INVESTMENT OBJECTIVE & PRINCIPAL INVESTMENT STRATEGY

The Affinity World Leaders Equity ETF ("the Fund") seeks to provide investment results that correspond generally, before fees and expenses, to the performance of the Thomson Reuters StarMine Affinity World Leaders Index (the "TRSAWL Index"). The Fund seeks to passively replicate the TRSAWL Index. The TRSAWL Index consists of equity securities issued and traded in the US as well as international countries. The TRSAWL Index consists of approximately 150 to 250 stocks in at least 3 countries, but may span more than 20 countries.

The Fund normally invests at least 80% of its net assets (plus any borrowings for investment purposes) in equity securities included in the Fund's benchmark index. The Fund may also invest in American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs") based on the securities in the TRSAWL Index.

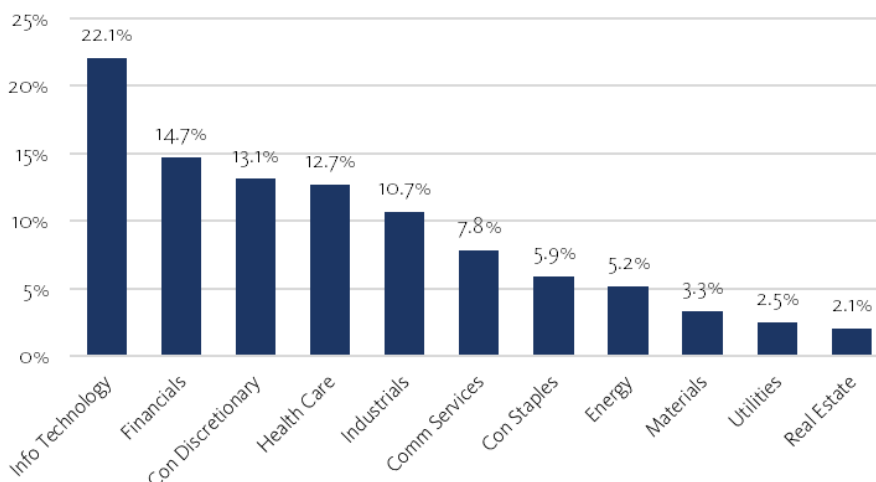

Constituents of the TRSAWL Index are characterized by a strong global footprint (measured by market cap), rank high on measures of earnings quality, demonstrate improving fundamentals (positive earnings revisions on earnings estimates, revenue estimates, price targets, and analyst recommendations), have strong price momentum, and trade at relatively attractive valuations.

NET TOTAL RETURN (%) as of December 31, 2023

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted. Performance is calculated using time-weighted returns. The closing market price return represents the fund's closing market price through December 31, 2023. Performance data current to the most recent month end may be obtained by visiting www.RegentsParkFunds.com or calling 866-866-4848.

HOW DO ADVISORS USE WLDR

- 1) To provide clients with ownership of global equities in a liquid and transparent vehicle
- 2) As a supplement or potential replacement for global equities holdings
- 3) To complement an investor's traditional asset allocation
- 4) To provide exposure among major economic regions and sectors

ATTRIBUTES & BENEFITS¹

- 1) Single investment item seeking to provide built-in diversification
- 2) Passively tracks a group of world equities that rank high on a combination of measures such as valuations, improving fundamentals (positive sell-side analyst revisions on earnings & revenue estimates, price targets, and recommendations), stock price momentum, and earnings quality.

A word about risk: There is no guarantee that any investment strategy will achieve its objectives, generate profits or avoid losses. Exchange Traded Funds involve risk including loss of principle. Investing in *foreign denominated and/or domiciled securities* may involve heightened risk due to currency fluctuations, and economic and political risks, which may be enhanced in emerging markets. *Diversification* does not ensure against loss. The Fund invests a significant portion of its total assets in certain issuers within the same *geographic region* or *economic sector*. An adverse economic, business or political development affecting that region or sector may affect the value of the Fund's investments more than if the Fund's investments were not so focused. As with all *index funds*, the performance of the Fund and the TRSAWL Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by the TRSAWL Index. In addition, the Fund may not be fully invested in the securities of the TRSAWL Index at all times or may hold securities not included in the Index. The Fund may be susceptible to an increased risk of loss, including losses due to adverse events that affect the Fund's investment more than the market as a whole, to the extent that the Fund's investments are concentrated in securities of a particular industry, group of *industries* or *sector*. The value of securities owned by the Fund may go up or down, sometimes rapidly or unpredictably, due to factors affecting particular companies or the *securities markets* generally. A general downturn in the markets may cause multiple asset classes to decline in value simultaneously.

¹ There is no guarantee that any investment will achieve its objectives, generate positive returns or avoid losses.
