend income is recorded on the ex-dividend date. Realized gains or losses from sales of securities are determined by comparing the identified cost of the security lot sold with the net sales proceeds.

Dividends and Distributions to Shareholders

Ordinarily, dividends from net investment income, if any, are declared and paid annually by the Fund. The Fund distributes its net realized capital gains, if any, to shareholders annually. Dividends from net investment income and distributions from net realized gains are recorded on ex-dividend date and determined in accordance with federal income tax regulations, which may differ from GAAP. These "book/tax" differences are considered either temporary (i.e., deferred losses, capital loss carry forwards) or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the composition of net assets based on their federal tax-basis treatment; temporary differences do not require reclassification.

Anfield Capital Diversified Alternatives ETF
NOTES TO FINANCIAL STATEMENTS (Unaudited)(Continued)
October 31, 2019

Federal Income Taxes

The Fund intends to continue to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its taxable income to its shareholders. Therefore, no provision for federal income tax is required. The Fund recognizes the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained assuming examination by tax authorities. Management has analyzed the Fund’s tax positions and has concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken on returns filed for the open tax year ended April 30, 2018 and April 30, 2019, or expected to be taken in the Fund’s April 30, 2020 year-end tax returns. The Fund identified its major tax jurisdictions as U.S. Federal, Ohio and foreign jurisdictions where the Fund makes significant investments. The Fund is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months.

Expenses

Expenses of the Trust that are directly identifiable to a specific fund are charged to that fund. Expenses, which are not readily identifiable to a specific fund, are allocated in such a manner as deemed equitable (as determined by the Board), taking into consideration the nature and type of expense and the relative sizes of the funds in the Trust.

Indemnification

The Trust indemnifies its officers and trustees for certain liabilities that may arise from the performance of their duties to the Fund and Trust. Additionally, in the normal course of business, the Fund enters into contracts that contain a variety of representations and warranties which provide general indemnities. The Fund’s maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Fund that have not yet occurred. However, the Fund expects the risk of loss due to these warranties and indemnities to be remote.

(3) INVESTMENT TRANSACTIONS

For the six months ended October 31, 2019, cost of purchases and proceeds from sales of portfolio securities (excluding in-kind transactions and short-term investments) for the Fund amounted to \$31,356,541 and \$22,567,532. For the six months ended October 31, 2019, cost of purchases and proceeds from sales of portfolio securities for in-kind transactions, amounted to \$15,956,314 and \$0.

(4) INVESTMENT ADVISORY AGREEMENT AND TRANSACTIONS WITH RELATED PARTIES

Regents Park Funds, LLC serves as the Fund’s investment adviser (the “Adviser”). Pursuant to an Investment Advisory Agreement with the Fund, the Adviser, subject to the authority of the Board, is responsible for managing the day to day operations of the Fund, including: selecting the overall investment strategies; monitoring and evaluating Sub-Adviser (as defined below) performance; and providing related administrative services and facilities.

Anfield Group, LLC (“Anfield Group”), which is wholly owned by the David Young and Sandra G. Glain Family Trust, wholly owns Regents Park. As compensation for its services, the Fund pays to the Adviser an annual advisory fee (computed daily and paid monthly) at an annual rate of 0.80% of its average daily net assets. For the six months ended October 31, 2019, the Fund incurred Advisory Fees of \$261,248.

Anfield Capital Diversified Alternatives ETF

NOTES TO FINANCIAL STATEMENTS (Unaudited)(Continued)

October 31, 2019

The Adviser has engaged Anfield Capital Management, LLC (“Anfield” or the “Sub-Adviser”) to serve as Sub-Adviser to the Fund. Anfield Group owns a 92% majority interest in Anfield. The Sub-Adviser is an affiliate of the Adviser. The Sub-Adviser, with respect to the portion of the Fund’s assets allocated to the Sub-Adviser, is responsible for selecting investments and assuring that investments are made in accordance with the Fund’s investment objective, policies and restrictions. The Adviser compensates the Sub-Adviser for its services from the management fees received from the Fund, which are computed and accrued daily and paid monthly and do not impact the financial statements of the Fund.

The Adviser, pursuant to an Expense Limitation Agreement (the “Agreement”) has contractually agreed to reduce the Fund’s fees and/or absorb expenses of the Fund until at least September 30, 2020 to ensure that total annual Fund operating expenses after fee waiver and reimbursement (exclusive of any taxes, interest, brokerage commissions, expenses incurred in connection with any merger or reorganization, indirect expenses, expenses of other investment companies in which the Fund may invest, or extraordinary expenses such as litigation) will not exceed 1.30% of average daily net assets. This Agreement may be terminated by the Fund’s Board of Trustees on 60 days’ written notice to the Adviser. These fee waivers and expense reimbursements are subject to possible recoupment from the Fund in future years on a rolling three-year basis (within the three years after the fees have been waived or reimbursed) if such recoupment can be achieved within the foregoing expense limits as well as any expense limitation that was in place at the time the reimbursement was made. No reimbursement amount will be paid to the Adviser in any fiscal quarter unless the Board has determined in advance that a reimbursement is in the best interest of the Fund and its shareholders.

For the six months ended October 31, 2019 the Adviser recaptured previously reimbursed fees in the amount of \$70,488. As of the Fund’s most recent fiscal year end, April 30, 2019, fee waivers subject to recoupment by the Adviser are \$100,343; \$82,170 expiring during the fiscal year ending April 30, 2021 and \$18,173 expiring in the fiscal year ended April 30, 2022.

The Trust, with respect to the Fund, has adopted a distribution and service plan (“Plan”) pursuant to Rule 12b-1 under the 1940 Act. Under the Plan, the Fund is authorized to pay distribution fees to Northern Lights Distributors, LLC (the “Distributor” or “NLD”) and other firms that provide distribution and shareholder services (“Service Providers”). If a Service Provider provides these services, the Fund may pay fees at an annual rate not to exceed 0.25% of average daily net assets, pursuant to Rule 12b-1 under the 1940 Act.

No distribution or service fees are currently paid by the Fund and there are no current plans to impose these fees. In the event Rule 12b-1 fees were charged, over time they would increase the cost of an investment in the Fund.

In addition, certain affiliates of the Distributor provide services to the Fund as follows:

Gemini Fund Services, LLC (“GFS”), an affiliate of the Distributor, provides administration and fund accounting services to the Trust. Pursuant to separate servicing agreements with GFS, the Fund pays GFS customary fees for providing administration and fund accounting services to the Fund. Certain officers of the Trust are also officers of GFS, and are not paid any fees directly by the Fund for servicing in such capacities.

BluGiant, LLC (“BluGiant”), BluGiant, an affiliate of GFS and the Distributor, provides EDGAR conversion and filing services as well as print management services for the Fund on an ad-hoc basis. For the provision of these services, BluGiant receives customary fees from the Fund.

Northern Lights Compliance Services, LLC (“NLCS”), an affiliate of GFS and the Distributor, provides a Chief Compliance Officer to the Trust, as well as related compliance services, pursuant to a consulting agreement between NLCS and the Trust. Under the terms of such agreement, NLCS receives customary fees from the Fund.

Anfield Capital Diversified Alternatives ETF

NOTES TO FINANCIAL STATEMENTS (Unaudited)(Continued)

October 31, 2019

On February 1, 2019, NorthStar Financial Services Group, LLC, the parent company of GFS and its affiliated companies including NLD, NLCS and BluGiant (collectively, the “Gemini Companies”), sold its interest in the Gemini Companies to a third party private equity firm that contemporaneously acquired Ultimus Fund Solutions, LLC (an independent mutual fund administration firm) and its affiliates (collectively, the “Ultimus Companies”). As a result of these separate transactions, the Gemini Companies and the Ultimus Companies are now indirectly owned through a common parent entity, The Ultimus Group, LLC.

(5) DISTRIBUTIONS TO SHAREHOLDERS AND TAX COMPONENTS OF CAPITAL

The Statement of Assets and Liabilities represents cost for financial reporting purposes. Aggregate cost for federal tax purposes is \$72,042,163 for the Anfield Capital Diversified Alternatives ETF, and differs from market value by net unrealized appreciation (depreciation) which consisted of:

Gross unrealized appreciation:	\$	3,268,031
Gross unrealized depreciation:		(1,117,763)
Net unrealized appreciation:	\$	<u>2,150,268</u>

The tax character of Fund distributions paid for the fiscal years ended April 30, 2019 and April 30, 2018 was as follows:

	Fiscal Year Ended April 30, 2019	Fiscal Year Ended April 30, 2018
Ordinary Income	\$ 1,227,453	\$ 266,953
Long-Term Capital Gain	-	4,104
Return of Capital	10,775	-
	<u>\$ 1,238,228</u>	<u>\$ 271,057</u>

As of April 30, 2019, the components of accumulated earnings/(deficit) on a tax basis were as follows:

Undistributed Ordinary Income	Undistributed Long-Term Gains	Post October Loss and Late Year Loss	Capital Loss Carry Forwards	Other Book/Tax Differences	Unrealized Appreciation/ (Depreciation)	Total Accumulated Earnings/(Deficits)
\$ -	\$ -	\$ -	\$ (545,214)	\$ -	\$ 1,169,536	\$ 624,322

The difference between book basis and tax basis undistributed net investment income/(loss), accumulated net realized gain/(loss), and unrealized appreciation/(depreciation) from investments is primarily attributable to the tax deferral of losses on wash sales, mark-to-market on futures contracts, and adjustments for partnerships and C-Corporation return of capital distributions.

At April 30, 2019, the Fund had capital loss carry forwards for federal income tax purposes available to offset future capital gains as follows:

Non-Expiring Short-Term	Non-Expiring Long-Term	Total
\$ 545,214	\$ -	\$ 545,214

Anfield Capital Diversified Alternatives ETF

NOTES TO FINANCIAL STATEMENTS (Unaudited)(Continued)

October 31, 2019

Permanent book and tax differences, primarily attributable to tax adjustments for realized gain/(loss) on in-kind redemptions, the reclassification of Fund distributions, and adjustments for partnerships and C-Corporation return of capital distributions resulted in reclassification for the year ended April 30, 2019 as follows:

Paid In Capital	Accumulated Earnings (Losses)
\$(18,868)	\$18,868

(6) CAPITAL SHARE TRANSACTIONS

Shares are not individually redeemable and may be redeemed by the Fund at NAV only in large blocks known as "Creation Units." Shares are created and redeemed by the Fund only in Creation Unit size aggregations of 25,000 shares. Only Authorized Participants or transactions done through an Authorized Participant are permitted to purchase or redeem Creation Units from the Fund. An Authorized Participant is either (i) a broker-dealer or other participant in the clearing process through the Continuous Net Settlement System of the National Securities Clearing Corporation or (ii) a DTC participant and, in each case, must have executed a Participant Agreement with the Distributor. Such transactions are generally permitted on an in-kind basis, with a balancing cash component to equate the transaction to the NAV per share of the Fund on the transaction date. Cash may be substituted equivalent to the value of certain securities generally when they are not available in sufficient quantity for delivery, not eligible for trading by the Authorized Participant or as a result of other market circumstances. In addition, the Fund may impose transaction fees on purchases and redemptions of Fund shares to cover the custodial and other costs incurred by the Funds in effecting trades. A fixed fee payable to the Custodian may be imposed on each creation and redemption transaction regardless of the number of Creation Units involved in the transaction ("Fixed Fee"). Purchases and redemptions of Creation Units for cash or involving cash-in-lieu are required to pay an additional variable charge to compensate the Fund and its ongoing shareholders for brokerage and market impact expenses relating to Creation Unit transactions ("Variable Charge," and together with the Fixed Fee, the "Transaction Fees"). Transactions in capital shares for the Fund are disclosed in the Statements of Changes in Net Assets.

The Transaction Fees for the Fund are listed in the table below:

Fee for In-Kind and Cash Purchases	Maximum Additional Variable Charge for Cash Purchases*
\$250	2.00%

* The maximum Transaction Fee may be up to 2.00% of the amount invested.

(7) PRINCIPLE INVESTMENT RISKS

The Fund's investments in securities, financial instruments and derivatives expose it to various risks, certain of which are discussed below. Please refer to the Fund's prospectus and statement of additional information for a full listing of risks associated with the Fund's investments which include, but are not limited to: authorized participant concentration risk, BDC risk, commodity risk, common stock risk, convertible securities risk, cybersecurity risk, derivatives risk, emerging markets risk, energy risks, ETF structure risk, fluctuation of net asset value risk, foreign (non-U.S.) investment risk, forward and futures risk, gap risk, investment companies and ETF risk, leveraging risk, management risk, market risk, market events risk, newly-formed company risk, options risk, preferred stock risk, regulatory risk, REITs risk, small and medium capitalization stock risk and underlying fund risk.

Anfield Capital Diversified Alternatives ETF

NOTES TO FINANCIAL STATEMENTS (Unaudited)(Continued)

October 31, 2019

Investment Companies and ETFs Risks - When the Fund invests in other investment companies, including ETFs and closed-end funds, it will bear additional expenses based on its pro rata share of other investment company's or ETF's operating expenses, including management fees in addition to those paid by the Fund. The risk of owning an investment company or ETF generally reflects the risks of owning the underlying investments held by the investment company or ETF. The Fund will also incur brokerage costs when it purchases and sells ETFs.

Underlying Fund Risk – The Fund's investment performance and its ability to achieve its investment objective are directly related to the performance of the underlying funds in which it invests. Each underlying fund, including each ETF, is subject to specific risks, depending on the nature of the underlying fund. These risks could include liquidity risk, sector risk, foreign and related currency risk, as well as risks associated with real estate investments and commodities and the Fund will be subject to the risks of the underlying funds in proportion to the allocation of its assets among the underlying funds. Investors in the Fund will indirectly bear fees and expenses charged by the underlying investment companies in which the Fund invests in addition to the Fund's direct fees and expenses. There can be no assurance that the Fund's investments in the underlying funds will achieve their respective investment objectives.

Business Development Companies ("BDC") Risk - BDCs have little or no operating history and may carry risks similar to those of a private equity or venture capital fund. BDC company securities are not redeemable at the option of the shareholder and they may trade in the market at a discount to their net asset value. A significant portion of a BDC's investments are recorded at fair value as determined by its board of directors, which may create uncertainty as to the value of the BDC's investments. Non-traded BDCs are illiquid and it may not be possible to redeem shares or to do so without paying a substantial penalty. Publicly-traded BDCs usually trade at a discount to their net asset value because they invest in unlisted securities and have limited access to capital markets. BDCs are subject to high failure rates among the companies in which they invest and federal securities laws impose restraints upon the organization and operations of BDCs that can limit or negatively impact the performance of a BDC.

Derivatives Risk - The derivative instruments in which the Fund may invest, including futures, options, credit default swaps, total return swaps, repurchase agreements and other similar instruments, may be more volatile than other instruments. The risks associated with investments in derivatives also include liquidity, interest rate, market, credit and management risks, mispricing or improper valuation. Changes in the market value of the derivative may not correlate perfectly with the underlying asset, rate or index, and the Fund could lose more than the principal amount invested. In addition, if a derivative is being used for hedging purposes there can be no assurance given that each derivative position will achieve a perfect correlation with the security or currency against which it is being hedged, or that a particular derivative position will be available when sought by the portfolio manager.

ETF Structure Risks: The Fund is structured as an ETF and as a result is subject to the special risks, including:

- *Not Individually Redeemable.* Shares are not individually redeemable and may be redeemed by the Fund at NAV only in large blocks known as "Creation Units." You may incur brokerage costs purchasing enough Shares to constitute a Creation Unit.
- *Trading Issues.* Trading in Shares on the Cboe BZX Exchange, Inc. (the "Exchange") may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable, such as extraordinary market volatility. There can be no assurance that Shares will continue to meet the listing requirements of the Exchange. An active trading market for the Fund's shares may not be developed or maintained. If the Fund's shares are traded outside a collateralized settlement system, the number of financial institutions that can act as authorized participants that can post collateral on an agency basis is limited, which may limit the market for the Fund's shares.

Anfield Capital Diversified Alternatives ETF

NOTES TO FINANCIAL STATEMENTS (Unaudited)(Continued)

October 31, 2019

- *Market Price Variance Risk.* The market prices of Shares will fluctuate in response to changes in NAV and supply and demand for Shares and will include a “bid-ask spread” charged by the exchange specialists, market makers or other participants that trade the particular security. There may be times when the market price and the NAV vary significantly and you may pay more than NAV when buying Shares on the secondary market, and you may receive less than NAV when you sell those Shares. The market price of Shares, like the price of any exchange-traded security, includes a “bid-ask spread” charged by the exchange specialists, market makers or other participants that trade the particular security. In times of severe market disruption, the bid-ask spread often increases significantly. This means that Shares may trade at a discount to NAV and the discount is likely to be greatest when the price of Shares is falling fastest, which may be the time that you most want to sell your Shares. The Fund’s investment results are measured based upon the daily NAV of the Fund over a period of time. Investors purchasing and selling Shares in the secondary market may not experience investment results consistent with those experienced by those creating and redeeming directly with the Fund.
 - In times of market stress, market makers may step away from their role market making in shares of ETFs and in executing trades, which can lead to differences between the market value of Fund shares and the Fund’s NAV.
 - The market price for the Fund’s shares may deviate from the Fund’s net asset value, particularly during times of market stress, with the result that investors may pay significantly more or significantly less for Fund shares than the Fund’s NAV, which is reflected in the bid and ask price for Fund shares or in the closing price.
 - When all or a portion of an ETFs underlying securities trade in a market that is closed when the market for the Fund’s shares is open, there may be changes from the last quote of the closed market and the quote from the Fund’s domestic trading day, which could lead to differences between the market value of the Fund’s shares and the Fund’s NAV.
 - In stressed market conditions, the market for the Fund’s shares may become less liquid in response to the deteriorating liquidity of the Fund’s portfolio. This adverse effect on the liquidity of the Fund’s shares may, in turn, lead to differences between the market value of the Fund’s shares and the Fund’s NAV.

Fluctuation of Net Asset Value Risk: The NAV of the Fund’s shares will generally fluctuate with changes in the market value of the Fund’s holdings. The market prices of the Shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of and demand for the shares on the Exchange. The Fund’s Sub- Adviser cannot predict whether the shares will trade below, at or above their NAV. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for the Shares will be closely related to, but not identical to, the same forces influencing the prices of the Fund’s holdings trading individually or in the aggregate at any point in time. In addition, unlike conventional ETFs, the Fund is not an index fund. The Fund is actively managed and does not seek to replicate the performance of a specified index. Index based ETFs have generally traded at prices which closely correspond to NAV per share. Actively managed ETFs have a limited trading history and, therefore, there can be no assurance as to whether and/or the extent to which the Shares will trade at premiums or discounts to NAV.

(8) RECENT ACCOUNTING PRONOUNCEMENTS AND REPORTING UPDATES

In August 2018, the FASB issued ASU No. 2018-13, which changed certain fair value measurement disclosure requirements. The ASU, in addition to other modifications and additions, removed the requirement to disclose the amount and reasons for transfers between Level 1 and Level 2 of the fair value hierarchy, and the policy for the timing of transfers between levels. For investment companies, the amendments are effective for financial statements issued for fiscal years beginning after December 15, 2019, and interim periods within those fiscal years. Early adoption is allowed. These amendments have been adopted with these financial statements.

EXPENSE EXAMPLES (Unaudited)

October 31, 2019

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs for purchasing and selling shares; and (2) ongoing costs, including management fees and other fund expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire six-month period from May 1, 2019 to October 31, 2019 (the “period”).

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled “Expenses Paid During the Period” to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund’s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds. Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions on purchases or sales of Fund shares. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Beginning Account Value 5/1/19	Ending Account Value 10/31/19	Expenses Paid During Period 5/1/19 - 10/31/19*	Expense Ratio During the Period 5/1/19 - 10/31/19
Actual	\$1,000.00	\$1,012.60	\$6.58	1.30%

	Beginning Account Value 5/1/19	Ending Account Value 10/31/19	Expenses Paid During Period 5/1/19 - 10/31/19*	Expense Ratio During the Period 5/1/19 - 10/31/19
Hypothetical (5% return before expenses)	\$1,000.00	\$1,018.60	\$6.60	1.30%

*Expenses are equal to the average account value over the period, multiplied by the Fund’s annualized expense ratio, multiplied by the number of days in the period (184) divided by the number of days in the fiscal year (366).

PRIVACY NOTICE

FACTS WHAT DOES TWO ROADS SHARED TRUST DO WITH YOUR PERSONAL INFORMATION

Why? Financial companies choose how they share your personal information.

Federal law gives consumers the right to limit some but not all sharing.
 Federal law also requires us to tell you how we collect, share, and protect your personal information.
 Please read this notice carefully to understand what we do.

What? THE TYPES OF PERSONAL INFORMATION WE COLLECT AND SHARE DEPENDS ON THE PRODUCT OR SERVICE THAT YOU HAVE WITH US. THIS INFORMATION CAN INCLUDE:

- Social Security number and income
- Account transactions and transaction history
- Investment experience and purchase history

When you are *no longer* our customer, we continue to share your information as described in this notice.

How? All financial companies need to share customers’ personal information to run their everyday business. In the section below, we list the reasons financial companies can share their customers’ personal information; the reason Two Roads Shared Trust chooses to share and whether you can limit this sharing.

Reasons we can share your personal information	Does Two Roads Shared Trust share?	Can you limit this sharing?
For our everyday business purposes – such as to process your transactions, maintain your account(s), respond to court orders and legal investigations, or report to credit bureaus	YES	NO
